## Memorandum To Docket No. FAA-2010-0097

Date: 6/13/11  
From: Keri Spencer, Airport Certification and Safety Specialist (202-267-8972)  
Subject: Upload of select Pilot Study Materials

---

---

The FAA plans to upload selected materials from the Airport Safety Management System (SMS) Pilot Studies. As discussed in the Notice of Proposed Rulemaking (NPRM) dated October 7, 2010, the FAA initiated a number of collaborative efforts studying SMS application at U.S. certificated airports. These studies were just one of those collaborative efforts.

Materials published on the docket from these studies are not intended to show means of compliance with the proposed rule. The materials are submitted to provide readers a sample of documents developed by airports that took part in the pilot studies.

FAA received prior approval from all airports whose materials are displayed on the docket and at [http://www.faa.gov/airports/airport\\_safety/safety\\_management\\_systems/external/pilot\\_studies/documentation/](http://www.faa.gov/airports/airport_safety/safety_management_systems/external/pilot_studies/documentation/). Airports allowing viewing of their documents include:

Austin-Bergstrom International, TX  
Baltimore-Washington International, MD  
Boeing Field, WA  
Cheyenne Regional, WY  
Concord Regional, NC  
Dallas-Fort Worth International, TX  
Detroit Metro – Wayne County, MI  
Dubuque Regional, IA  
Fort Worth Alliance, TX  
Jacksonville International, FL  
Kona International at Keahole, HI  
Sacramento International, CA  
San Antonio International, TX  
Santa Maria Public, CA  
Seattle – Tacoma International, WA  
South Bend Regional, IN  
Southern Illinois, IL  
Talladega Municipal, AL
