JUL 19 2012

Mr. Kerry Richter
Progressive Aerodyne, Inc.
3801 State Rt. 19
Tavares, FL 32778

Dear Mr. Richter:

The Federal Aviation Administration (FAA) National Kit Evaluation Team (NKET) performed an evaluation of the "SeaRey Fast-Build Wing Option" amateur-built aircraft kit documents in May and June of 2012. The team has determined that the kit, defined by the SeaRey Fast-Build Builders Manual, may allow an amateur builder to meet the major portion requirement of Title 14, Code of Federal Regulations § 21.191(g).

The Production and Airworthiness Division (AIR-200) will have the kit added to the Revised Listing of Amateur-Built Aircraft Kits located on the FAA website. This evaluation does not mean that the "SeaRey Fast Build" aircraft or Progressive Aerodyne is FAA *Certified, Certificated, or Approved*, and it is inappropriate to represent either as such.

Progressive Aerodyne, Inc. should notify this office in writing if ownership of the company changes or if there are changes made to the evaluated kit. Failure to notify this office may result in removal of the kit from the List of Amateur-Built Aircraft Kits.

If you have any questions, please contact the Evaluation and Special Projects Branch, AIR-240, at (202) 385-6346.

Sincerely,

Brian Cable
Manager, Evaluation and Special Projects
Branch
