

FY2022 FAA Contract Tower Program Final Selections

August 5, 2022

State	City (Associated)	Airport Name	LOCID	Project Description (Funded)	Selection Amount
AR	Bentonville	Northwest Arkansas National Airport	XNA	The original tower was built 20 years ago as a temporary facility, and does not meet current FAA requirements. This project funds the planning and designing phase of relocating the air traffic control tower. The new structure will meet FAA requirements and ensure Americans with Disability Act (ADA) compliance.	\$1,120,369
CA	Ramona	Ramona Airport	RNM	This project replaces critical operational equipment that has outlived its useful life. Equipment such as radios, automated voice recorders, and airport lighting controls will be replaced.	\$325,000
CA	Sacramento	Sacramento Mather Airport	MHR	This project replaces critical operational equipment that has outlived its useful life. Equipment such as radios, automated voice recorders, and airport lighting controls will be replaced.	\$600,000
CA	Victorville	Southern California Logistics Airport	VCV	This project replaces critical operational equipment that has outlived its useful life. Equipment such as radios, automated voice recorders, and airport lighting controls will be replaced.	\$300,000
CO	Eagle	Eagle County Regional Airport	EGE	This project will renovate the existing 20-year-old air traffic control tower. Upgrades include replacing the heating, ventilation, and air conditioning (HVAC) system, as well as aged critical operational equipment including radios and airport lighting control systems.	\$185,000
HI	Kapolei	Kalaeloa Airport	JRF	This project will renovate the existing 80-year-old air traffic control tower. Upgrades include interior renovations, a new roof, and other system enhancements.	\$1,000,000
ID	Idaho Falls	Idaho Falls Regional Airport	IDA	This project will fund the siting, environmental and design to relocate the existing 60-year-old air traffic control tower.	\$1,500,000
LA	Alexandria	Alexandria International Airport	AEX	This project replaces critical operational equipment that has outlived its useful life. Equipment such as radios, automated voice recorders, and airport lighting controls will be replaced.	\$700,000
MD	Frederick	Frederick Municipal Airport	FDK	This project replaces critical operational equipment that has outlived its useful life. Equipment such as radios, automated voice recorders, and airport lighting controls will be replaced.	\$115,000

FY2022 FAA Contract Tower Program Final Selections

August 5, 2022

State	City (Associated)	Airport Name	LOCID	Project Description (Funded)	Selection Amount
MI	Jackson	Jackson County Airport - Reynolds Field	JXN	This project will modernize the existing 60-year-old air traffic control tower. New restrooms, doors, and an elevator will be installed to ensure Americans with Disabilities Act (ADA) compliance. Additional improvements include removal of asbestos, as well as replacement of mechanical, electric, and lighting systems, to improve energy efficiency.	\$2,200,000
MN	Blaine	Anoka County - Blaine Airport	ANE	Critical operational equipment will be replaced throughout the air traffic control tower. New equipment to be purchased includes upgraded monitors, displays, antenna, receivers and transmitters.	\$51,400
MO	St. Joseph	Rosecrans Memorial Airport	STJ	The replacement tower will correct line of sight deficiencies, provide an elevator to comply with Americans with Disability Act (ADA) standards, and improve security. Additionally, the new tower will be more energy efficient and meet environmental standards.	\$1,800,000
MS	Tupelo	Tupelo Regional Airport	TUP	The existing air traffic control tower was built in 1999 and does not meet current Occupational Safety and Health Administration (OSHA) standards. This project replaces the roof of the tower and includes replacing outdated communication equipment, new plumbing and lighting, and updates to interior finishes throughout the facility.	\$1,400,000
NY	Westhampton Beach	Francis S. Gabreski Airport	FOK	The existing air traffic control tower has outlived its useful life and does not meet current FAA requirements. This project funds the planning and design phases of the construction for a new tower.	\$501,890
OR	Medford	Rogue Valley International-Medford Airport	MFR	This project will replace critical operational equipment such as the ALCS system and new computers for the voice recorder/communications system. Additional building improvements include the installation of closed-circuit television (CCTV) security cameras, replacing the elevator system, and adding an air purification system.	\$1,550,000

FY2022 FAA Contract Tower Program Final Selections

August 5, 2022

State	City (Associated)	Airport Name	LOCID	Project Description (Funded)	Selection Amount
PA	Williamsport	Williamsport Regional Airport	IPT	The existing 60-year old air traffic control tower will be renovated. This project replaces the existing wall panels, windows, and doors throughout the tower.	\$700,000
SC	Hilton Head Island	Hilton Head Island Airport	HXD	This tower improvement project replaces outdated equipment with energy efficient equipment and systems. The project includes replacement of aged critical operational equipment, adding more energy efficient lighting, and updating the heating, ventilation, and air conditioning (HVAC) system.	\$275,000
TN	Millington	Millington-Memphis Airport	NQA	The existing 80-year old air traffic control tower will be renovated. Enhancements include a new roof, waterproofing, asbestos abatement, windows and heating, ventilation, and air conditioning (HVAC) system, along with other interior and exterior finishes.	\$2,976,341
TX	New Braunfels	New Braunfels National Airport	BAZ	This project will relocate the existing air traffic control tower originally built as a training facility. The facility will meet FAA regulations and Americans with Disabilities Act (ADA) compliance.	\$1,500,000
WV	Wheeling	Wheeling-Ohio County Airport	HLG	The existing 70-year old air traffic control tower will be renovated. This project will replace the roof, windows, and critical operational equipment throughout the tower.	\$1,200,000
