Special Condition for Airport Layout Plan Approval

Our review of this ALP included the evaluation of [insert number] access point(s) which will be used to taxi aircraft from residential property onto the airport. The approval, indicated by my signature, is given subject to the condition that the FAA will not pay to relocate, soundproof, or mitigate noise at any homes, domiciles, and/or structures owned, maintained, and/or leased to individuals which are party to an agreement permitting residential through-the-fence access, as described in 78 Fed. Reg. 42419 (July 16, 2013), to the [INSERT NAME OF AIRPORT].
