North Airfield Enabling Projects | Pilot Awareness Campaign

O'Hare Airfield Layout

As construction of the O'Hare Modernization Program (OMP) progresses, runways at O'Hare are being re-designated. The future north runway is scheduled to be commissioned in November 2008. To avoid pilot confusion, the FAA has mandated a phased runway re-designation program for the existing east-west runways at O'Hare International Airport.

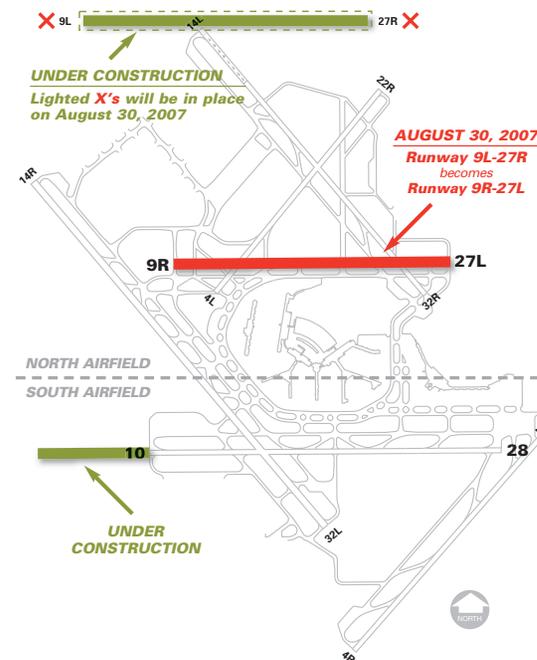

Renaming Plan

In order to accommodate pilots as they adjust to the visual development of the future north runway, the FAA and the City of Chicago have agreed to make the following runway name changes as part of a phased re-designation program:

- July 5, 2007 – Existing Runway 9R-27L will be renamed Runway 10-28.
- August 30, 2007 – Existing Runway 9L-27R will be renamed Runway 9R-27L.
- November 2008 – New north runway will become Runway 9L-27R.
