Date: 5/27/2022

To: All Title 14 CFR Part 139 Airport Operators

Subject: Publication announcement of Advisory Circular (AC) 150/5200-28G, Notice to Air Missions (NOTAMs) for Airport Operators

Point of Contact: Phillip Davenport, AAS-320, 202-267-7072
Email: Phillip.Davenport@faa.gov

1. Purpose. This CertAlert informs airport operators of the release of AC 150/5200-28G.

2. Background. We revised this AC to address new NOTAM information and to reinforce the responsibilities of airport operators on using the NOTAM system. This includes airport condition reporting and procedures for describing, formatting, and disseminating information on unanticipated or temporary changes to components of, or hazards in, the National Airspace System.

We made several changes and additions to this version of the AC, with one particular comprehensive addition associated with the Permanent (PERM) NOTAM process and disposition. See below for paragraph references and summaries of changes:

   a. Changed AC title from “Notices to Airmen (NOTAMs) for Airport Operators” to “Notice to Air Missions (NOTAMs) for Airport Operators,” making it inclusive for all aviators and missions.

   b. Paragraph 1.4 – Added PERM NOTAM information describing the occurrence of when extended period NOTAMs are surpassed.

   c. Paragraph 1.6 – Added information about airport operator responsibilities.

   d. Paragraph 1.6.4 – Added information about the responsibilities of the United States NOTAMs Office (USNOF).

   e. Paragraph 1.8.3 – Added information about criteria for determining NOTAM issuance.

   f. Paragraph 2.3.13 – Added language on the PERM NOTAM process and tools for moving PERM NOTAMs from the NOTAM system to the appropriate chart or publication.
g. Paragraph 2.3.14.4 – Added clarifying language and examples on how to apply NOTAM information for spots, gates, or hardstands.

h. Paragraph 3.2.5.1 – Added an explanation as to why an operator is not permitted to issue RwyCC NOTAMs on closed runways.

i. Paragraph 3.2.5.2 – Added language explaining that airport operators cannot issue multiple RwyCC NOTAMs for the same runway.

j. Paragraph 3.15.2.5 – Added language and a NOTAM example for Runway End Light (RENL).

k. Paragraph 3.17.3 – Added language on moving declared distance NOTAMs from the NOTAM system to the appropriate flight publication.

l. Paragraph 3.19 – Added language and NOTAM examples for bird and wildlife activities.

3. Recommendations. Airport operators should obtain and thoroughly review the Advisory Circular to ensure they appropriately apply the actions and procedures prescribed within at their airports. This includes, but is not limited to, any necessary revisions to their Airport Certification Manuals and airport training programs.
