Administration

The
Aerospace Medical Research Division of
the Civil Aerospace Medical Institute
Announces

2017 Cabin Safety Research Workshops

May 1 – 5

June 12 – 16

August 21 – 25

The Civil Aerospace Medical Institute (CAMI) is announcing the Cabin Safety Research Workshops for 2017. The workshops are conducted at the Mike Monroney Aeronautical Center in Oklahoma City, OK, and are designed to familiarize interested aviation personnel with important research activities conducted by the Federal Aviation Administration (FAA) in the area of aircraft cabin safety. These workshops are not intended to be training for in-flight personnel, but are designed to provide supplemental information to aviation industry personnel.

Current research topics to be presented include: aircraft accident research, aircraft seat and restraint system research, brace-for-impact positions, infant/child restraint systems, aircraft evacuation research and procedures, aircraft fire safety research and procedures, water survival research, and emergency equipment and procedures. Altitude physiology education includes classroom instruction on the effects of high altitude flight operations on the human body and concludes with a hypoxia exercise, allowing participants to experience the effects of reduced oxygen. Attendees who wish to participate in the hypoxia exercise must present a current third class medical certificate before they can participate in this activity.

Assignments to the workshops are awarded in the order that registration forms are received. Since the workshops fill up quite rapidly, it is important to return the registration form as soon as possible. After receipt of the registration form, a confirmation package will be forwarded to each applicant. This package will contain additional information about the workshops, as well as a list of hotels near the Aeronautical Center. There are no fees for attending the workshops; however, **participants are responsible for their own lodging and transportation.**

The workshops begin on Monday afternoon and conclude midday on Friday. Each workshop accommodates 26 attendees, who are typically senior flight attendants, instructors, in-flight managers, and safety representatives.

Our Research Division relies on feedback from industry in order to continue providing the most timely and applicable information possible. Therefore, the goal of these workshops is to provide an open forum for exchange of information between participants and CAMI researchers.

Registration Form for 2017 Cabin Safety Research Workshops

Please e-mail the information below for **each applicant**. Procedures at the Mike Monroney Aeronautical Center require us to provide the names of workshop attendees to our security office in advance of the workshop start date. Please note that applications may be made by **individuals only**, that is, multiple applications WILL NOT be accepted from a single individual. If you are unable to attend, but have a colleague who can take your place, please have that person send us his or her application at least two weeks prior to the start of the workshop. Please be advised that those who do not provide sufficient cancellation notice will not be eligible to re-apply for one calendar year. A confirmation package containing a list of area hotels, the agenda, descriptions of activities and required attire, and maps to CAMI will be sent by e-mail to each registrant, so please provide accurate contact information. If you have not received a confirmation package within 4 weeks of the workshop date, please contact david.weed@faa.gov.

Participating non-U.S. citizens will need to complete a Foreign Visitor Request Form, which will be included in the confirmation package. Please provide all the information listed on this form along with a valid e-mail address, and return to David Weed (see below) as soon as possible, but no later than 60 days prior to the workshop start date to assure your successful registration.

Last Name: _____ **First Name:** _____

Company or Affiliation: _____

U.S. Citizen: Yes No

Address 1: _____

Address 2: _____

E-Mail Address: _____

Please provide a valid e-mail address so we can confirm your reservation.

Phone Number: _____

Please check the date of the workshop you would like to attend. The workshop dates for 2017 are:

May 1 – 5 **June 12 – 16** **August 21 – 25**

Have you previously attended a Cabin Safety Workshop? **Yes** **No**

Do you plan to participate in the hypoxia exercise? **Yes** **No**
