Mr. Mark Meyers
Falcon Field Airport
4800 Falcon Drive
Mesa, AZ 85205-2585

Dear Mr. Meyers:

This is in response to your earlier facsimile addressed to Mr. Paul R. Dykeman, Deputy Director, of Environment and Energy requesting a "list of airports which have used the Part 161 process to install restrictions on the airport." To date, no airports have successfully used Part 161 to establish and implement noise restrictions.

In addition, you requested information on those airports that had noise restrictions in force before Part 161 became effective. The Federal Aviation Administration (FAA) maintains no such listing. As advised in a recent telephone conversation between a member of my staff and your office, you may wish to contact airport aviation interest groups such as the National Business Aircraft Association or the Aircraft Operators and Pilots Association which have gathered this type of data for their use.

If you have any specific questions concerning proposed noise mitigation at your airport, you may wish to contact the Airports Division in our Western-Pacific Region. Their address is P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009; phone 310-297-1240.

I hope this information is helpful.

Sincerely,

William W. Albee
Manager, Policy and Regulatory Division
Office of Environment and Energy
