Mr. Mike O'Sullivan, CEO
Supermarine Aircraft, LLC
365 FM 2807
Cisco, TX 76437

Dear Mr. O'Sullivan:

The Federal Aviation Administration (FAA) National Kit Evaluation Team performed an evaluation of the "Spitfire MK 26B" amateur-built aircraft kit at your facility on January 11, 2012. The team has determined that the kit, defined by the Supermarine Spitfire MK26B Builder's Manual Version A, dated 1/11/2012, may allow an amateur builder to meet the major portion requirement of Title 14, Code of Federal Regulations part 21, Certification Procedures for Products, Articles and Parts, § 21.191(g).

The Production and Airworthiness Division (AIR-200) will have the kit added to the Revised Listing of Amateur-Built Aircraft Kits located on the FAA website. This evaluation does not mean that the "Spitfire MK26B" aircraft or Supermarine Aircraft, LLC is FAA *Certified*, *Certificated*, or *Approved*, and it is inappropriate to represent either as such.

Supermarine Aircraft LLC should notify this office in writing if ownership of the company changes or if there are changes made to the evaluated kit. Failure to notify this office may result in removal of the kit from the List of Amateur-Built Aircraft Kits.

If you have any questions, please contact the Evaluations and Special Projects Branch, AIR-240, at (202) 385-6346.

Sincerely,

Brian Cable
Manager, Evaluations and Special Projects Branch
