Mr. Babbitt,

We have lived in Park Ridge over 40 years, raised the family, taught in the local schools, made friends, had a garden....a normal productive life. That has all changed in this community. People were seldom out in the summer months....too noisy, bad odors and fear of dangerous emissions....so we stayed indoors. It is continual, on our beautiful residential street the landings and noise are continual.....a hum----hummm that goes day and night. There is every reason to move out, but to sell into a down market after building our nest egg here is not a consideration for us.

This runway needs limits and no more runways dividing this town with its young population of growing families. 9L27R

Think green and care for people over commerce.

Thank you,
