N JO 7210.900

Effective Date:
December 02, 2016

Cancellation Date:
April 27, 2017

SUBJ: Procedures for Conducting Telecons for Weather Impacted Special Activity Airspace (SAA)

1. Purpose of This Notice. This notice provides guidance to facilities applicable to conducting telecons when weather is forecasted to impact an active or scheduled SAA. The procedures contained in this notice supplement existing guidance contained in FAA JO 7210.3, Facility Operation and Administration.

2. Audience. This notice applies to the following Air Traffic Organization (ATO) service units: Air Traffic Services, Mission Support, and System Operations; and all associated air traffic control facilities.

3. Where Can I Find This Notice? This notice is available on the MyFAA employee Web site at https://employees.faa.gov/tools_resources/orders_notices/ and on the air traffic publications Web site at http://www.faa.gov/air_traffic/publications/.

4. Cancellation. This notice cancels FAA N JO 7210.897, Procedures for Conducting Telecons for Weather Impacted Special Use Airspace, effective August 22, 2016.

5. Explanation of Policy Change. FAA N JO 7210.897 contained procedural guidance for conducting telecons when weather impacted routes near Special Activity Airspace (SAA). That notice specified that the guidance should be placed in FAA JO 7210.3, paragraph 17-14-3. This notice is being issued to change the location of that guidance to 17-2-4a.9, and contains no alterations to the content of previously issued procedures.

The procedures outlined in paragraph 6 of this notice will be incorporated into the FAA JO 7210.3, paragraph 17-2-4a.9, Field Facilities, effective April 27, 2017.

6. Procedures/Responsibilities/Action. Amend FAA Order JO 7210.3, paragraph 17-2-4, to read as follows:

17-2-4. FIELD FACILITIES

Title thru a.8., no change

9. Standard traffic management unit procedures listed below must be applied when weather is scheduled to impact an active or scheduled SAA with the following additions/changes:

(a) Facility Traffic Management Unit(s) (TMU), must conduct a telecon if weather is forecasted to impact a facility's traffic flow, which may potentially cause an aircraft to enter the protected airspace of an active SAA within their facility.

***NOTE** - If the facility has instantaneous recall of the SAA airspace then a telecon is not required.*

(b) Participants must include at a minimum, the using agency or scheduling agency and the controlling agency. If available, the Center Weather Service Unit (CWSU), Operations and any other entities necessary to ensure a comprehensive look at the day ahead should be included.

(c) The intent of the telecon is to address any issues that may arise due to weather, the usage of SAA, civil traffic flow, and alternate plans. These calls will also serve as a venue in which the facility can determine the type of activity that will be occurring in the SAA.

(d) Unless it is clearly understood and agreed upon by the using or scheduling agency that the SAA will be available for civil traffic, facilities must not base their plan on using active military airspace.

(e) If the SAA will not be available for civil traffic, then Traffic Management Initiatives (TMIs) must be put in place to ensure aircraft remain clear of the protected airspace of an active special use airspace that is impacted by weather.

***NOTE** - If the facility has instantaneous recall of the SAA airspace then TMI(s) may not be required.*

(f) If a deviation due to forecasted weather occurs that causes an aircraft to enter into an active SAA:

(1) The Supervisor Traffic Management Coordinator (STMC), must immediately conduct an evaluation of TMIs in place with emphasis on adjusting the flow of traffic away from the SAA.

(2) The Air Traffic Manager (ATM) must ensure the appropriate Service Review (i.e.; System Service Review or Traffic Management Review) is completed in accordance with FAA JO 7210.634, Air Traffic Organization (ATO) Quality Control, Chapter 3.

7. Distribution. This notice is distributed to the following ATO service units: Air Traffic Services, Mission Support Services, and System Operations Services; the Office of ATO Safety and Technical Training; Flight Standards Service; the Air Traffic Safety Oversight Service; the William J. Hughes Technical Center; and the Mike Monroney Aeronautical Center.

8. Background. This notice contains the procedures listed in the Corrective Action Plan (CAP) for Air Traffic Safety Action Program (ATSAP) Corrective Action Request (CAR) 2010-040, Special Use Airspace (SUA) and Weather Deviations.

9. Safety Management System. A SRM Panel was convened on January 11, 2012 to evaluate the changes to the NAS contained in CAR 2010-040. A portion of the evaluation involved the TMU requirements for planning telecons. The panel issued a Safety Risk Management Decision Memorandum (SRMDM) for Corrective Action Plan (CAP) for Air Traffic Safety Action Program (ATSAP) Corrective Action Request (CAR) 2010-040, Special Use Airspace (SUA) and Weather Deviations. The SRMDM was accepted on February 29, 2012.
