Aircraft Instruments and Equipment

U.S. airworthiness and certification requirements may not meet other country requirements. It is the responsibility of the pilot to determine if the aircraft meets those requirements.

The items listed below are for the pilot's reference to determine if the aircraft meets the minimum instrument and equipment requirements of the destination country. Additional equipment may be required to comply with the airspace navigation requirements.

- Aircraft equipment required by the country of registry
- VHF two way radio (8.33 kHz spacing above FL95)
- RNAV
- Mode S Transponder mandatory in the Belgian part of the Brussels FIR (See *AIP GEN 1.5-1 para 1.4 SSR Transponder*). Mode S EHS above FL 245 required.

Note: Aircraft operating on the ATS routes above FL 95 within the Brussels FIR/UIR shall be equipped with RNAV equipment meeting RNP 5 in accordance with the requirements set out in ICAO Doc 7030 Regional Supplementary Procedures (EUR.RAC section 14).

Aircraft not equipped with RNAV but able to achieve RNP 5 navigation accuracy may use lower airspace ATS VOR/DME defined routes below FL 095 as published.
