Eric Chayet AFS-400	10/8/26	34-15	53-01-02	MMEL Policy Letter (PL) 105, Revision 4, GC indicates Item “ADS-B Out Extended Squitter” as Category B conflicting with B747 Rev 8 as Category D.	Comply with the PL.	Had Teams conversation with Eric on 10/22/2026. Advised that PL’s were not updated in this revision due to high priority to correct potential safety issue with item 21-26-06-02 Forward Overboard Valve relief. Requested his office defer their comment until Rev 9 of this MMEL, when all PL’s will be updated. AFS-400 concurred with AFS-100 request. Teams exchange is available from AFS-110 if required.
