

NOTICE

U.S. DEPARTMENT OF TRANSPORTATION FEDERAL AVIATION ADMINISTRATION

N JO 1720.86

Air Traffic Organization Policy

Effective Date:
6/18/2008

Cancellation Date:
6/18/2009

SUBJ: Distribution of National Airspace System (NAS) Technical Directives

1. **Purpose of this Notice.** This notice outlines plans for the new Direct Distribution System (DDS), which is used to distribute maintenance handbooks, notices, notices of intent, and System Support Directives (SSDs) to the field.

2. **Who this Notice Affects.** This notice affects Technical Operations field offices that receive hard copies of NAS technical directives via DDS and Second Level Engineering offices in Technical Operations Services, En Route and Oceanic, and Terminal Services, which originate NAS technical directives.

3. **Where You Can Get a Copy of this Notice.** This notice is available on https://employees.faa.gov/tools_resources/orders_notices/

4. **Background.** Due to the realignment of Technical Operations field offices and resulting changes to cost centers, it is necessary to reengineer the distribution system that is used to provide hard copies of maintenance handbooks, notices, notices of intent, and System Support Directives (SSDs) to field offices.

5. **Methodology.** Since cost centers are no longer assigned to the work center level, the new distribution system will use the General Services Administration (GSA) Address Code to ensure continued distribution to the work center level. The new distribution system will interface with the Facility, Equipment, and Service Profile (FSEP) for inventory information as it has in the past to determine inventory count (copy count) information.

a. **Default Copy Count Calculation.** The new distribution system will automatically default to the following number of document copies:

(1) The field facility that has the equipment in FSEP on their GSA Address Code will receive the number of units showing in FSEP on their GSA Address Code plus 1 copy. The exception to this will be the following communications equipment: BUEC, ECS, RCAG, RCO, RCE, RTR. The default copy count number for this equipment will be 10.

(2) Parent System Support Centers (SSC) will receive 2 copies of all technical documentation distributed to the field facility listed below it.

Note: Multiple field facilities listed below the same SSC will result in a total of 2 copies being sent to the parent SSC – not a larger quantity of copies.

(3) Parent Groups (where they exist) and Parent Districts will receive 2 copies of any technical documentation distributed to the SSC's listed below them.

b. **Copy Count Over-Ride.** The SSC Manager may, at their discretion, change the copy count number their facilities will receive to a number that is lower than the default copy count number. A new field will be provided in WebFSEP called the "DDS Copy Count" field. The SSC manager (or their designee) will be able to go into WebFSEP and over-ride the default copy count to a lower number. If the SSC manager (or their designee) does not over-ride the default copy count, then the default copy count will be the number of copies the facility will receive.

6. **Determination of Mailing Address.** The Logistics Information System (LIS) allows for three addresses: [Mailing], [Freight] and [Special]. The [Mailing Address] fields in the LIS will be used by the DDS to mail copies to field facilities. Therefore, it is important that all field facilities have accurate, up-to-date [Mailing Addresses] in LIS.

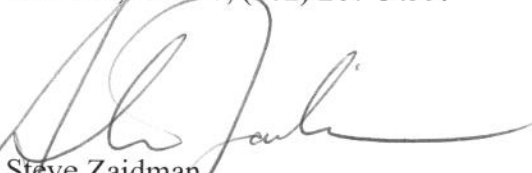

7. **Action Item.** The appendices to this notice show a listing of the GSA Address Codes and associated mailing addresses from LIS. To ensure that the new system provides copies to the correct addresses, SSC's are requested to verify all [Mailing Addresses] in LIS for their GSA address codes by July 25. Addresses should be corrected as follows.

a. For conformity, please ensure the first line of the [Mailing Address Line 1] reads, "DOT/FAA/Office Routing Code".

b. Please ensure that the second line of the [Mailing Address Line 2] reads, "Name of Office/Building/ Room Number" (as applicable).

c. Please ensure that the remainder of the [Mailing Address Line 3] reflects where technical documentation should be delivered.

8. **Point of Contact.** For questions, please contact Dottie Lukinic, Technical Operations Services, AJW-8, (202) 267 8499.

Steve Zaidman
Vice President, Technical Operations Services
