

AMTS Minimum Passage Rate (14 CFR § 147.25)

Disclaimer: *This report is for informational purposes only and is based on preliminary data. This preliminary report is not intended to be used for regulatory compliance determinations until data for a full three-year period is available in January 2027. The FAA reserves the right to update the methodology and reporting framework as necessary to ensure accuracy of the report.*

Report Description:

The purpose of the Minimum Passage Rate Report is to demonstrate compliance with aviation maintenance technician school (AMTS) passage rate requirements outlined in [§ 147.25 Minimum passage rate.](#)

Report Scope:

The report includes data for all test types (written, oral, and practical) across the 3 aviation mechanic sections:

- Aviation Mechanic General (AMG)
- Aviation Mechanic Airframe (AMA)
- Aviation Mechanic Powerplant (AMP)

In accordance with the regulation, the report only includes tests taken within 60 days after graduation. Data collection began on August 1, 2023, when the FAA implemented the Mechanic Test Generator (MTG) for oral and practical tests. Once full historical data becomes available, the report will reflect the most recent three-year period. Compliance with § 147.25 cannot be evaluated until data for a full three-year period is available. Similarly, newly certificated schools will not be assessed for compliance until they have accumulated three years of passage rate data.

Minimum Passage Rate Calculation

The Passage Rate is calculated using the following formula:

$$\text{Passage Rate} = \text{Passing Students} / (\text{Passing Students} + \text{Failing Students})$$

Definitions:

- Passing Student(s): Students who pass any combination of the AMG, AMA, and AMP written, oral, and practical tests within 60 days after the Graduation Date.
- Failing Student(s): Students who fail any AMG, AMA, or AMP written, oral, or practical test within 60 days after the Graduation Date.
- Graduation Date: The date a student completes the general, airframe, and/or powerplant curriculum as documented by the AMTS under § 147.21 (Certificate of Completion). This date is communicated to the FAA through the written test center and/or Designated Mechanic Examiner (DME) via authenticated documentation, including FAA Form 8610-2.

Calculation Notes:

- Tests taken before the Graduation Date (i.e., early general written tests and § 65.80 oral and practical tests) are excluded from the Passage Rate calculation.
- If a student fails a test but subsequently passes the same test within 60 days of the Graduation Date, they are counted as a Passing Student.
- Failing Students are included in the Passage Rate calculation only after the 60-day post-graduation period ends, allowing time for retakes.
- If a student passes the written and oral tests but fails the practical test within 60 days, they are classified as a Failing Student.

Stakeholder Feedback: Direct questions or concerns with this report to 9-AWA-AFS-300-Maintenance@FAA.gov.
