

ORDER

DEPARTMENT OF TRANSPORTATION
FEDERAL AVIATION ADMINISTRATION

0000.22E

Date: 6/10/04

SUBJ: SYSTEM SUPPORT DIRECTIVES CHECKLIST

1. **PURPOSE.** This order transmits the System Support Directives (SSD) Checklist, Appendix A, issued by Operational Support (AOS) up to February 29, 2004.
2. **DISTRIBUTION.** This order is distributed to the regional and division level in Airway Facilities and Air Traffic Divisions; to the division level at the FAA Logistics Center and the FAA Academy at the Mike Monroney Aeronautical Center; to the branch level in System Engineering Division and the System Analysis Division at the William J. Hughes Technical Center; and to all Airway Facilities and Air Traffic field offices with a limited distribution.
3. **CANCELLATION.** Order 0000.22D, System Support Directives Checklist, dated August 31, 2003 is cancelled.
4. **BACKGROUND.** In October of 1996, AOS launched an effort to consolidate and standardize the various formats used to deliver technical information and software and hardware modifications (Electronic Equipment Modifications [EEM], Plant Equipment Modifications [PEM], Site Program Bulletins [SPB], and Site Technical Bulletins [STB]) to the field. This effort resulted in the SSD format, which consists of three document-types:
 - a. **System Support Modifications (SSM):** are used to transmit system hardware, software and plant modifications to the field.
 - b. **System Documentation Releases (SDR):** are used to deliver Technical Issuance (TI) documents or change pages.
 - c. **System Technical Releases (STR):** are used to deliver technical system information that does not require a hardware or software modification.
5. **EXPLANATION.** This order represents a transition from in the Washington Headquarters Directives Checklist, WA0000.5E to the System Support Directives Checklist. However, previously issued EEMs and PEMs will still be listed in the latest edition of Order WA0000.5E. The SSD Checklist will

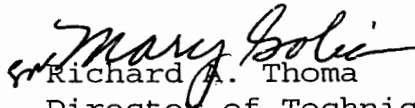

also be available on the web at
<http://intranet.aos.faa.gov/AOS20/aos22/ssd/ssd.htm>

6. **SYSTEM SUPPORT DIRECTIVES CHECKLIST.** The SSD checklist is documented alphabetically by facility type and is grouped by document type (SDR, SSM, STR).

7. **REFERENCE.** SSD documentation can be cross-referenced with the Standard Subject Classification Code, as listed in the latest edition of Order 0000.1. The Standard Subject Classification Code is located in the center of the heading of the issued SSD. This number refers to the system classification number of the EEMs and PEMs.

8. **OFFICE OF PRIMARY RESPONSIBILITY (OPR).** Operational Support (AOS) is the office of primary responsibility (OPR) for the SSD Checklist. However, the organization responsible for the individual SSD document is listed in Appendix A, under the heading of OPR.

9. **PUBLICATION FREQUENCY.** The SSD checklist is published semi-annually by the Program Management Division, AOS-20.

Richard A. Thoma

Director of Technical Operations Support
