

Dear Mr. MacMullen,

**I support the O'Hare Modernization Program (OMP)** because it will significantly reduce delays and generate billions of dollars in economic activity. The City of Chicago's plan will reconfigure O'Hare's existing, intersecting runways into a more efficient parallel configuration. Reduced delays will have a positive impact on the entire country.

Doing nothing at O'Hare is not an option. The FAA needs to move forward and approve this plan as soon as possible. The sooner construction can begin, the sooner the country can realize the tremendous benefits of the OMP. Please approve this plan today so that O'Hare International Airport remains the economic engine of the region and state!

## **I support the O'Hare Modernization Program!**
