Mr. Daniel Perez  
Quicksilver Aeronautics, LLC  
42214 Sarah Way  
Temecula CA, 92590

Dear Mr. Perez:

The Federal Aviation Administration (FAA) National Kit Evaluation Team performed evaluations on five Quicksilver amateur-built aircraft kits at your facility on September 11 and 12, 2012. The kits evaluated were: "MX Sport," "MX II Sport," "MX Sprint," "MX II Sprint," and the "Sport 2S." The team has determined that all five kits may allow an amateur builder to meet the major portion requirement of Title 14, Code of Federal Regulations part 21, Certification Procedures for Products, Articles and Parts, § 21.191(g).

The Production and Airworthiness Division (AIR-200) will have the kit added to the Revised Listing of Amateur-Built Aircraft Kits located on the FAA website. This evaluation does not mean that the kits, completed aircraft or Quicksilver Aeronautics, LLC is FAA *Certified*, *Certificated*, or *Approved*, and it is inappropriate to represent them as such.

Quicksilver Aeronautics, LLC should notify this office in writing if ownership of the company changes or if changes are made to the evaluated kits. Failure to notify this office may result in removal of the kits from the Revised Listing of Amateur-Built Aircraft Kits.

If you have any questions, please contact the Evaluations and Special Projects Branch, AIR-240, at (202) 385-6346.

Sincerely,

Brian Cable  
Manager, Evaluations and Special Projects Branch
