

Federal Aviation Administration

Memorandum

MAR 21 2017

Date:

To: Al Spence, Directives Program Manager, ASP-110
Joy Wolf, Directives Management Officer, AIR-100

From: *Fok* Jeffrey E. Duven, Manager, Transport Airplane Directorate, ANM-100 *M. J. Haggard*

Prepared by: Suzanne Masterson, Transport Standards Staff, ANM-115, 425-227-1855

Subject: Cancellation of Advisory Circular 25-21, Certification of Transport Airplane Structure, dated September 1, 1999

This memorandum cancels Advisory Circular (AC) 25-21, Certification of Transport Airplane Structure, dated September 1, 1999.

Advisory Circular 25-21 was issued to list Title 14, Code of Federal Regulations part 25 rules and the related acceptable compliance methods for transport airplane structure.

This AC is obsolete and unnecessary. It is currently 17 years out of date, and therefore incorrect in several regulatory and AC references. We expect this action to have no effect on applicants and regulators because the content of the AC is obsolete and because there is no substantive information in this AC that needs to be retained in an AC format.

The issuance of this memorandum cancels AC 25-21.
