Brian Billings
Backcountry Super Cub, LLC
PO Box 1799
Douglas, WY 82633

Dear Mr. Billings,

The FAA National Kit Evaluation Team has completed its evaluation of four Backcountry Super Cub amateur-built aircraft kits. The team has determined that the kits, as evaluated at your facility on December 1-2, 2010, may allow an amateur builder to meet the major portion requirement of Title 14, Code of Federal Regulations part 21, Certification Procedures for Products, Articles and Parts, § 21.191(g).

The "Super Cub" and "Super Cruiser" kits are defined by the Super Cub and Super Cruiser Kit Packing List Bill of Materials each dated 10/13/2010, Revision #2. The "Mackey SQ2" and "Mackey SQ4" kits are defined by the Mackey SQ2 and Mackey SQ4 Kit Packing List Bill of Materials each dated 10/13/2010, Revision #2.

The Production and Airworthiness Division (AIR-200) will add the kits to the List of Amateur-Built Aircraft Kits located on the FAA website. This evaluation does not mean that the Backcountry Super Cub aircraft or kits, are FAA "*Certified*," "*Certificated*," or "*Approved*," and it is inappropriate to represent either as such.

Backcountry Super Cub, LLC should notify this office in writing if ownership of the company changes and/or if there are changes made to the evaluated kits. Failure to notify this office may result in removal of the kits from the List of Amateur-Built Aircraft Kits located on the FAA website.

If you have any questions, please contact the Evaluations and Special Projects Branch, AIR-240, at (202) 385-6346.

Sincerely,

For
Frank P. Paskiewicz
Manager, Production and Airworthiness
Division
