The FAA's Non-Federal Program Contact List

February 25th, 2020

The National Airspace System contains more than 2,300 non-federally owned AWOS, NavAids, and other systems. The Non-Federal Program regulates their lifecycles, including installation, commissioning, operation, and decommissioning. We also oversee the non-federally employed technicians who maintain those systems. Additionally, we oversee the process by which the FAA assumes ownership of certain non-federal facilities.

Avoid Costly Mistakes!
