

AMTS Quality of Instruction Reports (14 CFR § 147.17)

AMTS Details of Pass Rate by Exam Code

Disclaimer: *This report is for informational purposes only and is based on preliminary data. This preliminary report is not intended to be used for regulatory compliance determinations until data for a full three-year period is available in January 2027. The FAA reserves the right to update the methodology and reporting framework as necessary to ensure accuracy of the report.*

Report Description:

The purpose of this report is to provide additional testing data beyond what is required by § 147.25. This supplementary data may assist in evaluating compliance with [§ 147.17 Training requirements](#). Section 147.17(a)(3) mandates AMTS to ensure students are adequately prepared for FAA certification tests. While the Minimum Passage Rate report focuses on a narrow metric of student outcomes, § 147.17(a)(3) establishes broader quality standards for AMTS programs.

The inclusion of exam-specific data allows schools and regulators to identify and address specific areas for improvement. Although an AMTS is not deemed non-compliant with § 147.25 if the average test scores for a single exam fall below 70 percent, this detailed breakdown provides valuable insights to refine training programs and support continuous improvement.

Pass Rate Calculation

The Pass Rate is only for a test section and is calculated using the following formula:

Test Section Pass Rate = Passing Students (for a test section) / (Passing Students + Failing Students (for a test section)).

Definitions:

- Passing Student(s): Students who pass all of any combination of written, oral, and practical tests for a given test section, that were taken within 60 days after the Graduation Date.
- Failing Student(s): Students who fail any written, oral, or practical test for a given test section, that were taken within 60 days after the Graduation Date.
- Graduation Date: The date a student completes the general, airframe, and/or powerplant curriculum as documented by the AMTS under § 147.21 (Certificate of Completion). This date is communicated to the FAA through the written test center and/or Designated Mechanic Examiner (DME) via authenticated documentation, including FAA Form 8610-2.

Calculation Notes:

- Tests taken before the Graduation Date (i.e., early general written tests and § 65.80 oral and practical tests) are excluded from the Passage Rate calculation.
- If a student fails a test but subsequently passes the same test within 60 days of the Graduation Date, they are counted as a Passing Student.
- Failing Students are included in the Passage Rate calculation only after the 60-day post-graduation period ends, allowing time for retakes.
- If a student passes the written and oral tests but fails the practical test within 60 days, they are classified as a Failing Student.

Stakeholder Feedback: Direct questions or concerns with this report to 9-AWA-AFS-300-Maintenance@FAA.gov.
