

LANDING AREA SKETCH

Proponents may use this template to depict their proposed landing area. Please indicate the width, length and orientation of your proposed landing area as referenced to section corners with township and range including latitude and longitude information. Indicate the height of any objects (i.e. trees, buildings, power lines, etc.) that are adjacent to the landing area or within the approach area. Also, please show the distance and difference in elevation between the runway end and any roads, railroads, or highways that are adjacent to or in the approach to the landing area.
