Wing Comments:

W7 & W8 consists of multiple false (12 inch) ribs aft of the front aluminum tube spar overlaid by a single 12 foot long piece of aluminum sheet metal. Evaluated both with and without wing leading edge wrap. No significant difference in score. Trailing edge consists of angled aluminum sheet attached to main ribs covered by the skin.

W11 & W12 include all brackets fabricated and assembled to the wing and flight controls (Wing, Ailerons and Flaps).

W41 functions captured in W1 through W14.

W52, W53, W54 and W55 added items were inadvertently omitted from this checklist revision.

Landing Gear Comments:
 LG10 - Builder has option of covering MLG struts
 Evaluated tricycle gear configuration which requires more fabrication from the manufacture . The tail dragger version requires less fabrication from the manufacturer. Option for the "Extreme Main Landing Gear" does not change the ammount of farication/assembly by the manufacturer versus the builder.

Propulsion Comments:
P28 and P29 added items were inadvertently omitted from this checklist revision.
P22 includes Rig and Track Propeller
P12 includes Rig and Adjust Engine Controls
Asterisk {*} This kit does not include an engine or engine components. These tasks therefore can not be scored in the NKET evaluation. However, since an engine is required for flight, the FAA Inspector (or DAR) will assign values to the proper column for these tasks upon Airworthiness inspection. The use of commercial assistance must be considered during that inspection.
