CHARTING NOTICE

Date: October 13, 2022
To: Users of VFR Aeronautical Charts
From: Aeronautical Information Services
Subject: Depiction of Foreign Data on VFR Aeronautical Charts

Foreign Data on VFR Aeronautical Charts

This notice advises of aeronautical content changes in foreign areas on U.S. VFR Aeronautical Charts on December 29, 2022 effective date.

To ensure that flights transitioning foreign regions have the most current and accurate information outside of the U.S. domestic Flight Information Region (FIR) operators should utilize that country's Aeronautical Information Publication. Limited foreign information will be charted on all appropriate Sectional Aeronautical, VFR Terminal Area, VFR Flyway Planning, and Helicopter Route Charts to provide situational awareness and transition planning.

Foreign charted information is provided for the purpose of orientation and transition to charts and publications of other countries.

Foreign data content is not received with sufficient lead times to produce charts with the same robust content as within domestic U.S. airspace.

This change will make clear the intent of U.S. Charts for navigation within domestic airspace and that charts of other countries use within their respective airspace.

View Aeronautical Information Services [Safety Alerts and Charting Notices](https://www.faa.gov/air_traffic/flight_info/aeronav/safety_alerts/) at (https://www.faa.gov/air_traffic/flight_info/aeronav/safety_alerts/) for awareness of chart and data corrections. A page [subscription service](#) is available.

For awareness or participation in a public forum to identify issues concerning safety and usefulness of aeronautical charts and flight information products/services, and discuss change proposals to specifications and methodologies visit [Aeronautical Charting Meeting \(Chart Group\)](https://www.faa.gov/air_traffic/flight_info/aeronav/acf/) at (https://www.faa.gov/air_traffic/flight_info/aeronav/acf/). A page [subscription service](#) is available.
