Subject: Wildlife Hazards - Airport Safety Information Video

The Federal Aviation Administration safety information video series for airport operators and airport employees has released the next video in the series. The video entitled "Wildlife Hazards," shows viewers what happens when a strike is reported, from the initial report entry to how the data is analyzed and then used on a national, regional, and airport level.

The FAA is committed to working with airports and the videos are just another tool to broaden that partnership. Through the web-based video series, the FAA's dedicated and knowledgeable airports staff will share new information, safety reminders, best practices, and lessons learned that can benefit airport operators.

The following link will take you to the video series page on the FAA's website. Please ensure the appropriate airport employees subscribe to this page to receive alerts when new videos are released.
