Mr. Valter Nebbia
ICP North America
410 E. Chestnut
Freedom Field
Archer City, TX 76351

Dear Mr. Nebbia:

The Federal Aviation Administration (FAA) National Kit Evaluation Team (NKET) completed an evaluation of the VENTURA kit at your facility on January 31, 2018. The VENTURA kit defined by the packing list revision 00, dated December 21, 2017 and construction manual revision 00, dated June 26, 2017. The team determined that the kit may allow an amateur builder to meet the major portion requirement of title 14, Code of Federal Regulations part 21, Certification Procedures for Products and Articles, § 21.191(g).

We will advise the Aircraft Certification Service's Certification Procedures Branch to add the kit to the Revised Listing of Amateur-Built Aircraft Kits (Kit List) located on the FAA website. This evaluation does not mean that the VENTURA aircraft or ICP North America is FAA "*certified, certificated, or approved*", and it is inappropriate to represent either as such.

ICP North America should notify this office in writing if ownership of the company changes and or if there are changes made to the evaluated kit that may affect its potential to meet the major portion requirement. Failure to notify this office may result in removal of the kit from the Kit List.

If you have any questions, please contact the Southwest Manufacturing Inspection Office (MIO) Branch at (817) 222.5180

Sincerely,

A handwritten signature in black ink, appearing to read 'Bruce E. Cain', written over a horizontal line.

Bruce E. Cain
