Errata Sheet for Advisory Circular (AC) 150/5210-24A, Airport Foreign Object Debris (FOD) Management

Last Update: 5/20/2024

This errata sheet logs content errors and required updates identified after the Advisory Circular was signed on December 20, 2023. These errors have been corrected in the consolidated PDF version of the AC available on the FAA website.

#	Description of Correction	Location in Document	Rationale	Date Error Corrected
1	Replaces entire paragraph with the following: “A FOD risk assessment enables an airport to determine where unsafe FOD conditions exist. For airports required to implement Safety Management Systems (SMS) under 14 CFR Part 139 Subpart E, the risk assessment is outlined in the airport’s Safety Risk Management portion of their SMS. Use of a risk assessment process, detailed in AC 150/5200-37A, is a good practice for all airports as part of their FOD management program.”	Par. 4.2	This change updates the paragraph, as described in the original text, to reflect the implementation of the SMS rule.	5/20/2024
