Subject: Removal of Redundant Communications Data from Instrument Approach Procedure (IAP) charts.

At the October 2024 Aeronautical Charting Meeting (ACM), a recommendation was submitted to remove certain frequency data included in the bottom briefing strip of IAP charts because it is redundant and contributes to chart clutter, potentially reducing clarity during critical phases of flight. This recommendation subsequently received concurrence from stakeholders at the ACM.

Beginning with the October 2, 2025 publication date, FAA Aeronautical Information Services (AJV-A) will begin removing redundant communications data from Instrument Approach Procedure (IAP) charts. Departure ATIS, CLNC DEL, and the availability of CPDLC will not be charted when the information is shown on the corresponding airport diagram.
