

State Block Grant Application Information

Application packets must describe:

- The state's organization and capabilities, including a detailed discussion of staffing and resources available to successfully assume the administrative responsibilities outlined in the SBGP MOA.
- The state's airport system planning process.
- The state's programming process.
- The state's willingness and ability to comply with the State Block Grant MOA and Assurances for the Aviation Block Grant Program.
- The state's willingness and ability to comply with the National Environmental Policy Act of 1969, state and local environmental policy acts, Executive orders, agency regulations, and other Federal environmental requirements.
- The state's willingness and ability to provide all program information that is requested by the FAA.
- The state's process for determining which projects will be funded, including:
 1. The state's process for ensuring that critical safety, security, and other national aviation priority needs will be met.
 2. The state's system for determining a project's priority and how this process is consistent with the FAA's national priority system.

Application packets should be submitted to the State's local [ARP Field Office](#).
