

	BARRETT'S ESOPHAGUS All Classes (Updated 4/27/2022)	
DISEASE/CONDITION	EVALUATION DATA	DISPOSITION
A. Endoscopy (EGD) biopsy finding	<p>If the AME can determine the medications are acceptable, the pilot has no symptoms that would interfere with flight duties, and there is no evidence of a GI bleed, esophageal cancer, or other pathology:</p> <p>The AME should comment on the approximate date of the procedure and any complications or additional findings (see corresponding section).</p>	ISSUE Summarize this information including approximate date of procedure in Block 60.
B. Abnormal findings or complications (high-grade dysplasia, progression)	<p>Submit the following to the FAA for review:</p> <ol style="list-style-type: none"> 1. A current, detailed Clinical Progress Note generated from a clinic visit with the treating physician no more than 90 days prior to the AME exam. It must include a detailed summary of the history of the condition; current medications, dosage, and side effects (if any); physical exam findings; results of any testing performed; diagnosis; assessment; plan (prognosis); and follow-up. 2. It must specifically include if there is any history of GI bleed, GI cancer, or complications. <p>If history of GI cancer - see that section.</p>	DEFER Submit the information to the FAA for a possible Special Issuance. Follow up Issuance will be per the airman's authorization letter.
