Mitch Travis
Cub Crafters, Inc.
1918 South 16th Ave.
Yakima, WA 98903

Dear Mr. Travis;

The Federal Aviation Administration (FAA) National Kit Evaluation Team has completed its evaluation of Cub Crafters, Inc. Carbon Cub EX amateur-built aircraft kit. The team has determined that the kit, as evaluated at your facility on March 29 and 30, 2011, may allow an amateur builder to meet the major portion requirement of Title 14, Code of Federal Regulations part 21, Certification Procedures for Products, Articles and Parts, § 21.191(g).

The Carbon Cub EX kit is defined by the Master Document List for the Carbon Cub EX Kit, Model CCK-1865, Revision 1.0 dated 03/30/2011.

The Production and Airworthiness Division (AIR-200) will add the kit to the List of Amateur-Built Aircraft Kits located on the FAA website. This evaluation does not mean that the Cub Crafter aircraft or kit, is FAA "*Certified*," "*Certificated*," or "*Approved*," and it is inappropriate to represent either as such.

Cub Crafter, Inc. should notify this office in writing if ownership of the company changes and/or if there are changes made to the evaluated kit. Failure to notify this office may result in removal of the kit from the List of Amateur-Built Aircraft Kits located on the FAA website.

If you have any questions, please contact the Evaluations and Special Projects Branch, AIR-240, at (202) 385-6346.

Sincerely,

Terry A. Allen
Acting Manager, Production and Airworthiness
Division
