Re: Lake Cosman Estates
Elk Grove Village
Sound Complaints

Dear Mr. Cooper:

At the advice of Mr. Jay Small of your Washington, DC office, I am writing you on behalf of the Lake Cosman Estates Homeowners Association of Elk Grove Village for your assistance. At this time I wish to inform the FAA of the offensive aircraft noise that our community which is located directly west of the O'Hare International Airport is experiencing.

Since the opening of additional parallel runways this year, our quality of life has diminished to the point where it is interfering with our sleeping habits during the nighttime hours and we are being awakened as early as 5:39 am. During normal daytime hours it has become an annoyance to experience giant aircraft lumbering overhead with a whining, offensive sound which interrupts people having normal conversations outdoors.

We were led to believe that the O'Hare Modernization program would protect this community by way of the Environmental Impact Study on sound. In our opinion it has failed to do so. The buildings we occupy were constructed with flat roofs and our community is comprised of 21 two story buildings with a total of 141 single family units. (See enclosed site plan updated October 1, 2011.)

An immediate solution to our townhouse noise problem would be to construct a new sloped roof structure over the existing flat roof thus creating an attic space in which sound insulation would be added. In order to accomplish this, the assistance of the Federal Government would be needed in order to defer the cost.

Kindly review and consider our request as an Association of Homeowners so that we can live our lives in a normal environment in proximity to our airport.

The Officers and Board of Directors of Lake Cosman Estates Homeowners Association thank you for your consideration and await your response.
