Subject: O'Hare Airport Residential Noise Levels

Hello Mr Barry Cooper,

I am writing to complain about the increase in noise levels and the existing noise levels that I face as a Chicago resident and a voter. I am located right next to the new runaway flight paths and I can attest to increased levels of noise that have left me sleepless in the past, now it will be even worse. What are you doing as our official to address this issue and to remedy the problem of your constituents? Are we eligible for soundproofing and sound testing? Please help!

Sincerely,

Citizen 30
