SUBJ: Notices to Airmen (NOTAM)

This Order prescribes direction used to format and distribute information regarding unanticipated or temporary changes to services, components of, or hazards in, the National Airspace System (NAS). Controllers are required to be familiar with the provisions of this order that pertain to their operational responsibilities. The Notices to Airmen (NOTAM) system does not advertise data already published or charted.

Steven Villanueva
Director of Flight Services
Air Traffic Organization

Date Signed 9/21/2016
**Notices to Airmen**

**(NOTAM)**

**Explanation of Changes**

**Effective: January 5, 2017**

1–1–7 2c  Deleted the reference to Policy and Software

1–1–8  The effective date of the 7930.2R is January 5, 2017.

1–1–9  Added the Technical Operations order, 6750.24 to the references.

1–3–1  Added AIS responsibilities from the Flight Standards order, 6750.19, to here

1–3–2  Changed the title to “Technical Operations”.

   Divided the duties into section a. for the Operations Control Center (OCC) and the Service Operations Center (SOSC) and section b. for Flight Inspection Services which previously was in section 1–3–3 of the 7930.2Q.

1–3–3  Added the Service Area as a NOTAM Originator and renumbered the rest of the paragraphs.

1–3–4  Added A and B responsibilities from the AFS order.

1–3–7  Moved section describing Non–Federal Facilities from 3–2–4 to this section.

1–4–3  Edited to move all examples into Appendix A.

1–4–6  h.  Added a definition of the Federal NOTAM System. Renumbered the rest of them.

NEW – Added definition of Visual Navigation Aid

m.  Added more to the term Military from chapter 8.

r.  Pointer NOTAM – added the phrase “additional aeronautical information”

NEW – Added definition of Radio Navigation Aid

2–1–1 and throughout

   Changed U.S. NOTAM System to NOTAM system.

2–1–4  Combined sections a. and b. to 2–1–4 then moved the rest to Appendix E.

2–1–8  d  Changed name from Aeronautical Information Management to Aeronautical Information Services.

3–1–1  Moved “Tie–In Stations” paragraph to Appendix E. Renumbered the rest of paragraphs.

Paragraphs d. and e. were added to explain how NOTAMs exceeding 20 lines are auto rejected and that all auto–reject messages are not stored in the NOTAM master file.

3–1–3  Moved “NOTAM LOG” to Appendix E

3–1–4  “FDC Presidential” is now 3–1–2 and section b. through section e. have been moved to Appendix E

3–2–3  “Passing NOTAM” moved to Appendix E

3–2–4  “Non–Federal” added to 1–3–7

3–3–1  Added clarification about the term “service” always being spelled out.
3–3–4 Added leading zero to (RWY 03/21)
     Added leading zeros to the examples.
3–3–5 f. Changed the example to only show the runway identification – removed the condition of the
     NOTAM
3–3–6 a. 1. Changed the examples to only show the taxiway identification (removed the condition),
     deleted the NOTE, and moved the full examples to Appendix A.
3–3–6 a. 3. Removed the condition from the helipad example.
3–3–6 b. Clarified the definition by removing reference to the condition and added to policy how ALL
     is defined; also amended the first example to show TWY ALL. Moved the remaining exam-
     ples to Appendix A.
3–3–6 c. 1. Removed the condition from the examples. Moved the last example to policy under 3–3–6 c.
     3.
3–3–6 c. 2. Changed the condition of the first example to WIP.
3–3–6 c. 3. Added to policy how to indicate the intersection of two taxiways and included an example.
3–3–7 a/b Added BARRICADED with a definition and LGTD AND BARRICADED as standard NO-
     TAM phrases.
4–1–1 Moved “Accepting NOTAM D Information” to Appendix E; renumbered and combined
     paragraphs into 1.
4–2–1 Added a graphical depiction of NOTAM Sentence Structure to 4–2–1, and policy of using
     the sentence structure.
4–2–1 a. 14 (b) Deleted the (See paragraph 4–4–3), from this section.
4–2–1 a. 14 (e) Changed “OPEN” to “OPN”, the ICAO contraction
4–3 Moved to Appendix E – Miscellaneous Functions. Renumbered rest of paragraphs/sections
4–4 Renamed Section 3; former paragraph 4–4–3 a. moved to Appendix E USNS/AISR Func-
     tions. Renumbered rest of paragraphs
4–5–1 Section 5 Moved to Appendix E Computer Functions
5–1–2 b. and throughout
     Moved examples to Appendix A, Examples.
5–1–3 Added Sentence Structure Graphic
     Shortened initial phrase for work flow
     Added policy of using AP, Heliport or Seaplane base for standardization
5–1–3 b. Moved some of the verbiage from a. to b.
     Moved the table to Appendix A, Examples.
5–1–4 **Background:** Section 5–1–4 is restructured due to the Takeoff and Landing Performance
     Assessment (TALPA) workgroup, which was formed to address the safety of operations on
     wet and contaminated runways, as well as improvements to the assessment and reporting of
     airport conditions. The cornerstone recommendation produced by the work is the Runway
     Condition Assessment Matrix (RCAM) and its associated elements used to promote the use
of standardized terminology by all parties involved in the process of determining, describing, and distributing the runway surface conditions and their effects on takeoff and landing decisions.

Added Sentence Structure Graphic

PATCHY is no longer used

THN is eliminated. Actual measurement is used

RUTS is no longer a condition of the contaminated surface. It is part of the Safety Area. Removed from FICON.

No partial Reporting (S 2000ft)

No standalone MU NOTAMs for runways – removed the list of runway friction devices

Rubber is deleted from reportable contaminant list

Removed Pilot Reported feature

All reference to MU and friction measuring equipment is deleted.

If the whole runway is treated (plowed, swept) the treatment is not included.

Differences between RWY, TWY and APRON

Description of Runway Condition Code (RCC) and the Runway Condition Assessment Matrix (RCAM) Added these tables to the order

Format of a FICON NOTAM

<table>
<thead>
<tr>
<th>FICON</th>
</tr>
</thead>
<tbody>
<tr>
<td>RwyCC</td>
</tr>
<tr>
<td>Condition – describes what is included as the “condition”</td>
</tr>
<tr>
<td>Action – describes the actions taken to treat the surfaces</td>
</tr>
<tr>
<td>Methods (plow, swept, deiced, sanded)</td>
</tr>
<tr>
<td>Types of ridges (snowbanks, berms, etc.)</td>
</tr>
<tr>
<td>Remainder – if different from the full width.</td>
</tr>
<tr>
<td>Braking Action</td>
</tr>
<tr>
<td>Observation Time</td>
</tr>
<tr>
<td>Conditions Not Monitored</td>
</tr>
<tr>
<td>Start/End time</td>
</tr>
</tbody>
</table>

Rubber as described on runways and taxiways.

5–1–5 Added a Sentence Structure graphic and generic NOTAM example

a. 4. Added the verbiage for INDEX A ARFF outage.

5–1–5 d. Deleted the explanation, the example will show the format

5–1–6 Added a Sentence Structure graphic, and generic NOTAM example

5–1–6 d. Changed the format and numbering of sentence structure from d–j to c. 1–7

5–2–1 Added a Sentence Structure graphic, and generic NOTAM example – Moved all examples to Appendix A, Examples
5–2–1 b. Made the “Lead on lead off” note into policy.
5–2–2 Added a Sentence Structure graphic, and generic NOTAM example
9.(a) Added Out of Service as a condition for non–FCC.
5–3–6 Reworded paragraph a for clarity
5–3–7 Added Sentence Structure graphic and generic NOTAM example
5–3–7 c. Added Sentence Structure graphic and generic NOTAM example
5–3–8 a. 1. Moved Note 1 to Appendix A, Examples, Note 2 to USNS Appendix and Note 3 becomes Note 1.
5–4–3 Added a Sentence Structure graphic. Made the note about frequencies into policy.
5–5–1 Added a Sentence Structure graphic and generic NOTAM example.
6–1–1 Added a Sentence Structure graphic and generic NOTAM example.
6–1–3 d. Changed wording to remove “as depicted below” since examples are in Appendix A
6–1–5 b. Was deleted (already shown in TBL 6–1–1) c & d become b & c.
6–1–5 c. Kept the headers of activities requiring authorization. Moved the rest to Appendix A.
7–1–3 Added a Sentence Structure graphic and generic NOTAM example. Information contained in 8260.19 was moved here.
7–1–5 b. Made the note with the FSS phone number into POLICY
7–2–2 /7–2–3 Moved to Appendix E Computer Functions
8–1–1 Moved to Appendix D Miscellaneous Functions
8–3–1 to 8–3–3 Moved to Appendix E Computer Functions
8–3–4 Included this section in 1–4–6, Military NOTAMs
Chapter 9 Renumbered to become Chapter 8
9–1–2 b and 9–1–3 Moved to Appendix E Computer Functions
9–2–1 b. Moved to Appendix E Computer Functions
Comments/Corrections

Chapter 7. FDC NOTAMs
Chapter 1. General

Section 1. Introduction

1–1–1. PURPOSE

This order prescribes direction used to format and distribute information regarding unanticipated or temporary changes to services, components of, or hazards in, the National Airspace System (NAS). The Notices to Airmen (NOTAM) system does not duplicate data already published or charted. Originators of airmen information are expected to inform the National Flight Data Center (NFDC) in sufficient time before the effective dates of changes to permit publishing of aeronautical data on the various charts or in the appropriate publications. When time does not allow for publication of a change or an outage and if the subject matter meets NOTAM criteria, issue a NOTAM until published.

1–1–2. AUDIENCE

The primary audience for this order is any office responsible for originating NOTAMs. The secondary audience is those who use aeronautical information.

1–1–3. WHERE TO FIND THIS ORDER

This order is available on the Federal Aviation Administration (FAA) website at http://faa.gov/air_traffic/publications and http://employees.faa.gov/tools_resources/orders_notices/.

1–1–4. CANCELLATION

FAA Order JO 7930.2Q, Notices to Airmen (NOTAM) dated December 18, 2015 is canceled.

1–1–5. EXPLANATION OF CHANGES

The significant changes to the basic order will be published and included in the Explanation of Change page(s). It is advisable to retain the page(s) throughout the duration of the basic order. If further information is desired, direct questions through the appropriate facility/service area staff to System Operations Services, Flight Services, Safety and Operations Policy Group.

1–1–6. DISTRIBUTION

This order is distributed to selected offices in Washington headquarters, service area offices, the William J. Hughes Technical Center, the Mike Monroney Aeronautical Center, and air traffic operations field offices and facilities.

1–1–7. RECOMMENDATION FOR PROCEDURAL CHANGES

a. The contents of this order will be periodically reviewed and updated, as required by National Airspace Data Interchange Network (NADIN), General Notices (GENOTs), and order changes. Changes/orders are published on the publications cycle.

b. Any changes to this order must be submitted to the VP, Mission Support Services, attn.: ATC Procedures Office, AJV–11:

1. Personnel should submit recommended changes in procedures to facility management.

2. Recommendations from other sources should be submitted through appropriate FAA, military, or industry/user channels.
1–1–8. EFFECTIVE DATE

This order is effective January 5, 2017.

1–1–9. RELATED PUBLICATIONS

• Military units issue NOTAMs pertaining to their bases and airspace based on the guidelines set forth in Air Force Instruction Interservice Publication 11-208/AR 95-10/OPNAVINST 3721.20, DoD Notice to Airmen (NOTAM) System.

• FAA Order 5010.4, Airport Data and Information Management

• JO 7110.10, Flight Services

• JO 7210.3, Facility Operations and Administration

• JO 7400.2, Procedures for Handling Airspace Matters

• JO 7400.8, Special Use Airspace

• Technical Operations
  – 6000.15, General Maintenance Handbook for NAS Facilities

• Flight Standards
  – 8260.19, Flight Procedures and Airspace

• FAA Order 5010.4, Airport Safety Data Program

• 14 CFR Parts
  – 77, Safe, Efficient Use, and Preservation of the Navigable Airspace
  – 139, Certification of Airports
  – 157, Notice of Construction, Alteration, Activation and Deactivation of Airports
  – 171, Non-Federal Navigation Facilities

• Advisory Circular (AC) 150/5200–28, Notices to Airmen (NOTAMs) for Airport Operators

• AC 150/5200–30, Airport Field Condition Assessments and Winter Operations Safety

• AC 150/5300–18B, General Guidance and Specifications for Submission of Aeronautical Surveys to NGS: Field Data Collection and Geographic Information System (GIS) Standards

• ICAO Annex 15
Section 2. Scope

1–2–1. PURPOSE

Authorized personnel assigned to facilities that collect, originate, and/or disseminate NOTAMs must be familiar with the provisions of this order that pertain to their operational responsibilities.

a. The United States NOTAM Office (USNOF) is the authority ensuring NOTAM formats. To ensure NOTAMs are issued consistent with NOTAM policy, submitters must comply with USNOF personnel directions.

b. All NOTAMs will be processed, stored, and distributed by the NOTAM System (NS).

c. NOTAMs must have one of the following keywords as the first part of the text. A keyword is used to make it easier to sort and locate the specific data needed: RWY, TWY, APRON, AD, OBST, NAV, COM, SVC, AIRSPACE, ODP, SID, STAR, CHART, DATA, IAP, VFP, ROUTE, SPECIAL or SECURITY.

NOTE—
Examples of keywords (RWY, TWY, APRON, AD, OBST, NAV, COM, SVC) are shown in chapter 5; AIRSPACE in chapter 6; (IAP, ODP, SID, STAR, ROUTE, and SPECIAL) relating to instrument flight procedures in chapter 7.

1. RWY (Runway). Keyword used to describe a temporary change or hazard associated with landing and takeoff surfaces to include runway lighting, markings, signage, and other airport services or attributes associated with a specific runway.

2. TWY (Taxiway). Keyword used to describe a temporary change or hazard associated with a taxiway, taxiway lighting, markings, helipads, signage and other attributes associated with a specific taxiway.

3. APRON (Apron/Ramp). Keyword used to describe a temporary change or hazard associated with an apron, ramp, or taxilane, lighting, markings, helipad, signage and other attributes associated with a specific apron.

4. AD (Aerodrome). Keyword used to describe a temporary change or hazard or potential hazard on or within 5 statute miles of an airport, heliport, or maneuvering area that is not associated with a specific movement area surface. Such hazards may include, (but are not limited to), aerodrome closures, lighting not associated with a specific movement area surface, aerodrome services (fuel, customs, ARFF), helicopter platforms, wildlife hazards, and meteorological equipment (wind indicators) or services.

5. OBST (Obstructions). Keyword used to describe a temporary change or hazard caused by a moored balloon, kite, tower, crane, stack, obstruction, obstruction lighting outage, obstruction status, or telecommunication tower light outage.

6. NAV (Navigation Aids). Keyword used to describe a temporary change or hazard caused by the changes in the status of ground-based radio navigational aids and Global Navigation Satellite Systems (GNSS) (except for area navigation (RNAV) approach anomalies).

7. COM (Communications). Keyword used to describe a temporary change or hazard caused by communication outlet commissioning, decommissioning, outage, unavailability, and air-to-ground frequencies.

8. SVC (Services). Keyword used to describe a temporary change or hazard associated with change in service levels, such as operating hours, air traffic management services, or airport services.

9. AIRSPACE (Airspace). Keyword used to describe an airspace restriction or activity warning which impacts, restricts, or precludes use of airspace.

10. ODP (Obstacle Departure Procedure). Keyword used when a NOTAM applies to a textual or graphic obstacle departure procedure.

11. SID (Standard Instrument Departure). Keyword used when a NOTAM applies to a published standard instrument departure.
12. STAR (Standard Terminal Arrival). Keyword used when a NOTAM applies to a published standard terminal arrival.

13. CHART (Chart). Keyword used to describe a U.S. Government chart correction, followed by name of chart and word “CORRECT” that becomes effective before the next publication cycle.

14. DATA (Data). Keyword used to describe a temporary change or hazard associated with a data set change followed by the name of the data set to be changed; for example U.S. DOD DAFIF, DACS, or NFD.

15. IAP (Instrument Approach Procedure). Keyword used when a NOTAM applies to a published instrument approach procedure.

16. VFP (Visual Flight Procedure). Keyword used when a NOTAM applies to visual flight procedures such as Charted Visual Flight Procedure and RNAV Visual Flight Procedure.

17. ROUTE (Route). Keyword used to describe a temporary change or hazard or change associated with published ATS routes and related information.

18. SPECIAL (Special). Keyword used when a NOTAM applies to a special instrument flight procedure.

19. SECURITY (Security). Keyword used for Department of State advisories, Special Federal Aviation Regulations (SFARs), advisories of national emergency, national security actions, special security instructions, air defense identification zone (ADIZ) procedures.

NOTE—Keyword SECURITY is not used for NOTAMs that describe a defined restricted area or TFR. Such NOTAMs would use keyword AIRSPACE.

d. (U) – Unverified. (U) is used preceding a keyword as described in paragraph 5-1-2.

e. The United States Department of Defense (DOD) will append the keywords IAP, SPECIAL, ODP, SID, and STAR with “U. S. DOD” to indicate that a published procedure is for military use only (not for civil use). For example, STAR U. S. DOD, SID U. S. DOD, IAP U. S. DOD.

1–2–2. PROCEDURAL APPLICATIONS

Apply the procedures in this order except when other procedures are contained in a Letter of Agreement or other appropriate FAA documents, provided they only supplement this order and that any standards they specify are not less than those in this order. FAA Order JO 7210.3, Facility Operation and Administration, contains administrative procedures for developing and executing those letters and documents.

1–2–3. AVOIDANCE OF DUPLICATION

Before issuing a NOTAM on any NOTAM criteria data, check all appropriate charts and publications to assure the information does not duplicate the published data. Do not issue a NOTAM on information that duplicates published data unless a NOTAM is required by a Certificate of Waiver or Authorization from Title 14, Code of Federal Regulations (CFR) issued by the FAA.
Section 3. Accountable Organizations

1–3–1. AIR TRAFFIC ORGANIZATION (ATO)

a. All air traffic employees, regardless of position, must immediately report any situation or condition considered hazardous to flight to an air traffic facility for appropriate action.

*NOTE—*
Situations that present an immediate hazard should be reported to the air traffic control (ATC) facility most concerned. Other situations should be reported on a first priority basis to the flight service station or appropriate accountable organization.

b. Air traffic personnel must accept all aeronautical information regardless of source or subject matter, provided the occurrence is no more than three days in the future. Obtain the name, title (if appropriate), address, and telephone number of the person furnishing the information and forward all data to the appropriate FSS for NOTAM issuance, if appropriate.

*NOTE—*
Forwarding the NOTAM data to the tie-in FSS does not relieve the forwarding facility from the responsibility of coordinating the information with other affected ATC facilities.

c. The party that originates the NOTAM on behalf of the accountable organization is responsible for the accuracy, origination, and cancellation of the NOTAM. FSS personnel receiving NOTAM information that requires action by another FSS must forward the information to that FSS for appropriate action.

d. The certified source is responsible for the correct classification and format of the NOTAM and for ensuring that facilities affected by the NOTAM are aware of the new NOTAM.

e. FSS specialists are responsible for issuing NOTAMs that are not covered in any example in FAA Order JO 7930.2. If, after consulting with your management, a format cannot be determined, have management contact USNOF for assistance.

f. System Operations Services, Flight Services, has the responsibility to ensure that data submitted complies with the policies, criteria, and formats contained in this order. This responsibility is delegated to the Safety and Operations Policy Group.

g. Service Areas originate NOTAMs for certain FDC criteria, including Laser activities and Temporary Flight Restrictions that are issued by the USNOF through NS.

h. Mission Support Services, Aeronautical Information Services (AIS) is responsible for originating Flight Data Center (FDC) NOTAMs for revisions to standard instrument approach procedures (SIAP), air traffic service (ATS) routes, textual and graphic departure procedures (both ODPs and SIDs), and special instrument flight procedures. AIS may originate NOTAMs regarding navigational aid (NAV) restrictions in accordance with FAA Order 8200.1, United States Standard Flight Inspection Manual. AIS is responsible for:

1. Formulating Instrument Flight Procedures (IFP) and ATS route NOTAMs for procedures for which they have responsibility and forwarding them for transmittal.

2. Formulating FDC PERM NOTAMs used to correct aeronautical chart printing and compilation errors related to all U.S. Government aeronautical charting products and forwarding them for transmittal.

3. Designating an office to develop specific internal guidance for NOTAM preparation, quality control, transmittal, cancellation, and follow-up actions for FDC NOTAMs issued by AIS. This guidance must be developed in concert with the NFDC and the USNOF. As a minimum, the guidance must include the following:

   (a) Procedures to ensure that the airport manager at the affected location is notified whenever possible.

(b) Procedures to ensure all NOTAMs are reviewed for accuracy, completeness, content, etc. prior to submission.

c) Procedures to ensure the NFDC is provided information copy of all NOTAMs and cancellations.

d) Procedures to ensure non–FAA service providers are provided an information copy of all NOTAMs and cancellations at those locations non–FAA service providers are allowed. This will ensure non–FAA service providers are aware of the condition requiring the NOTAM.

4. The NFDC is responsible for ensuring a hard/electronic copy of each PERM NOTAM is stored with the current amendment and maintained in the procedures archive file.

  i. Mission Support Services, Airspace Services, is responsible for the development of policy guidance regarding standard terminal arrival routes (STAR). STAR NOTAMs are originated by the Air Route Traffic Control Center (ARTCC) (See paragraph 7-1-4f).

  j. USNOF executes the operational compliance function. When operational personnel of the USNOF determine that NOTAM information submitted is not in compliance with the criteria or procedures as prescribed, they must call this to the attention of the transmitting party. USNOF will forward unresolved issues to the Flight Services Program Operations for clarification and further action. The USNOF is responsible for operating the NOTAM system. USNOF originates NOTAMs, as needed. (See paragraph 4-1-2, National NOTAM Office Relationships for more detail)

NOTE-
NOTAM office phone numbers: (888) 876-6826; (540) 422-4262. FAX number is (540) 422-4298.

1–3–2. TECHNICAL OPERATIONS

a. Operations Control Center (OCC) and Service Operations Center (SOC).

The Technical Operations Services, Operations Center manager, or representative, is responsible for:

  1. Originating and canceling NOTAM information for shutdown, restoration, or any condition that affects the operations of NAVAIDs, frequencies, or other electronic aids that affect safety of flight. This includes forwarding data of programmed changes in the NAS, such as frequency changes, commissioning/decommissioning, etc.

  2. Coordinating with appropriate air traffic facilities prior to shutdown or changes that affect safety of flight.

  3. When possible, approval should be obtained sufficiently in advance of the proposed shutdown time to allow dissemination of a NOTAM at least 5 hours before a shutdown will occur. A routine maintenance shutdown request must not be denied because of an inability to issue a NOTAM 5 hours in advance of the shutdown.

b. Flight Inspection Services

Flight Inspection Services under FAA Order 8200.1, United States Standard Flight Inspection Manual, initiate NOTAMs regarding radio and lighting NAVAID restrictions. Facility classification based on flight inspection results is the responsibility of the flight inspector.

REFERENCE–
FAA Order 5010.4, Airport Safety Data Program, and 14 CFR Parts 139 and 157

1–3–3. FLIGHT STANDARDS SERVICE

a. Flight Technologies and Procedures Division, AFS–400, is responsible for development of policy guidance and procedures for the origination, tracking, and cancellation of NOTAMs relating to instrument flight procedures. This policy applies to the following: SIAPs, ATS routes, textual and graphic ODPs, SIDs, and special instrument flight procedures (see paragraph 1–3–1 for procedures addressing STAR NOTAMs). AFS–400 is responsible for oversight of non–FAA service providers authorized to maintain SIAP and/or special instrument flight procedures. Maintenance includes issuance of FDC NOTAMs.
b. Flight Procedure Implementation & Oversight Branch, AFS-460, is responsible for coordinating non–FAA service provider NOTAM authority and access to the FAA NOTAM system with ATO Mission Support Services, Aeronautical Information Services. The branch is also responsible for ensuring that specific guidance for NOTAM preparation, quality control, transmittal, cancellation, and follow-up actions are developed for NOTAMs applicable to public and Special IFPs developed by non–FAA service provider and not under the purview of AIS. As a minimum, the guidance must ensure the non–FAA service provider NOTAM originators include the following:

1. Procedures to ensure that all affected ARTCC facilities are provided notification of NOTAMs at the time of submission. The NOTAM issuing authority must also attempt to notify the airport manager at the affected location whenever possible.

2. Procedures to ensure all NOTAMs are reviewed for accuracy, completeness, content, etc. prior to submission.

3. Procedures to ensure the NFDC is provided an information copy of all NOTAMs and cancellations.

4. Procedures to ensure that AIS is aware of those locations where non–FAA service provider procedure development is allowed.

5. Procedures to ensure that AIS is provided an information copy of all NOTAMs and cancellations issued by other non–FAA service providers. This will ensure FAA procedure developers are aware of the condition requiring the NOTAM.

c. AFS-460 serves as the approval authority for requests that temporary NOTAMs be allowed to extend beyond the 224-day timeframe.

1–3–4. OFFICE OF AIRPORT SAFETY AND STANDARDS

Though not an accountable organization, the Office of Airport Safety and Standards is responsible for enforcing the airport management responsibilities as outlined in the Code of Federal Regulations. (CFR).

1–3–5. AIRPORT MANAGEMENT

Specific airport management responsibilities are outlined in 14 CFR Parts 139 and 157. Airport managers are required to abide by applicable provisions of these and pertinent regulations regardless of application of any procedure in this order.

1–3–6. NON–FEDERAL FACILITIES

a. NOTAMs on non–Federal facilities covered by FAAO 6700.20, *Non–Federal Navigation Aids, Air Traffic Control Facilities, and Automated Weather Systems* are distributed through the FAA NOTAM system.

REFERENCE–
14 CFR Part 171 outlines owner/operation responsibilities.

b. NOTAMs on non–Federal facilities that are not part of the NAS are not distributed in the FAA NOTAM system. FSSs receiving data on these facilities must notify Aeronautical Information Services.

1–3–7. DEPARTMENT OF DEFENSE AIRFIELD MANAGEMENT

Specific military airport management responsibilities are outlined in Air Force Instruction Interservice Publication 11–208/AR 95–10/OPNAVINST 3721.20, DoD Notice to Airmen (NOTAM) System.
Section 4. Terms of Reference

1–4–1. WORD USE IN THIS ORDER

As used in this order:

a. “Must” means a procedure is mandatory.
b. “Should” means a procedure is recommended.
c. “May” or “need not” means a procedure is optional.
d. “Must not” means a procedure is prohibited.
e. Singular words include the plural.
f. Plural words include the singular.
g. Miles means nautical miles unless otherwise stated.
h. Feet means mean sea level unless otherwise stated.
i. Time is shown in Universal Coordinated Time (UTC) unless otherwise stated, as in the body of Temporary Flight Restrictions.

1–4–2. NOTES

Statements of fact of an introductory or explanatory nature and relating to the use of directive material have been identified and worded as NOTE.

1–4–3. EXAMPLES

An illustration which serves to explain subject material is identified as an EXAMPLE which represents the format discussed in each section and is used as an aid to support policy. Not all components of the NAS will be illustrated with an example. The examples throughout Appendix A contain the keyword and the subject of the NOTAM. All other data is assumed from the NOTAM sentence structure and are eliminated from examples.

1–4–4. REFERENCES

When another paragraph of this order is referenced in the text, the referenced paragraph number will be printed out in full. When a paragraph is referenced in a Reference subparagraph, the referenced paragraph’s title, followed by its number, will be printed in regular type. When other documents and directives are referenced in a Reference subparagraph, the document/directive and the paragraph number will be printed in regular type. All references to other FAA orders reflect the current edition of the order.

1–4–5. MANUAL CHANGES

When revised, reprinted, or additional pages are issued, they will be marked as follows:

a. Each revised or additional page will show the change number and effective date of the change.
b. Vertical lines in the margin of the text will mark the location of substantive procedural, operational, or policy changes; that is, when material which affects the performance of duty is added, revised, or deleted.

1–4–6. DEFINITIONS

The terms below as used in this order are defined in this section.
a. **Accountable Organization.** The accountable organization is responsible for accurately reporting the condition considered to be a hazard or potential hazard to flight operations. Reporting the condition must be accomplished by ensuring that procedures are developed to establish NOTAM origination and coordination responsibilities.

b. **Accountability Location.** This is the location identifier of the location in the NOTAM computer that keeps track of the NOTAM numbering.

c. **Aeronautical Information.** Any information concerning the establishment, condition, or change in any component (facility, service, or procedure of, or hazard) of the NAS. This information is published and/or disseminated by means of aeronautical charts, publications, and/or NOTAMs.

d. **Airport Operating Certificate.** A certificate issued by the FAA, pursuant to 14 CFR Part 139, to airports serving or expected to serve scheduled air carrier operations in aircraft with a seating capacity of more than thirty passengers. These airports are maintained and operated in accordance with an Airport Certification Manual (ACM) prepared by airport management and approved by the FAA.

e. **Certified Airport.** An airport certificated under 14 CFR Part 139. These airports are so indicated in the airport/facility directory.

f. **Certified Source.** The party who enters/submits a NOTAM to the NOTAM System (NS) using an approved direct entry tool or interface.

g. **Distribution.** Forwarding of NOTAM information from the NS to NADIN.

h. **Fix/Radial/Distance (F/R/D).** Is a VOR identifier followed by 3-digit degrees magnetic and minimum of a 3-digit distance in nautical miles with no spaces between characters (AML360020.1 would be 360-degree radial, 20.1NM from AML VOR/DME).

i. **Flight Data Center (FDC) NOTAM.** The classification of NOTAMs containing flight information that is normally regulatory in nature including, but not limited to, changes to IFR charts, procedures, and airspace usage. FDC NOTAM numbers are assigned consecutively by the NS, beginning with 0001 each year. The year of issuance and the serial number are separated by a forward slash; for example, 5/1323.

j. **International NOTAM.** The classification of NOTAMs received from other counties and stored in the NS. These NOTAMs are numbered consecutively by accountability, location, and series beginning with S0001 each year, where S stands for a generic series a country may have. The NOTAM number and year of issuance are separated by a forward slash; for example, S0211/15, S0002/15.

k. **Location Identifier.** Used to designate an affected airport, air route traffic control center (ARTCC), or facility.

l. **Military NOTAM.** The classification of NOTAMs issued by the U.S. Air Force, Army, Marine Corps, Navy, and Coast Guard against navigational aids and airports. Military units issue NOTAMs pertaining to their bases and airspace based on the guidelines set forth in Air Force Instruction Interservice Publication 11–208/AR 95–10/OPNAVINST 3721.20, DoD Notice to Airmen (NOTAM) System. These NOTAMs are numbered consecutively by accountability, location, and series beginning with S0001 each year, where S stands for a generic series the military may have. The NOTAM number and year of issuance are separated by a forward slash; for example, S0211/15, S0002/15.

m. **Movement Area.** The term Movement Area as used for the purpose of NOTAMs, include Runways, Taxiways, Ramps, Aprons, helipads, heliports and maneuvering areas.

n. **NAVAID.** Any visual or electronic device airborne or on the surface which provides point-to-point guidance information or position data to aircraft in flight.

o. **NOTAM D.** The classification of NOTAMs containing information concerning the establishment, condition, or change in any aeronautical facility, en route navigational aids, services, procedures, hazards and civil public-use airports listed in the AFD. NOTAM Ds are numbered consecutively each month by the NS.
starting with 001 for each accountability, for example: DAY 01/001 would be the first NOTAM in the month of January for Dayton Accountable Location.

p. NOTAM Originator. The party (airport, Tech Ops, AIS/Service Provider, FSS, etc.) who submits a NOTAM to the NS using an approved interface and is accountable for the NOTAM coordination.

q. NOTAM System. A safety–critical system that collects, maintains and distributes NOTAMs for the aviation community.

r. Out of Service. When a piece of equipment, a NAVAID, a facility or a service is not operational, certified (if required) and immediately “available” for air traffic or public use. Used on facilities in which the FAA maintains the equipment.

s. Pointer NOTAM. NOTAM D issued to point to additional aeronautical information. The keyword in the pointer NOTAM must match the keyword in the original NOTAM. For example, a pointer NOTAM at a specific airport is used to highlight or “point out” an FDC NOTAM.

t. Prior Permission Required (PPR) means prior permission required to have full operational use of a runway, taxiway, apron, or airport facility/service. Means of communication to the airport can be telephone and/or radio.

u. Radio Navigation Aid. As used in this policy, the word radio is added further describe those navigation aids such as ILS, LOC, VOR or other NAVAID that is used in assisting the pilot with approaches, departures, and enroute operations.

1. Alaska. This chart supplement is a joint civil-military flight information publication designed for use with other flight information publications, en route charts, Alaska Terminal publication, USAF TACAN charts covering Alaska and portions of southwestern and northwestern Canada, World Aeronautical Charts, and sectional aeronautical charts. The Supplement contains an airport/facility directory of all airports (including certificated (14 CFR Part 139) airports shown on en route charts and those required by appropriate agencies), communications data, navigational facilities, special notices, and procedures applicable to the area of chart coverage.

2. Pacific. This chart supplement is a civil flight information publication, designed for use with flight information publications, en route charts and the sectional aeronautical chart covering the State of Hawaii and that area of Pacific served by U.S. facilities. The Supplement contains an airport/facility directory of all airports (including certificated (14 CFR Part 139) airports open to the public and those requested by appropriate agencies), communications data, navigational facilities, special notices and procedures applicable to the Pacific area.

3. U.S. The chart supplement (formerly known as Airport/Facility Directory) for the contiguous United States.

w. Taxilanes. Designed for low speed and precise taxiing. Taxilanes usually provide access (to and) from taxiways (usually an apron taxiway) to (and from) aircraft parking positions and other terminal areas.

x. Tie-In Station. A flight service station designated to provide prescribed services for civil, military, national and international facilities; for example, NOTAM purposes and flight information messages.

y. Unusable. The NAVAID is not available for operational use because it does not meet flight inspection requirements (may provide potentially unsafe or erroneous signals, or signals of unknown quality).

z. Virgule (/). For US NOTAM purposes - a diagonal symbol used to separate similar alternatives.

aa. Visual Navigation Aid. As used in this policy, the word visual is added to further describe those navigation aids such as PAPI, ALS, VASI, etc., or any other lighting aid that is used in assisting the pilot with approaches or departures.
ab. WMSR – Weather Message Switching Center Replacement is one of the FAA’s gateway for the receipt and distribution of weather within the National Airspace System (NAS).
Chapter 2. Aeronautical Information Services

Section 1. Aeronautical Information System

2–1–1. GENERAL

The system for disseminating aeronautical information is made up of two subsystems, the Aeronautical Information System (AIS) and the NOTAM System. The AIS consists of charts and publications. The NOTAM system is discussed in later paragraphs.

2–1–2. DISSEMINATION OF AIRMEN INFORMATION

Airmen information is disseminated by the following methods:

a. Aeronautical charts depicting permanent baseline data:
   
   1. IFR Charts:
      
      (a) Enroute High Altitude Conterminous U.S.
      
      (b) Enroute Low Altitude Conterminous U.S.
      
      (c) Alaska Charts.
      
      (d) Pacific Charts.
   
   2. U.S. Terminal Procedures:
      
      (a) Departure Procedures
      
      (b) Standard Terminal Arrivals (STARs).
      
      (c) Standard Instrument Approach Procedures (SIAPs).
   
   3. VFR Charts:
      
      (a) Sectional Aeronautical Charts.
      
      (b) Terminal Area Charts
      
      (c) World Aeronautical Charts

b. Flight information publications outlining baseline data:

   1. Notices to Airmen Publication (NTAP).
   
   2. U.S. Chart Supplement
   
   
   
   5. Alaska Terminal.
   

2–1–3. PUBLICATION CRITERIA

The following conditions or categories of information should be forwarded to the National Flight Data Center (NFDC) for inclusion in the flight information publications and charts. Time critical delays, corrections, or changes to previously published data that cannot be republished before occurrence must be issued as a NOTAM, providing they meet the criteria set forth in this order.
a. **NAVAIDs.** Commissioning, decommissioning, restrictions, frequency changes, changes in monitoring status and monitoring facility used in the National Airspace System (NAS). NAVAID outage NOTAMs must remain active until the NAVAID is returned to service or decommissioned.

b. Commissioning, decommissioning, changes in hours of operation of FAA air traffic control facilities.

c. **Surface areas/airspace.** Changes in hours of operations.

e. **Weather reporting stations.** Commissioning, decommissioning, failure, nonavailability or unreliable operations.

g. **Airport Rescue Fire Fighting (ARFF) capability.** Restrictions to air carrier operations.

h. Changes to runway identifiers, dimensions, threshold placements, and surface compositions.

i. **NAS lighting systems.** Commissioning, decommissioning, outages, change in classification or operation.

### 2−1−4. NOTICES TO AIRMEN PUBLICATION

NTAP is published by Mission Support Services, Standards and Procedures Support, every 28 days. See Appendix D for further information.

### 2−1−5. CHART/PUBLICATION ERRORS OR OMISSIONS

a. Managers must review each edition of the Notices to Airmen Publication, the Airport/Facility directory, and other publications and charts to ensure that all required data is included and correct. Inform NFDC promptly of errors or omissions in any publication or chart. Notification of errors in the NTAP parts three and four should be sent to ATC Products and Publications.

b. Managers must review all current NOTAMs issued by their facility on a quarterly basis for currency.

c. When NOTAMs are published, or more than 30 days old, contact the accountable organization for possible cancellation.

### 2−1−6. FORWARDING DATA

a. When notice is received of a temporary condition which is expected to be corrected before information can be published, issue a NOTAM if it meets criteria.

b. NOTAM or aeronautical information concerning an extended (more than 30 days) shutdown or closure affecting components of the NAS must be forwarded in advance of the occurrence to the NFDC. NFDC must publish data received in accordance with existing policies, criteria, and publication cutoff deadlines. The schedule of publication cutoff dates is contained in the AFD.

c. When time does not permit notification to NFDC by mail, forward the data via administrative message, FAX, or contact the appropriate NFDC section by telephone during administrative hours.

d. Information received by NFDC for publication that meets publication criteria and will be current on the effective date of the next available AFD publication or aeronautical chart will be published.

### 2−1−7. ADDRESSING CORRESPONDENCE

Federal Aviation Administration  
Aeronautical Information Services  
1575 I Street, NW. Room 9404  
Washington, D.C. 20005
2–1–8. NFDC ORGANIZATION

The NFDC is divided into the following sections. Refer questions and data to: Toll Free: (866) 295–8236 or website: https://nfdc.faa.gov.

a. Airports and NAVAIDs
b. Procedures and Airspace

2–1–9. THE NATIONAL FLIGHT DATA DIGEST (NFDD)

The NFDD is used to transmit data from NFDC to chart and publication producers. It may be used to update records. However, it must not be used as a basis to cancel NOTAMs.

2–1–10. COMPUTER PRINTOUTS

Computer printouts listing all navigational aids and public use civil landing areas by flight plan area may be obtained from Aeronautical Information Services.
Chapter 3. General Operating Procedures

Section 1. General

3–1–1. NOTAM RESPONSIBILITIES

   a. The party that enters the NOTAM data is responsible for classifying, formatting, canceling, and informing the controlling facility and other facilities/offices affected by the aid, service, or hazard contained in the new NOTAM. Flight Service Stations are exempt from the requirement to inform the controlling facility when an alternate means of coordination is approved by the Flight Service Safety and Operations Group, AJR-B1 or coordination responsibilities have been spelled out in waivers and authorizations in order for the activity to take place.

   b. Any office which receives information is responsible for the accuracy, currency, and validity of the NOTAM. When an office receives information that is outside their area of responsibility, they will inform the accountable organization.

   c. FSSs must accept all aeronautical information. Information obtained from other than authorized personnel must be confirmed before issuance. NOTAM data received from state inspectors or state contracted inspectors must be confirmed by airport managers or appropriate authority before issuance of NOTAMs except in case of data that presents an immediate hazard to aircraft operations. If a NOTAM is issued without confirmation, advise the airport manager as soon as possible. In case of conflict between airport management and the named state airport inspector, contact FAA regional airports personnel for resolution. Conditions requiring a NOTAM should be coordinated with the appropriate air traffic facilities.

   d. A Domestic NOTAM will auto reject if it is over 20 lines. Ensure the NOTAM meets Aeronautical Fixed Telecommunication Network capability prior to originating NOTAM.

   e. When a NOTAM is rejected, it is not distributed. It will not be stored in the NOTAM master file, and it will not be available by request–reply. Error messages are not stored in the master file.

   f. ARTCCs are responsible for forwarding FDC and special activity airspace (SAA) NOTAM information to the affected terminal facilities.

REFERENCE--
FAA Order JO 7930.2, Para 5–1–2, Handling Reported Aerodrome Conditions

3–1–2. FDC PRESIDENTIAL, SPECIAL SECURITY INSTRUCTIONS, OR EMERGENCY AIR TRAFFIC RULES TFRs

See appendix D for further information.

   a. The NS must send NOTAMs referencing Title 14 CFR, Part 91, Section 139, Emergency Air Traffic Rules; Section 141, Flight Restrictions in the Proximity of the Presidential and Other Parties; Part 99, Section 7, Special Security Instructions; and any revisions, modifications, or cancellations, directly to all flight service stations via NADIN using the flight service group address of “KXXXAFSS.”
Section 2. Coordination

3–2–1. COORDINATION WITH OTHER FACILITIES
When a shutdown or an outage/closure of a component of the NAS will affect another facility’s operation, the facility serving as the approval/controlling authority must coordinate with other facilities concerned.

3–2–2. FILING NOTAM INFORMATION WITH FSSs
NOTAM information should not be filed with an FSS (1-877-4-US-NTMS) prior to 3 days before the expected condition is to occur. A NOTAM must be transmitted as soon as practical but not more than 3 days before the expected condition is to occur.
Section 3. Use of Terms

3–3–1. USE OF CONTRACTIONS AND ABBREVIATIONS

a. Contractions and abbreviations designated for ICAO usage as specified in FAA Order JO 7340.2, Contractions, must be used in the NOTAM system.

1. Even though SER is an ICAO contraction, SERVICE must always be spelled out, not to confuse with SVC, services keyword.

2. When an ICAO-usage contraction is not available, plain text is required, except for the list of differences in Appendix C.

b. For indicating abbreviated days of the week, use a hyphen to indicate successive days or each day can be specified individually separated by a single space; for example, MON-FRI means Monday through Friday, whereas MON WED FRI means Monday, Wednesday, and Friday.

c. Use the Pilot/Controller Glossary to define terms in the NOTAM system.

d. Location identifiers used in the NOTAM system are those contained in FAA Order JO 7350.9, Location Identifiers.

e. Use applicable contractions and abbreviations published on instrument flight procedure charts in the text of FDC NOTAMs relating to approach and departure procedures.

f. Contractions written in the singular form decode to mean both the singular and plural.

3–3–2. EXPRESSION OF TIME IN THE NOTAM SYSTEM

a. The day begins at 0000 and ends at 2359.

b. Times used in the NOTAM system are Coordinated Universal Time (UTC/Zulu) unless otherwise stated, and must be stated in 10 digits for the year, month, day, hour, and minute (YYMMDDHHMM).

c. When describing a daily schedule allow Sunrise–Sunset (SR–SS).

Examples –
MON-FRI
SR-SS
DLY SS-SR
DLY SR-1800
TUE 2300-SR

3–3–3. UNITS OF MEASUREMENT

Specify the unit of measurement in distance, height, altitude, or weight. When using an abbreviation, do not add a space between the measurement and the unit of measurement. At a minimum, latitude must be 6 digits and longitude must be 7 digits.

Examples –
500FT
12500LB
5NM
20MIN
1HR
330DEG
402646N0795856W
402646.25N0795856.95W
3–3–4. USE OF VIRGULE (/)

The use of virgules should be limited to separate runway pairs (RWY 03/21), combining positions and affected frequencies (LOCAL CTL/CD), and equipment, affected components and frequencies (ILS GP/OM/MM, VOR/DME 111.0/CH77).

3–3–5. RUNWAY IDENTIFICATION

a. Specify the runway identification as it is published, including the leading zero (0).

b. List the runway identifications in clockwise order beginning from the 1 o’clock position.

c. Use runway pair when applicable.

d. Identify runways with the prefix RWY followed by magnetic bearing indicator.

EXAMPLE–

RWY 03/21
RWY 03
RWY 21

e. Differentiate parallel runways by using the runway designators. Use R, L, and C only with runway descriptions, as in 25R, 05C, 35L. In other cases, spell out Right, Center and Left.

EXAMPLE–

RWY 03L
RWY 03C
RWY 03R

f. Where the magnetic bearing indicator has not been established, identify the runway to the nearest eight points of the compass.

EXAMPLES–

…RWY NE/SW…

3–3–6. TAXIWAY IDENTIFICATION

a. Identify taxiways with the prefix TWY followed with the taxiway designator letter or letter/number as assigned.

1. Describe a taxiway that does not have an assigned designator as adjacent to a runway or direction from runway.

EXAMPLE–

…TWY PARL TWY ADJ RWY 09/27…

…TWY PARL TWY…

2. When a cardinal direction is used to describe a taxiway condition, the word describing the direction must be spelled out in full to ensure that the cardinal direction is not mistaken for a taxiway designator; for example, “EAST,” “WEST,” “SOUTHWEST.”

3. Describe a helipad located on a taxiway as:

…TWY C HELIPAD 3…

b. Keyword TWY may be followed by designator “ALL” to indicate every taxiway at an airport, even if there is only one taxiway as: (Can be used as “TWY ALL EXC TWY X” if needed.)

…TWY ALL…

c. For multiple taxiways, each taxiway need not be prefaced with contraction TWY;

1. Taxiway segments must be separated from each taxiway or taxiway segment with a comma and preceded by contraction TWY followed by the taxiway designator. The use of “BTN” and “AND” signifies a segment,
such as **TWY B BTN TWY B10 AND TWY B8**. A hyphen used in a TWY NOTAM indicates all taxiways between the first and last descriptors.

**EXAMPLE**–

...TWY B3,C...

...TWY A1-A6...

**NOTE**–

The example includes taxiways A1, A3, A5 and A6.

2. Multiple segments separated by commas share the same condition for example: CLSD or WIP (work in progress) SN REMOVAL.

**EXAMPLE**–

...TWY B1, B2, F, TWY B BTN TWY B10 AND TWY B8 WIP...

...TWY C BTN APCH END RWY 04R AND 350FT SOUTH APCH END RWY 04L CLSD...

**NOTE**–

The originator may originate multiple NOTAMs to ensure clarity.

### 3–3–7. APRON IDENTIFICATION

a. Identify aprons with the prefix APRON followed with the apron designator. There is no requirement for RAMP or APRON to be part of the name of the surface. Keyword may be followed by designator “ALL” to indicate every taxiway at an airport, even if there is only one taxiway as: (Can be used as “APRON ALL EXC WEST APN ” if needed.)

**EXAMPLES**–

...APRON TERMINAL APN... (Where the name is Terminal Apron)

...APRON MAIN TAXILANE C ... (Where the name is Main)

...APRON ALL...

**NOTE**–

“ALL” is used to describe every APRON at an airport OR can be used for an airport with a single APRON.

...APRON MAIN RAMP HELIPAD A1 … (Where the name of the apron is Main)

**NOTE**–

This example describes a helipad that resides on the Main Ramp.

b. SPOTS, GATES, HARDSTANDS, etc., can be used as geographical reference points to delineate a section on aprons or taxiways, but do not meet NOTAM criteria as its own “attribute”.

**EXAMPLE**–

...APRON TERMINAL RAMP BTN GATE 3 AND SPOT 4...

### 3–3–8. STANDARD NOTAM PHRASES

The following are a listing (not inclusive) of standard terms used in NOTAMs.

<table>
<thead>
<tr>
<th>UNL (unlimited)</th>
<th>TO POINT OF ORIGIN</th>
<th>OBSC (obscured)</th>
<th>UNREL (unreliable)</th>
</tr>
</thead>
<tbody>
<tr>
<td>AVBL or NOT AVBL</td>
<td>CENTERED AT</td>
<td>UNSUSABLE</td>
<td>CLSD</td>
</tr>
<tr>
<td>IRREGULAR SFC (lips, dips, bumps, holes, ruts, breaks, etc.)</td>
<td>NOW (temporary)</td>
<td>CHANGED TO (permanent)</td>
<td>UNSAFE</td>
</tr>
<tr>
<td>TO</td>
<td>EXC</td>
<td>NEAR</td>
<td>BTN and AND</td>
</tr>
<tr>
<td>PLUS SEE...</td>
<td>NOT STD</td>
<td>NOT LGTD</td>
<td>FLAGGED</td>
</tr>
<tr>
<td>FOR/AT (RWY)</td>
<td>WI AN AREA DEFINED AS</td>
<td>LGTD</td>
<td>USABLE (Used in conjunction with a restriction; not by itself)</td>
</tr>
</tbody>
</table>
### 3–3–9. CARDINAL DIRECTIONS

Cardinal directions (excluding TAXIWAY usage) is in abbreviation format. This includes N, NNE, NE, ENE, E, ESE, SE, SSE, S, SSW, SW, WSW, W, WNW, NW, and NNW. Also included are directions for high altitude balloons – northbound – NB, northeast bound – NEB; eastbound – EB; southeast bound – SEB; southbound – SB, southwest bound – SWB; westbound – WB; northwest bound – NWB.
Chapter 4. NOTAM D Procedures

Section 1. General

4–1–1. NATIONAL NOTAM OFFICE RELATIONSHIPS

a. The USNOF is charged with monitoring the NS. The USNOF must monitor the NOTAM system for compliance with the criteria and procedures set forth in this order. When questions arise on NOTAM dissemination, formats, contractions, or other aspects of the distribution system, the USNOF should be consulted. The authority for NOTAM formats is the USNOF, who will ensure that issued NOTAMs are consistent with FAA policy. NOTAM originators and certified sources must comply with USNOF personnel guidance. Discrepancies in procedures or format must be recorded, and Aeronautical Information Services must forward a list of the discrepancies to Flight Services, Safety and Operations Support, Operational Procedures, and the service area office.

b. Editing:

1. The USNOF may edit any NOTAM (except FDC NOTAMs relating to instrument flight procedures) that does not conform to the formats and/or examples contained in this order. The contents of a NOTAM must not be changed without notifying the originating facility.

NOTE—

FDC NOTAMS relating to instrument approach and departure procedures are originated by the Mission Support Services – Aeronautical Products Office under the Flight Standards Service policy contained in FAA Order 8260.19, chapter 2, section 6. ARTCCs must ensure the origination of NOTAMs pertaining to a Standard Terminal Arrival (STAR).

2. Should the USNOF edit a NOTAM and change the intent, the NOTAM must be canceled by the issuing facility and reissued as a new NOTAM, after consultation with the USNOF.
Section 2. Preparing NOTAMs for Dissemination

4–2–1. NOTAM COMPOSITION

NOTE—
For FDC NOTAM examples, see Appendix A.

FIG 4–2–1
NOTAM Diagram

Where the solid lines indicate mandatory and the dashed lines indicate as needed or optional.

a. The purpose of the NOTAM diagram is to provide a basic outline of what constitutes a NOTAM. Not all NOTAMs will contain all of the elements. For detailed explanation, consult the applicable paragraph sections for further NOTAM composition assistance.

b. NOTAMs may contain these elements from left to right in the following order:

1. An ADP code/exclamation point (!).
2. Accountability (the identifier of the accountability location; for example, JFK, FDC, CARF).
3. Location identifier {the affected facility or location (airport, NAVAID, or ARTCC) appears AFTER the NOTAM number}. Approach controls or airspace located within multiple ARTCC must have a separate NOTAM for each ARTCC.
   (a) The nearest public use airport when the full activity is completely within a 5NM Radius of the airport.
   (b) The nearest VOR when any of the activity is more than 5NM from the nearest public use airport but completely within 25NM Radius of a VOR
   (c) When the activity doesn’t fall within either (a) or (b), use the ARTCC.
5. Attribute, activity, or surface designator(s) (when needed).

NOTE—
A surface designator is required with keywords RWY, TWY, and APRON.

6. Surface segment (when needed).
7. Facility, feature, service, system, and/or components thereof (when needed).
8. Location description (when needed).
9. Lower limit then upper limit, or height, (when needed). Limits must be specified, as:
For SFC, or 1 to 17,999FT with the unit of measurement (AGL or MSL). 50FT, 1275FT AGL, 10500FT.

For 18,000FT and above, express in flight levels (FL), FL180, FL550, FL850, or UNL (altitudes greater than 99,900FT).

Heights AGL may be added when required or when MSL is not known, for example, SFC-450FT AGL.

The term UNKNOWN may be used in lieu of the MSL or AGL altitudes if not known; however, one altitude must be identified.

10. Condition. The changed condition or status being reported, when needed. When the conditions includes a limitation or an exception, follow the condition with “TO” or “EXC”; such as, “CLSD EXC SKI” or “CLSD TO TRANSIENT” or “CLSD EXC TAX BTN APCH END RWY 10 AND TWY C.”

11. Reason (when needed).

12. Remarks (when needed). Other information considered important; for instance a frequency (134.72), or an expected altitude for unmanned free balloons (NEB 150000FT)

13. Schedule, (when needed). A NOTAM may be originated for a scheduled condition/activity that will occur during the period. Specify the schedule between the condition/activity and the valid time string. The days of the week must be specified before the scheduled time. The term “DLY” (daily) indicates the event will occur each day at the same time during the stated period time. The start time of the schedule must correspond to the start of activity time. The end of the last schedule must correspond to the end of validity time. For example : DLY 1200-2000 YYMMDD1200-YYMMDD2000,
MON WED 0900-1300 YYMMDD0900-YYMMDD1300,

If the active time of a NOTAM corresponds to sunrise or sunset, the actual times of sunrise on the first day of validity and of sunset on the last day of validity should be used.

14. Start of Activity/End of Validity. This is a 10-digit date-time group (YYMMDDHHMM) used to indicate the time at which the NOTAM comes into force (the date/time a condition will exist or begin) and the time at which the NOTAM ceases to be in force and becomes invalid (the expected return to service, return to normal status time, or the time the activity will end). These times must be separated by a hyphen “-”.

(a) If the NOTAM duration is expected to return to service prior to the End of Validity time, express the time by using a date-time group followed immediately by “EST” (estimate). Any NOTAM that includes an “EST” must be canceled or replaced before the NOTAM reaches its End of Validity time. If the NOTAM is not canceled or replaced, it will expire at the end of validity time regardless of EST. FDC NOTAMs relating to instrument flight procedures must not be canceled and reissued. (Reference FAA Order 8260.19, Chapter 2, Section 6.)

(b) When a NOTAM is originated to advertise a permanent condition that will be published in a publication, chart or database “PERM” should be inserted as the expiration date in lieu of a 10-digit date–time group. PERM is also used as the end of validity for certain NOTAMs that 1) pertain to or support national security, law enforcement, and aviation security requirements, and 2) contain flight prohibitions for U.S. operators and U.S. airmen regarding operations in particular areas of non–U.S. controlled airspace due to weapons related hazards or other hostile threats to civil aviation. The NOTAM originator is responsible for canceling the NOTAM upon publication, as PERM will not auto–expire.

(c) All NOTAMs will auto-cancel at their End of Validity time, except PERM.

15. c. NOTAMs issued when the condition of a number of facilities, NAVAIDs, services, or landing areas/runways are related to the same event (for example, date/time, facility closing, part–timing, runway closures, etc.) must be issued as separate NOTAMs.

15. d. Each NOTAM concerning a specific aid, service, or hazard must be a complete report including all deviations unless reference is made to other restrictions already published.

Preparing NOTAMs for Dissemination
e. If information is published elsewhere and is still valid, reference must be made to that publication with the statement, “PLUS SEE (publication).” A NOTAM issued not stating “PLUS SEE (publication)” indicates the NOTAM replaces previously published similar data.

f. NOTAMs must state the abnormal status of a component of the NAS and not the normal status. Exception – Temporarily extending hours of use beyond published times, for example: RWY 09/27 OPN.

4–2–2. NOTAM ACCOUNTABILITY

Maintain separate accountability (NOTAM file) for each location whose weather report is disseminated via WMSCR and for the location of the tie-in FSS.

a. Issue NOTAMs for an FAA-monitored weather reporting location whose report is disseminated via WMSCR under the location identifier of the weather report.

b. Issue all other NOTAMs under the location identifier of the tie-in FSS. This includes NOTAMs for weather reporting locations whose report is not disseminated via WMSCR.

REFERENCE –
FAA Order JO 7930.2, Chapter 2, Aeronautical Information Services

c. Make NOTAM accountability changes by mail, email or other electronic means when known sufficiently in advance. Issue all subsequent NOTAMs under the corrected accountability. If there are any current NOTAMs for the location, cancel and reissue those NOTAMs under the new accountability after the NS tables have been changed. Notify Aeronautical Information Services of any NOTAM accountability changes.
Section 3. Canceling/Extending NOTAMs

4–3–1. EXTENDING NOTAM VALIDITY

a. When there is a need to extend an existing NOTAM time validity, cancel the original NOTAM, and reissue the data as a new NOTAM with the new time.

4–3–2. CANCELLATION OF NOTAMs

a. Stations canceling NOTAMs must check the NOTAM data to ensure the NOTAM’s deletion. Retransmit cancellations where no action was taken.

b. Cancel NOTAMs containing erroneous information, and reissue. Originate a new NOTAM when data is received amending a current NOTAM, and cancel the previous NOTAM.

4–3–3. CANCELING PUBLISHED NOTAM DATA

a. When data appearing in a NOTAM is printed correctly in a publication or on a chart, cancel the NOTAM.

b. NOTAMs must remain current until the data is published in one or more of the following, with the exception of NAVAID NOTAMs, which must remain in effect until the NAVAID is returned to service or decommissioned:

1. Airport/Facility directory.
2. Enroute low altitude charts.
3. Enroute high altitude charts.
4. Terminal procedures publications.

NOTE-

FDC NOTAMs relating to instrument approach and obstacle departure procedures and airways must remain current until published in the Terminal Procedures Publication or applicable enroute chart.

6. VFR Charts:
   (a) Sectional charts.
   (b) World aeronautical charts.
   (c) Terminal area charts.

c. The NTAP conveys NOTAMs to the public until printed correctly on publications listed in subparagraph b above. The NTAP does not cancel NOTAMs but may supplement briefings. The NTAP must not be used as a basis to cancel NOTAMs.

d. NOTAMs concerning Army airfield operations, in addition to the above listed sources, must be researched in the Army Aviation Flight Information Bulletin, if applicable.
Chapter 5. NOTAM Criteria

Section 1. Movement Area NOTAMs

5–1–1. ORIGINATORS OF AERODROME NOTAMs

a. Airport management is responsible for observing and reporting the condition of the aerodrome services, facilities, and movement area. The FSS air traffic managers must coordinate with appropriate airport managers to obtain a list of airport employees who are authorized to originate NOTAMs.

b. At public airports without an airport manager, the FSS air traffic manager must coordinate with the appropriate operating authority to obtain a list of persons delegated to provide NOTAM information.

NOTE—Letters of agreement should be executed between airport management and ATC facilities outlining procedures to be used for originating NOTAMs.

5–1–2. HANDLING REPORTED AERODROME CONDITIONS

a. Copy any information received verbally, and record the name, title (if appropriate), address, and telephone number of the person submitting the information. Information obtained from other than an authorized airport or FAA employee must be confirmed before issuance. If you are informed of or observe a condition that affects the safe use of a movement area, relay the information to the airport management for action.

NOTE—This includes data received from airport inspectors.

b. If unable to contact airport management, classify and issue a NOTAM publicizing the unsafe condition always stating the condition and including the word “UNSAFE;” for example, RWY number or TWY letter or letter/number “UNSAFE DISABLED ACFT.” Inform airport management of the action taken as soon thereafter as practical.

c. (U) – Unverified aeronautical information (for use only where authorized by letters of agreement). Movement area or other information received that meets NOTAM criteria and has not been confirmed by the airport manager or designee. If Flight Service is unable to contact airport management, Flight Service must forward (U) NOTAM information to the NS. Subsequent to NS distribution of a (U) NOTAM, Flight Service will inform airport management of the action taken as soon as practical. Any such NOTAM will preface the keyword with “(U)” and must include the condition and cause.

5–1–3. MOVEMENT AREA INFORMATION

Movement Area NOTAMs

FIG 5–1–1

Movement Area Diagram

...AD AP CLSD EXC PPR MON–FRI 0330–1430 1310120330–1310171430
See Appendix A for examples.

Originate a NOTAM D for:

a. Aerodrome conditions. Use the keyword “AD” immediately followed by the facility: “AP”, “HELIPORT”, or “SEAPLANE BASE”, followed by the condition. When the condition includes a limitation, follow the condition with “TO” or “EXC;” for example, “CLSD EXC SKI” or “CLSD TO TRANSIENT.”

b. Commissioning of a movement area or portions thereof. State the type of surface, length and width of the surface, lighting status, and declared distances.
   1. Lighting status; for example, LGTD, NOT LGTD.
   2. Length and declared distances required for only runway commissioning.

c. Closure of a movement area or portion thereof. Partial runway closures must be indicated by feet, for example, E 500FT.
   1. Permanent closure (decommissioning). State the surface description and the condition “CLSD” with expiration time “PERM.”
   2. Temporary Nonmovement Area. Use this feature when a taxiway is temporarily designated as Non Movement in a NOTAM.

d. Operational limitations on the use of any portion of a runway, a taxiway, a ramp, an apron or a waterway. Weight bearing capacity of a runway can be changed only by authorization of the Manager, Airports Division (appropriate region). Include reference to ACFT when describing limitations associated – wing, weight, tail, engine, taxi speed, etc.

e. Changes to usable runway length and declared distances.

   1. When a runway condition restricts or precludes the use of any portion of a runway resulting in a change to the declared distances, include the published take-off run available (TORA), take-off distance available (TODA), accelerate–stop distance available (ASDA), and landing distance available (LDA) in the NOTAM. Ensure that a second NOTAM is originated for the reciprocal runway with all declared distances if any value has changed. Declared distances can only be authorized by the FAA Office of Airport Safety and Standards, Airport Design Division, AAS-100.

   2. In the event the published TORA, TODA, ASDA, and LDA need to be reported without reference to the runway condition that caused the change, report declared distances or changes to published declared distances. For example, when the published runway length is changed, report the declared distances, or erroneous declared distances that were published and need to be corrected.

f. Change of runway identification.

g. Change of traffic pattern.

h. Runway Visual Range (RVR). When originating a NOTAM on RVR, RVR touchdown (RVRT), RVR midpoint (RVRM), and RVR rollout (RVRR), specify the single runway affected. When all the RVRs are out of service, issue a NOTAM using the keyword AD.
i. Surface Markings and Signage. Follow 4-2-1 b 1-3, including:
   1. Keyword. Specify the keyword for the type of surface on which the sign/marking is located.
   2. Surface designator. Specify the designator of the surface on which the sign/marking is located.
   5. Sign/marking location from users’ perspective (LEFT/RIGHT SIDE; FOR RWY; AT RWY), when needed.
   6. Condition. For example, NOT STD, NOT LGTD, OBSC, MISSING, NOT MARKED
   7. Follow 4-2-1 b 11-14 to complete the NOTAM.

j. Other reportable conditions. The airport operator must ensure that a NOTAM is submitted for conditions considered to be hazardous or potentially hazardous to the aircraft operator. Permanent changes in surface conditions must be coordinated for publication in accordance with Paragraph 2−1−3, Publication Criteria.
   1. When SNOWBANKS, BERM, DRIFTS, WINDROWS and SN PILES are not on the movement areas, issue them without the FICON descriptor.
   2. When it is determined that no surface condition reports will be taken for longer than a 24-hour period, issue a single NOTAM (Keyword AD) for the entire time-period. Use the phrase “SFC CONDITIONS NOT REPORTED”, as this differs from Conditions Not Monitored.

5–1–4. FIELD CONDITIONS (FICON) REPORTING

See Appendix A for examples.

Report surface conditions on runways, taxiways, and aprons using the FICON NOTAMs. The keyword AD must not be used with descriptor FICON, except for heliport.

…AD HELIPORT FICON 4IN DRY SN OBSERVED AT XX12070959... 

Runway

Takeoff and Landing Performance Assessment (TALPA) FICONs are reported in thirds of the landing runway, except when reporting Slippery When Wet. Runways are described using the RWY keyword followed by a single runway direction designator, FICON and condition.
Taxiway

Taxiways are described using the TWY keyword followed by a surface name/designator, FICON and condition. Depth is required and a width is optional.

TWY A FICON 1/2IN WET SN

TWY A FICON 1/2IN WET SN 50FT WID REMAINDER COMPACTED SN

Apron

Aprons are described using the APRON keyword followed by a surface name/designator, FICON and condition. Depth is required and a width is optional.

APRON MAIN RAMP BTN RWY 13/31 AND TWY C FICON 1IN DRY SN

Helipad

Helipads are described using TWY or APRON keywords followed by HELIPAD (surface designator) FICON and condition.

APRON HELIPAD H1 FICON 2IN DRY SN

APRON HELIPAD C FICON DRY PLOWED 50FT WID REMAINDER COMPACTED SN

a. Airport operators use the Runway Condition Assessment Matrix (RCAM – See Table 5−1−5) to create the Runway Condition Code (RwyCC) for Paved Surfaces, which include asphalt, asphalt–concrete, concrete, and porous friction course. Non−paved surface NOTAMs do not include the RwyCC. The NS generates the RwyCC based on airport operator input of the contaminants present. Per AC 150/5200−30, Airport Field Condition Assessments and Winter Operations Safety, airport operators have the capability, in accordance with specific action and protocols, to downgrade or upgrade the runway condition code.

b. Each field of the NOTAM is described below. Follow the NOTAM composition in 4−2−1 a 1−4 to include:

1. Surface Designator (RWY 04)
2. FICON. Insert “FICON” after the surface designator and before the field condition.
3. RwyCC. When generated, it will be illustrated as values between 0 and 6 and look similar to this for runway thirds (3/4/2). The RwyCC will only be provided for paved runways when the percentage coverage of the full runway that is contaminated is greater than 25%.
4. Condition. Report the contaminants per Table 5−1−3, including the percentage of coverage for runways, in thirds.
   (a) Runways, including ski strip and waterlane.
      (1) RWY: Each third (touchdown, midpoint, and rollout) will include percentage, depth (when required), and type of contaminant. Up to two separate contaminants can be reported per runway third.
      (2) A runway is dry when it is neither wet, nor contaminated. A FICON NOTAM must not be originated for the sole purpose of reporting all thirds of a runway are dry. A dry surface must be reported only when there is need to report conditions on the remainder of the surface. When describing a dry surface, it is considered the full length and width of the runway third. DRY can be reported in two thirds and the remaining third have a different contaminant.
   EXAMPLE−
   … FICON 10 PRCT 1IN WET SN, 10 PRCT 1/8IN DRY SN OVER ICE AND 10 PRCT 1/8IN DRY SN, DRY
   (3) A runway is wet when there is any visible dampness or water that is 1/8 inch or less in depth. When describing a wet surface, include the percentage.
   (4) If all three thirds are identical percentage, depth (when required) and type of contaminant, it is shown in the NOTAM once.
EXAMPLE—
…FICON 4/4/4 75 PRCT COMPACTED SN…

(b) Taxiways and Aprons. The condition includes depth and type of contaminant.

NOTE—
Free-form is an acceptable means of entering FICONs for TWY and APRONs.

5. Action. Action taken to treat the contaminated surface.

(a) Includes the treatment method (Up to three treatments permitted for full length of runway/taxiway/apron.) Treatment includes plowed, swept, sanded, deiced liquid, deiced solid, scarified (for runways, each third must be contaminated with only ice and the total surface coverage must be >25%). A treatment width of 50FT is considered 25ft on each side of the centerline.

(b) Includes width of PLOWED or SWEPT treatment if not the full width. The treatment is omitted when the entire surface has been plowed or swept.

(c) Includes SANDED when a surface has been treated with sand.

(d) Includes DEICED LIQUID or DEICED SOLID or both to report the presence of liquid or solid deicing material, as this can have operational significance to the pilot.

(e) Includes ridges (when applicable) to describe the accumulation at the edge of the treated area. Ridges include snowbanks, berms, windrows, snow piles and drifts.

(1) Use the term “DRIFTS” after any treatments to describe one or more drifts. When the drifts are variable in depth, report the greater depth.

(2) Use the terms “SNOWBANKS,” “BERMS,” “SN PILES” or “WINDROWS” after the surface condition. Snowbanks must be assumed to be at the edge of a movement surface or, when plow/sweeper is used, at the edge of the plowed/swept area.

EXAMPLE—
…FICON 5IN DRIFTS…

(f) Includes “Remainder” to describe the non-treated depth and type of contaminant for full length of runway/taxiway/apron to provide additional information about the surface condition. For example, a runway has been treated, resulting in differing field conditions on the untreated parts of the surface.

EXAMPLE—
…FICON 4/4/4 50 PRCT COMPACTED SN PLOWED 75FT WID REMAINDER 1/2IN DRY SN…
…FICON 25 PRCT COMPACTED SN AND 10 PRCT ICE, 25 PRCT 2IN DRY SN, DRY PLOWED 75FT WID REMAINDER 1/2IN DRY SN…

6. Braking Action (BA). (APRONs, TWYs and Non–Paved RWYs). Report braking action on movement areas as good, good to medium; medium; medium to poor; poor; or nil, as received from airport management. The worst runway braking action is shown by contaminant type and RwyCC.

(a) Reporting of a “NIL” braking condition is not permissible by Federally Obligated Airports or those airports certificated under 14 CFR part 139. A “NIL” braking condition at these airports must be mitigated by closure of the affected surface.

(b) Paved surfaced runways cannot have a stand–alone BA NOTAM.

(c) Non–Paved surfaced runways can have BA, but as a stand–alone NOTAM.

(d) TWY/Apron can have BA as stand–alone or appended to field condition NOTAM.

EXAMPLE—
…TWY A FICON BA GOOD TO MEDIUM…
…TWY A FICON 1/8IN WET SN BA MEDIUM…

7. Observation Time. The time airport management observed the conditions.
8. **Conditions Not Monitored** (when applicable). When an airport operator cannot monitor the condition of the movement area or airfield surface, this information is issued as a NOTAM. Usually necessitated due to staffing, operating hours or other mitigating factors associated with airport operations. When the field conditions will not be monitored, follow the most recent observation with the words “CONDITIONS NOT MNT (date/time)” (date/time). The time parameters specified must fall within the start of activity/end of validity times.

9. **Start of Activity/End of Validity.** FICON NOTAMs are considered temporary, therefore the End of Validity time for FICON NOTAMs must not exceed 24 hours from the Start of Activity time, except:
   
   (a) When the reported contaminant is ASH, MUD, OIL RUBBER (taxiway only), or SAND.
   
   (b) When appended with remarks “CONDITIONS NOT MNT.”

   c. Rubber as a contaminant/Slippery When Wet.

   **EXAMPLE—**
   
   …TWY A FICON RUBBER…

   2. Slippery When Wet is a stand-alone NOTAM, used only on runways, when describing a rubber accumulation. This is the only FICON that is described using both runway ends.

   **EXAMPLE—**
   
   …RWY 02/20 FICON 3/3/3 SLIPPERY WHEN WET…

   **NOTE—**
   
   *May be downgraded to 2/2/2 or 1/1/1 with all numbers matching.*

   **TBL 5–1–1**
   
   **Reportable Depth Measurements**

<table>
<thead>
<tr>
<th>Use Value</th>
<th>To Report</th>
</tr>
</thead>
<tbody>
<tr>
<td>1/8IN</td>
<td>⅛ inch or less</td>
</tr>
<tr>
<td>1/4IN</td>
<td>&gt;⅛ inch to and including ¼ inch</td>
</tr>
<tr>
<td>1/2IN</td>
<td>&gt;¼ inch to and including ½ inch</td>
</tr>
<tr>
<td>3/4IN</td>
<td>&gt;½ inch to and including ¾ inch</td>
</tr>
<tr>
<td>1IN</td>
<td>&gt;¾ inch to and including 1 inch</td>
</tr>
</tbody>
</table>

   (a) When 1 inch is reached, report values in multiples of 1 inch and discontinue the use of fractions. When a snow depth of 35 inches is reached, report values in multiples of feet only. Round depths greater than 1 inch to the next higher reportable depth.

   (b) Report the highest depth of the contaminant along the reported portion of the surface.

   **TBL 5–1–2**
   
   **Reportable Contaminants**

<table>
<thead>
<tr>
<th>Wet (includes damp and ⅜ inch depth or less of water)</th>
<th>Compacted snow</th>

5–1–5. AERODROME FACILITIES

...AD AP CLSD EXC PPR MON–FRI 0330–1430 1310120330–1310171430

See Appendix A for examples.

Issue a NOTAM if any aerodrome service availability has changed from that which is published.

a. Certified Aircraft Rescue and Fire Fighting (ARFF).

   1. Issue a NOTAM D on airports (not runways) certificated under 14 CFR Part 139, when notified by airport management that required ARFF equipment is inoperative/unavailable and replacement equipment is not available. Except as indicated in paragraph 5-1-5a 3, airport management has 48 hours to replace or substitute equipment before the index changes. Air carriers and others must be notified that ARFF equipment is out of service. Each NOTAM must have an expiration time as obtained from airport management. If unable to obtain an expiration time, add 48 hours to the time of receipt and advise airport management.

   NOTE—
The ARFF Index for each certificated airport is published in the U.S. Chart Supplement, which lists indices and ARFF equipment requirements.

   2. At certificated airports listed in the U.S. Chart Supplement, the certificate holder (airport management) is required to notify air carriers by NOTAM when required ARFF equipment is inoperative/unavailable and replacement equipment is not available immediately. If the required Index level of capability is not restored within 48 hours, airport management is required to limit air carrier operations.

REFERENCE—
Title 14 CFR Part 139

   3. If the ARFF vehicle is still out of service after 48 hours, the airport manager must notify the FSS of a temporary index change and approximate duration time.

   4. If the ARFF Index is listed in the U.S. Chart Supplement, as A and the ARFF vehicle is out of service, the NOTAMs must indicate that index A is not available and the airport is closed to air carrier operations.

b. Fuel services.

c. Custom Services.

d. Aerodrome beacon (ABN). Describe the beacon status as accurately as possible. For example, ABN NOT ROTATING; ABN NOT STD GREEN ONLY

e. Wind direction equipment, including wind cones, wind direction indicator, wind sock, etc.

5–1–6. WORK IN PROGRESS
Work in Progress

a. Work in Progress (WIP) describes any work being done on the airport surface, including construction, mowing, snow/ice removal, etc. WIP does not close a movement area; therefore, if the movement area is restricted, another NOTAM identifying that restriction is needed. For example, a WIP with snow removal requires a closure NOTAM with 15 minute PPR in order to use the surface.

b. WIP (reason) is mandatory for describing construction and snow/ice removal NOTAMs. Other WIP reasons are optional.

c. Any NOTAM associated with work in progress on or adjacent to a runway, taxiway, apron/ramp, or aerodrome must be formatted as follows 4-2-1 b 1-3, including:

1. Keyword. RWY, TWY, APRON, or AD.

2. Surface name/designator. Specify the name/designator of the surface on which the work is being conducted.

3. Surface segment description must be specified in feet or from a specific point to point; for example, TWY A SOUTH 76FT or TWY A BTN TWY B AND TWY C.

   NOTE–
   A surface segment differs from the optional plain language description of the work areas in that the surface segment description can be captured and depicted graphically in a digital environment. The optional plain language comments will be delivered in text form only.

4. Condition or activity; “WIP.”

   NOTE–
   Airport operators must ensure this NOTAM remains active only when actual snow and ice removal operations are taking place.

5. Reason or purpose.

6. Remarks. The work area may be described in plain language text after the reason by specifying the area by cardinal direction in relationship to the work area, by an intersection, or distance from an intersection.

7. Follow 4-2-1 b 13 and 14 to complete the NOTAM.
Section 2. Lighting Aid and Obstruction NOTAMs

5–2–1. LIGHTING AIDS

FIG 5–2–1
Lighting Aids

…RWY 27 RTHL OUT OF SERVICE…

See Appendix A for examples.

Originate NOTAMs on operational status of lighting aids for public use civil landing areas listed in the U.S. Chart Supplement. Each type of lighting requires separate NOTAMs. Technical Operations must be made aware of any runway lighting outages, as this is the office that maintains the equipment. When describing restrictions, use Runway Centerline (RCL) with visual navigational aids. NOTAMS regarding lighting aids are originated as follows:

a. Approach light systems (ALS). Only use the runway direction for which the equipment pertains.
   1. When commissioning approach light systems, indicate the exact type of system; for example, MALSR, MALSF, etc.
   2. Once commissioned and published, approach light systems need only be shown as ALS.

b. Lead off /lead on lights. NOTAMs issued using keyword RWY. Lead off and lead on light will be the standardized verbiage for lead off/on lights, which are also referred to as turnoff lights.

c. Runway status light system.
   1. Runway entrance lights. NOTAMs issued using keyword TWY
   2. Take-off hold lights.

d. Sequence flashing lights/runway alignment indicator lights.

e. Visual approach lighting.
   1. Visual approach slope indicator (VASI).
   2. Precision approach path indicator (PAPI).
   3. Runway end identifier lights.
   4. Threshold lights (RTHL).

f. Runway edge lights (REDL).
   1. When commissioning runway edge light systems, indicate the exact type of system; for example, LIRL, MIRL, HIRL, etc.
   2. Once commissioned and published, runway edge lights must only be shown as REDL.
   3. Runway lights obscured due to snow and ice.
g. Runway centerline light (RCLL).
h. Touchdown zone lights (RTZL).
i. Runway lead-in lighting system (RLLS).
j. Airport lighting total power failure.
k. Pilot-controlled lighting (PCL) frequency when it controls approach lights or runway lights.
l. Taxiway lighting.
   1. Taxiway edge lights.
   2. Taxiway centerline lights.
   3. Runway guard lights. NOTAM issued using keyword TWY.
   4. Stop bar lights. NOTAM issued using keyword TWY.
   5. Taxiway lights obscured due to snow and ice.

5–2–2. OBSTACLES

---

FIG 5–2–2
Obstacles

...OBST CRANE (ASN 2013–ACE–5–NRA) 345140N0804506W (1.44NM SW N52) 580FT (195FT AGL) NOT LGTD...

See Appendix A for examples.

a. Obstructions to include telecommunications antenna tower lights, cranes, stacks, wind turbines, non-FCC towers, power lines, moored balloon, kites, natural growth/terrain, etc.

b. Any failure or malfunction which affects a top light or flashing obstacle light regardless of its position is a condition for a NOTAM.

c. Commercial tower light operators must report the operating status of tower lights and ensure that a NOTAM is originated via a direct entry tool or contacting FSS.

d. The NOTAM text for obstructions to air navigation must be formatted as follows 4-2-1 b 1-2, including:
   1. Location Identifier: For wind turbine farms, use the ARTCC under which the farm falls.
   2. Keyword “OBST.”
   3. Specify the attribute; for example, “TOWER LGT”, “CRANE,” “STACK,” “ACFT TAIL,” “BUILDINGS,” “MOORED BALLOON”, “KITE” etc.
   4. Assigned obstruction identifier.
      (a) For FCC Towers, the Antenna Structure Registration (ASR), if known, in parentheses. If the ASR is not known, indicate by (ASR UNKNOWN) in the NOTAM.
      (b) For Cranes, Stacks, etc., the Aeronautical Study Number (ASN), if known, in parentheses. If the ASN is not known, indicate by (ASN UNKNOWN) in the NOTAM. Do not include the ASN for wind turbine farm NOTAMs, see examples.
(c) For Moored Balloon, which requires a waiver to 14 CFR Part 101, the assigned obstruction identifier is not required.

5. For FCC Tower Obstructions, enter the location by latitude and longitude to the nearest one hundredth of a second. For wind turbine farms, if using latitude and longitude, provide the coordinates for the center point of the wind farm, or the coordinates for one of the turbines closest to the center. If the latitude and longitude is not known, use “UNKNOWN”. For all other obstacles, use the latitude and longitude to the nearest second, or fix/radial/distance, or a nautical mile radius of a NAVAID.

6. Plain language location in parentheses.

(a) When the obstacle is within 5SM of an airport, describe the plain language location in feet or nautical miles using 16 points of compass from a specified location on the airport; for example, (.5NM E APCH END RWY 18) (2000FT SSE DEP END RWY 20) (2NM SSW ACY).

(b) When the obstacle is within 500 feet either side of the centerline of a charted helicopter route, or 5SM or more from an airport and more than 200 feet AGL, describe the plain language location by using the bearing, distance, and aerodrome designator of the nearest public-use airport; for example, (12NM SSW SPA).

7. Specify the altitude MSL with the unit of measurement (FT), if known. Otherwise state UNKNOWN. For wind turbine farms, use the tallest height of a turbine within the farm.

8. In parentheses, specify the height with the unit of measurement (FT) and reference datum (AGL).

NOTE−
Report the height of obstruction lights on terrain (hills) in MSL only, as the terrain is the obstacle, not the light on the terrain

9. Specify the condition:

(a) “OUT OF SERVICE” for FCC obstructions. A light condition of OUT OF SERVICE refers to a top light or flashing obstruction light is not operating, regardless of its position.

(b) “NOT LGTD,” “LGTD,” “FLAGGED” for non-FCC obstructions, for example. As used in a NOTAM, NOT LGTD refers to a facility (sign) that is installed, but the lights aren’t lit.

10. Start of Activity/End of Validity. FCC receives notification upon ASR NOTAM issuance.
Section 3. NAVAID NOTAMs

5–3–1. GENERAL
Technical Operations personnel must ensure the origination of NOTAM Ds concerning NAVAIDs for which they are responsible.

5–3–2. REPORTING NAVAID MALFUNCTIONS
Known or reported malfunctions of a navigational aid must be reported to Technical Operations or appropriate personnel.

5–3–3. UNPROGRAMMED EXTENDED SHUTDOWNS
Unprogrammed, extended facility shutdowns or other unanticipated outages that are expected to last more than 30 days must be promptly reported to NFDC. When possible, the expected duration of the shutdown is to be included in the message.

NOTE—Except for emergency shutdowns, technical operations personnel are expected to give at least 1 hour notice.

5–3–4. NAVAID MAINTENANCE SHUTDOWNS
Information concerning maintenance shutdown of NAVAIDs that are part of the NAS must be handled as follows:

a. Routine maintenance shutdown. When possible, approval should be obtained sufficiently in advance of the proposed shutdown time to allow dissemination of a NOTAM at least 5 hours before a shutdown will occur. A routine maintenance shutdown request must not be denied because of an inability to issue a NOTAM 5 hours in advance of the shutdown.

b. Emergency shutdown. When possible, obtain at least 1 hour advance notice so that appropriate dissemination may be made before shutdown.

c. Extended maintenance shutdown. Notify the NFDC sufficiently in advance to permit publication of the information prior to the shutdown date. When this is not possible, disseminate a NOTAM no more than 3 days before the shutdown.

5–3–5. UNMONITORED NAVAIDs

a. All VOR, VORTAC, and ILS equipment in the NAS have automatic monitoring and shutdown features in the event of malfunction.

b. When a navigational aid’s operational status cannot be monitored at the controlling or monitoring facility, but all indications or reports are the facility is operating normally, Technical Operations personnel must ensure the origination of a NOTAM placing the aid in an unmonitored status.

c. When issuing a NOTAM describing a facility as unmonitored, do not use the category of monitor, only the phrase “NOT MNT.”

d. If the NAVAID is reported as being out of service, the unmonitored NOTAM must be canceled.

5–3–6. INSTRUMENT LANDING SYSTEM STATUS

a. Technical Operations issue NOTAMs related to outages or restrictions on NAVAID components of ILS approach systems, for which they own/maintain/certify. AIS NOTAM Office is responsible for issuing any
procedural NOTAMs, such as flight data center (FDC) NOTAMs. Consult FAA Order 6750.24 to determine if any additional NOTAM Ds should be issued. Ideally, a NOTAM will allow authorized operators to continue, while notifying unauthorized operators that the specified approach procedure is not available. It is critical that required NOTAMs alert users of an inoperative facility or system. In some situations, an all–encompassing cancellation of specific minima (e.g., “CAT II/III Not Authorized”) may not be necessary.

b. Category II and/or III approaches may not be authorized due to the failure of additional equipment, as specified in FAA Order 6750.24. The Technical Operations Control Center specialist in accordance with the guidance contained in FAA Order 6750.24 will make the determination of impact to Category II/III ILS operations, and a separate NOTAM request for loss of ILS category will be made if the equipment failures warrant this action.

c. When Technical Operations personnel issue a NOTAM suspending CAT II/III minimums, AIS must be notified. If the suspension will exist longer than 224–days or is permanent, AIS must submit a full or abbreviated procedure amendment prior to the 224–day suspense.

d. Special Authorization CAT II approaches. These Part 97 CAT II approaches are identified as “ILS RWY XX (SA CAT II)” and by an additional chart note saying “Reduced Lighting: Requires specific OpSpec, MSpec, or LOA approval and use of autoland or HUD to touchdown.”

1. The aircraft operator is authorized to conduct CAT II IAP on certain ILS facilities that do not meet the equipment requirements of a U.S. Standard or ICAO Standard, for example when TDZ lighting or RCL become inoperative. These procedures have been specifically approved in accordance with FAA Order 8400.13, Procedures for the Evaluation and Approval of Facilities for Special Authorization Category I Operations and All Category II and III Operations.

2. When TDZ and/or CL lighting become inoperative on a standard CAT II instrument approach, the certificate holder is authorized to conduct SA CAT II operations.

5–3–7. NAVAID CONDITIONS

**FIG 5–3–1**

**NAVAIDs**

See Appendix A for examples.

a. Originate a NOTAM D for commissioning, decommissioning, outages, or unmonitored status of radio navigation aids (60 minutes or more and 30 minutes or more for RADAR) that are part of the NAS. The NOTAM must be canceled by the originator.

b. Restrictions to NAVAIDs are normally published by segment; for example, 020-055 degree radials. To correct a given segment, cancel the original NOTAM and issue a completely new NOTAM. Add “PLUS SEE (publication)” when other restrictions to the NAVAID are published. The absence of this statement from the NOTAM indicates that all other restrictions have been canceled.

**NOTE–** When required, NDB restrictions have the phrase “bearing to”, while VOR restrictions use the phrase “radials from.”

1. Distinguish components of an ILS from non-precision approach NAVAIDs by preceding the component with “ILS” followed by “RWY” and the runway number (including single ILS airports). Use the term “COURSE” when describing radio navigation aid restrictions. Back Course and Coupled Approach NOTAMs are FDC.

2. Excessive snow and ice accumulation near the glide slope antennas may affect facility performance to the extent that it is inoperative. When this occurs, Technical Operations personnel at the glide slope location are required to initiate appropriate NOTAM D action. Technical operations personnel must monitor snow conditions to determine when conditions permit use of the glide slope and initiate action to cancel the NOTAM. Technical Operations and Aeronautical Information Services NOTAM Office make the determination when to issue an FDC NOTAM or NOTAM D, based on FAA JO 6750.49, Maintenance of Instrument Landing System (ILS) Facilities. Tech Ops issues the NOTAM D and AIS NOTAM Office issues the FDC.

d. Simplified directional facility.

e. Localizer type directional aid for the airport.

f. VOR/DME.

g. VORTAC.

1. VORTAC (all components, VOR/TACAN/AZM/DME).
2. VOR out of service (TACAN/AZM/DME/operational).
3. DME out of service (VOR/TACAN/AZM operational).
4. TACAN azimuth out of service (VOR/DME operational).

h. VOT (VOR Test Facility).

i. VOR Receiver Checkpoint.

j. TVOR.

1. TVORs serving one airport, and not associated with airway structure, must have NOTAMs issued using the associated airport identifier as the affected facility.

2. TVORs serving more than one airport, or associated with airway structure, must have NOTAMs issued using the TVOR identifier as the affected facility.

k. NDB outages:

1. Terminal NDBs. Those NDBs located on or serving only that airport must have NOTAMs issued using the associated airport as the affected facility.

2. If an NDB serves more than one airport, or associated with an airway route structure, issue a NOTAM using the identifier of the NDB as the affected facility.

l. LOM outages:

1. LOM serving one airport must be issued with the three-letter identifier of the airport as the location identifier.

2. LOM serving more than one airport must be issued under the three-letter identifier of each airport that it serves. This procedure may require coordination with other facilities.
m. NAVAID identification change.

EXAMPLE—
...NAV VORTAC ID CHANGED TO VHP...

5–3–8. SATELLITE BASED SYSTEMS

See Appendix A for examples.

1. All global positioning system pseudo–random noise (PRN) GPS satellite outages will be reported directly to the USNOF by the Air Force Space Command (AFSPACECOM) monitoring facility. The USNOF will issue NOTAMs under the accountability “GPS” with a location of “GPS.” When these NOTAMs get distributed internationally, the USNOF changes the designator “KNMH.”

NOTE—
GPS operations are included in the Aeronautical Information Manual.

2. All GPS interference testing NOTAMs will be reported to the USNOF by Technical Operations ATC Spectrum Engineering Services, Spectrum Assignment and Engineering Services. The USNOF will format NOTAMs under the accountability “GPS” with a location identifier of the associated center.

b. Wide Area Augmentation System (WAAS). WAAS area-wide NOTAMs are originated when WAAS assets are out of service and impact the service area. The term “MAY NOT BE AVBL” indicates that due to ionospheric conditions, lateral guidance may still be available when vertical guidance is unavailable. Under certain conditions, both lateral and vertical guidance may be unavailable. USNOF distributes these as FDC NOTAMs when a WAAS asset failure affects a large area, or as Center NOTAMs if all airports with RNAV approaches within a center’s boundary do not have WAAS availability. USNOF utilizes templates provided by Technical Operations, WAAS Operations. All events must reflect an effective time and expiration time.

1. Unscheduled loss of signal or service.
2. Ionosphere storm conditions.
3. Scheduled loss of signal or service.

c. Upon receipt of notification of satellite/surveillance system interference issue the following NOTAM

1. GPS interference:

2. Automatic Dependent Surveillance and affected components, including Wide Area Multilateration Outage

(a) Localized Service Outage for the affected airport

(b) Large Service Outages affecting an Air Route Traffic Control Center area(s)

(1) Single service outage – for large area

(2) Multiple service outages

(c) Large Service Outages affecting several Air Route Traffic Control Center areas

d. Ground Based Augmentation System (GBAS). Originate NOTAMs when the GBAS is out of service for maintenance reasons or predicted to be out of service. GBASs are operated by non-federal service providers, currently IAH and EWR.

1. Unscheduled loss of signal or service.
2. Predicted loss of signal or service.

5–3–9. HOURS OF OPERATION

Changes in the hours of operation of a NAVAID due to other than seasonal daylight time changes.
Section 4. Communications Outlets NOTAMs

5–4–1. GENERAL
Technical Operations personnel must ensure the origination of NOTAM D concerning communication outlets for which they are responsible.

5–4–2. REPORTING COMMUNICATIONS OUTLET MALFUNCTIONS
Known or reported malfunctions of a communication outlet must be reported to Technical Operations or appropriate personnel.

5–4–3. COMMUNICATION OUTLET CONDITIONS

...COM REMOTE TRANS/REC 126.25, 131.25 OUT OF SERVICE...

Originate a NOTAM for conditions pertaining to the operation of communications outlets that are part of the NAS when an outage occurs or when a scheduled shutdown is expected as follows:

a. Use a comma to separate multiple frequencies.

b. Commissioning, decommissioning, outage, or (un)availability of communications outlets for the following:

1. All published ATC frequencies and all communication frequencies will be issued with the affected frequency when out of service.
   
   (a) Remote Communication Outlets associated with an airport or NAVAID.
   
   (b) Remote Communication Outlets NOT associated with an airport or NAVAID.

2. If several frequencies are out, but one is still operating, issue the out-of-service frequencies in one NOTAM.
   
   (a) Remote Communication Outlets associated with an airport or NAVAID.
   
   (b) Remote Communication Outlets NOT associated with an airport or NAVAID.
Section 5. Services NOTAMs

5–5–1. GENERAL

---FIG 5–5–1---

Services

<table>
<thead>
<tr>
<th>KEYWORD</th>
<th>Feature, Service, Facility or System</th>
<th>Descriptive comments about Feature, Facility, Service or System</th>
</tr>
</thead>
<tbody>
<tr>
<td>Condition</td>
<td>Other Comments</td>
<td></td>
</tr>
</tbody>
</table>

...SVC POTOMAC APP OUT OF SERVICE. RICHMOND CLASS C SERVICE NOT AVBL. CTC XXXXXXX XXX.XX... 

a. Technical Operations personnel must ensure the origination of NOTAM D concerning the malfunction or degradation of FAA maintained systems and/or equipment.

b. When notified, Technical Operations and Air Traffic personnel must ensure the origination of NOTAM D concerning changes to air traffic services and capabilities, for which they are responsible.

5–5–2. CHANGES TO PUBLISHED SERVICES

a. The party that issues the NOTAM is responsible for formatting the information correctly.

b. Originate a NOTAM for conditions pertaining to the following conditions:

1. Commissioning, decommissioning, or outage of TWRs, APPs, RAPCONs, FSSs, and ARTCCs that are part of the NAS.

2. Hazardous In flight Weather Advisory Service (HIWAS). HIWAS is considered a service because it is broadcast and not a two-way communication system.

   (a) Outage of HIWAS service outlets must be advertised as a separate NOTAM for each outlet.

   (b) Commissioning or non-availability of a new HIWAS outlet.

3. Automatic Terminal Information Service (ATIS).

5. Automated Universal Communication (AUNICOM). AUNICOMs have portions that are automatically broadcast along with the voice recordings. When these functions are out of service or not available, issue a NOTAM.

5–5–3. HOURS OF OPERATION

Disseminate the following conditions as NOTAMs:

a. Change in the hours of operation of an air traffic control facility or service. Tower hours of operation use the airport as the location identifier; for approach controls, since they cover a larger area, use the associated ARTCC(s). Approach controls located within multiple ARTCC airspace must have a separate NOTAM for each ARTCC. When needed, add which class of services is not available and whom to contact.
b. Establishment of a temporary air traffic control tower. Specify the frequency(ies) to be used and, if necessary, the type of service provided with each frequency.

c. Total failure of an air traffic facility (for example, loss of communications, NAVAID monitoring, etc.). Provide the class of service that are not available; the class of services to expect, and, if needed, who to contact for services.

1. Air route traffic control centers (ARTCC).
2. Approach control.
3. Flight service stations. FSS covering a large Flight Plan Area use the ARTCC as the location identifier; for FSS with a small Flight Plan Area use the airport as the location identifier. Flight Plan Areas located within multiple ARTCC airspace must have a separate NOTAM for each ARTCC.
   (a) Covering a large Flight Plan area
   (b) Covering a small Flight Plan area of 5NM or less.
   (c) Flight Plan area covering 2 or more centers
4. Air traffic control towers.

d. Traffic Management Program Alerts.

1. When requested by the associated arrival ARTCC TMU, issue an alerting NOTAM for each airport where an arrival/departure reservation is required. NOTAMs should be in the self-canceling format whenever possible.
2. When a flow control message (for example, arrival delays, ground stops, ground delays, airborne holding, etc.) is received from the Air Traffic Control System Command Center (ATCSCC), the tie-in FSS for the affected airport(s) must issue a NOTAM(s) in the self-canceling format.

5–5–4. WEATHER AND WEATHER REPORTING EQUIPMENT

a. Technical Operations personnel, responsible for system monitoring, must ensure the origination of NOTAMs on Federal AWOS systems as follows:

1. Total system failure (which includes date-time code failures).
2. Altimeter setting is reported as “missing.” AWOS weather reports will be disseminated with missing report elements including altimeter settings. The letter “M” will appear on the operator’s terminal in place of any missing elements. No report will be disseminated when there is a total system failure.
3. Inaccurate/unreliable sensor readings.
4. When malfunctions or discrepancies are reported to a facility, they must be verified by any of the following methods:
   (a) A certified observer, airport manager, or fixed base operator at the observation site.
   (b) Reports regarding a given observation by two pilots within 2 miles of the airport prior to the observation.
   (c) Technical operations personnel.
5. When verified, issue a NOTAM and notify the responsible technical operations office of the discrepancy, unless they reported the outage. If notified of system failure or other irregularity by other than a technical operations office that cannot be verified by the methods given above, forward the information to technical operations office for resolution. Accept NOTAM cancellation information only from the responsible technical operations office.
6. Disseminate the following conditions as NOTAM:
(a) Commissioning or decommissioning of weather reporting. When commissioning an automated system that has a frequency/telephone number, include that information in the NOTAM and specify the system nomenclature.

(b) When reporting a failure or unavailability of weather reporting, do not specify the system nomenclature.

(c) AWOS unreliable/inaccurate elements.

(d) The broadcast frequency of the AWOS is inoperative or returned to service.

b. Accept NOTAM information on ASOS only from the NWS Weather Forecast Office. The person on duty, Meteorologist in Charge or Lead Forecaster, at the NWS Weather Forecast Office is responsible for requesting NOTAMs to be issued regarding ASOS system malfunctions. When malfunctions or discrepancies of an ASOS system are reported to a facility, they are reported to the NWS Weather Forecast Office. ASOS NOTAMs do not get issued using the same criteria as the AWOS systems, as they (ASOS) are monitored and maintained by the NWS and not the FAA. Accept NOTAM information on ASOS only from the NWS Weather Forecast Office, when the following conditions are reported. Accept ASOS NOTAM cancellation information only from the NWS Weather Forecast Office.

1. The entire ASOS observation is missing and no backup observation is available for long-line dissemination.

2. The altimeter setting is missing and is not backed-up.

3. The date/time group is erroneous and has not been corrected.

c. Juneau Airport Wind Service is a wind warning system which provides turbulence alerts based on real-time wind information from anemometers and wind profilers around hazardous terrain.

5–5–5. MICROBURST/WINDSHEAR DETECTION SYSTEM

Technical Operations personnel must ensure the origination of NOTAM D concerning microburst/windshear detection systems, such as low-level windshear alert system, terminal Doppler weather radar and weather system processor.

5–5–6. RADAR SERVICES

The Technical Operations personnel must ensure the origination of NOTAM D concerning radar outages. List the service restrictions with reference to the nearest NAVAID.

a. Radar services for terminal facilities are described using the following terminology. Location identifiers used for the issuance of NOTAMs for terminal facilities must be the airport identifier.

<table>
<thead>
<tr>
<th>SSR (secondary surveillance radar)</th>
<th>SMR (surface movement radar)</th>
<th>TAR (terminal area surveillance radar)</th>
</tr>
</thead>
<tbody>
<tr>
<td>GCA (ground control approach)</td>
<td>PAR (precision approach radar)</td>
<td>PRECISION RWY MNT No contraction</td>
</tr>
</tbody>
</table>

b. The contraction phrase “RADAR SERVICE” must not be used. When describing the radar service, do not use the model number.
Chapter 6. Airspace NOTAMs

Section 1. Airspace

6–1–1. AIRSPACE NOTAM FORMAT

...AIRSPACE CRYPT NORTH MOA AND REVEILLE MOA ACT 5000FT–16000FT...

a. NOTAMs originated for Airspace items will be formatted following 4-2-1 b 1-2, including:

1. Location identifier – may be AP, NAVAID, or ARTCC depending on NOTAM.
2. Keyword “AIRSPACE.”
3. Description of activity, if needed.
4. Description of area impacted; for example, the name of a published area, an airport, a nautical mile radius of a latitude/longitude, NAVAID or fix-radial-distance from a VOR-type NAVAID, or an area defined by latitude/longitude or NAVAID. When applicable, preface the description with this standard phrase: “WI AN AREA DEFINED AS…”
5. Plain Language location, when using all latitude/longitude. In parentheses, specify using nautical miles…direction…airport (5NM E IAD), or F/R/D from the nearest NAVAID.
6. Condition
7. Lower limit/upper limit; for example, 5000FT-16000FT (as specified in 4-2-1)
8. Remarks (when needed). Other operational information.
   (a) When identifying the expected height of a balloon trajectory, express it in FT, 150000FT versus FL150.
   (b) Identifying the frequency transmitting on is an acceptable remark.
9. Follow 4-2-1 b 13-14 to complete the NOTAM.

b. If the area impacts more than one ARTCC, originate a NOTAM for each ARTCC.

6–1–2. SPECIAL ACTIVITY AIRSPACE (SAA)

A NOTAM must be entered through Special Use Airspace Management System to activate special use airspace if activated by NOTAM only or at other than published times for those SAA that contain a NOTAM provision in their legal description, under the appropriate ARTCC(s):
a. SAA, for the purpose of this manual, includes special use airspace (SUA) (restricted area, military operations area (MOA), warning area, and alert area airspace), instrument and visual military training routes, aerial refueling tracks and anchors.

1. A NOTAM must be in effect to activate SAA at other than published or charted times for those areas that contain a NOTAM provision (“BY NOTAM,” “INTERMITTENT BY NOTAM,” or “OTHER TIMES BY NOTAM”) in their times of use legal description per FAA Order 7400.8, Special Use Airspace, Flight Information Publications, and related Government charting, or if that SAA can only be activated by NOTAM. A NOTAM must not be used to make other changes to the charted lateral dimensions or which would exceed the lower or upper published altitude limits.

2. NOTAMs for SAA activation and cancellation for uncharted and unpublished times must be originated by the appropriate controlling agency, with the overlying ARTCC as the location identifier, using the appropriate accountability of SUAE, SUAC and SUAW, corresponding to the FAA service areas, east, central and west, respectively.

b. Issue the NOTAM in the format described in 6-1-1 above using the following items:
   - Accountability = SUA (E, C, W)
   - Location identifier = ARTCC
   - Condition = “ACT” (active)

c. Lights Out/Night Vision Goggle Operations in MOAs. Upon notification of a lights out/ Night Vision Goggle operation in an authorized MOA (as listed in FAA exemption 7960 and FAA exemption 3946), issue a NOTAM containing the description of activity information.

d. Special Use Airspace (SUA) NOTAMs are originated by the controlling agency, utilizing the SUA Management System. The type of activity included does not restrict movement into or out of the airspace. TFRs restrict movement. This is an advisory about unusual activity within the airspace. Do not use this to report increased flight movement.

6−1−3. AIRSPACE AND ALTITUDE RESERVATIONS

a. Central Altitude Reservation Function (CARF) airspace and altitude reservation NOTAMs must be transmitted by the USNOF, after receipt of the candidate NOTAM from the CARF office. The information will be stored in the NS database and available for request/reply. If the altitude reservation affects international airspace, it will be sent and stored as an international NOTAM.

b. Issue the NOTAM in the format described in 6-1-1 above using the following items:
   - Accountability = CARF
   - Location identifier = ARTCC
   - Description of Activity = Stationary Altitude Reservation

c. Airspace and Altitude reservation involving a single ARTCC.

d. Missile firing and offshore airspace reservations. ARTCCs must issue as a NOTAM missile firing exercises and offshore airspace reservations. These NOTAMs must be transmitted as an international NOTAM to the USNOF.

6−1−4. SPECIAL AERIAL REFUELING

a. Where published tracks/anchors are inadequate for special mission/sortie, special track/anchor may be established. Special tracks/anchors must not be published in the DOD FLIP Planning document but may be described in Letters of Agreement.

b. Originate a NOTAM for special tracks/anchors that are outside restricted/warning areas. NOTAM Ds will be used for special refueling tracks/anchors outside Class A airspace so as to define the refueling area as specifically as mission security will allow.

c. Issue the NOTAM in the format described in 6-1-1a above with:
1. Description of Activity = SPECIAL AERIAL REFUELING TRACK/ANCHOR

2. Condition = “ACT”

REFERENCE:
FAAO JO 7610.4, Special Operations, Para 10-6-6, Special Exercises, and para 10-6-7, Issue NOTAM

6–1–5. OTHER AIRSPACE NOTAMS

With the exception of hot air balloons, FAA Authorization will consist of an approved waiver/authorization to 14 CFR Part 101.

NOTE–
14 CFR part 91 applies to hot air balloons

a. Upon receipt of appropriate notification/authorization, but not more than 3 days prior to the event, originate an AIRSPACE NOTAM using the format described in 6-1-1a above.

1. Location Identifier =
   (a) The nearest public use airport when the full activity is completely within a 5NM Radius of the airport.
   (b) The nearest VOR when any of the activity is more than 5NM from the nearest public use airport but completely within 25NM Radius of a VOR
   (c) When the activity doesn’t fall within either (a) or (b), use the ARTCC.

2. Description of activity = see table 6-1-1 for general types of activity.

NOTE–
Unmanned rocket activities that will require airspace management such as Temporary Flight Restrictions will require the issuance of an FDC NOTAM.

b. For unmanned free balloons the forecasted trajectory and cruising altitude or UNL (unlimited). For operations above FL999/UNL, place expected altitude in remarks. Include a landing area NOTAM, if requested by proponent.

(Pointer NOTAM)

...SEE MTU 12/045 UNMANNED ROCKET...

c. Authorizations and/or Air Traffic notifications are required by the proponent for the following activities; ensure the NOTAM Originator is aware of this. The information is not released in the NOTAM.
1. Airshows, Demonstrations, Aerobatic Areas.
2. Unmanned Aircraft Operations.
3. Parachute Jumping/Sky Diving

6–1–6. SURFACE AREA AIRSPACE

Originate an AIRSPACE NOTAM using the format described in 6-1-1a above.

a. A NOTAM D may be originated for permanent changes to part time surface area hours of operation only, under the following conditions:
   1. The change in the surface area hours of operation is due to other than seasonal daylight time changes.
   2. Only those surface areas identified as part time in the airspace section of the U.S. Chart Supplement as part time are subject to change by NOTAM. A continuous surface area hour of operation is changed only through rulemaking action.
   3. The change in the surface area hours of operation will thereafter be continuously published in the U.S. Chart Supplement, the U.S. Flight Information Publication Supplement Alaska, or the Pacific Chart Supplement.

b. For temporary changes to published part time surface area hours of operation, issue a Services NOTAM (SVC) in accordance with Paragraph 5-5-3, Hours of Operation. Do not issue an Airspace NOTAM.
Chapter 7. FDC NOTAMs

Section 1. Transmitting FDC NOTAM Data

7–1–1. GENERAL

FDC NOTAMs refer to information that is normally regulatory in nature and includes, but is not limited to, the following:

a. Interim IFR flight procedures.

   1. Air traffic service route changes.

   2. Instrument flight procedure changes to include special instrument flight procedures, standard instrument approach procedures (SIAP), textual and graphic obstacle departure procedures (ODP), standard instrument departures (SID), and standard terminal arrivals (STAR). Refer to FAA Order 8260.19, Flight Procedures and Airspace, for policy guidance and procedures for the issuance, tracking, and cancellation of FDC NOTAMs relating to instrument flight procedures.

   3. Airspace changes in general. For FDC NOTAMs that are generated due to unforeseen events, use keyword/title “AIRSPACE…NOTICE”.

b. Temporary flight restrictions.

   1. Disaster/hazard areas.

   2. Aerial Demonstrations.

   3. Hijacking.

   4. Flight restrictions in the proximity of the President and other parties.

NOTE—Presidential aircraft includes the aircraft and the entourage of the President, the Vice President, or other public figures designated by the White House.

REFERENCE—
FAAO JO 7210.3, Chapter 5, Section 1. Presidential Aircraft

c. 14 CFR Part 139 certificated airport condition changes.

d. Air defense emergencies.

e. Emergency flight rules

f. Substitute airway routes.

g. Special data.

h. U.S. Government charting corrections

i. Laser activity.

7–1–2. TEMPORARY OR PERMANENT FDC NOTAMS

a. Instrument flight procedure FDC NOTAMs may, at the direction of the Aeronautical Information Services and Flight Inspection Services Group personnel, be used for either temporary or permanent conditions.

b. NOTAMs for temporary conditions must be identified by the addition of “EST” following the expiration date/time group. NOTAMs for permanent conditions must be identified by inserting “PERM” in lieu of an expiration date/time group.
c. FDC NOTAMs of a permanent nature, relating to instrument approach and obstacle departure procedures and airways, must remain current until published in the Terminal Procedures Publication or applicable en route chart.

7–1–3. INSTRUMENT IFR FLIGHT PROCEDURES

a. Instrument Flight Procedure (IFP) NOTAMs. Changes to IFPs that have been charted and distributed, are processed as FDC NOTAMs and issued through the NS. Procedural NOTAMs are originated by FAA Flight Operations and FAA Flight Inspection and Procedures personnel. When these revisions cannot be published in advance of their effective date, the NOTAM is transmitted as an FDC NOTAM. The applicable keyword (ODP, SID, STAR, CHART, DATA, IAP, VFP, ROUTE, or SPECIAL) will be included immediately following the location identifier designator.

NOTE–The USNOF is responsible for Quality Control on Interim IFR Flight Procedure NOTAMs.

1. Procedural minimums must not be lowered by NOTAM unless fully justified as a safety of flight issue or after returning the minimums to their previously published level at the end of the NOTAM.

2. Both temporary and permanent conditions may be promulgated via an FDC NOTAM at the direction of AIS.

b. Temporary conditions. NOTAMs for temporary conditions whose expiration time is uncertain and approximate, must be identified by the addition of “EST” following the NOTAM date/time group. The “EST” suffix may be used with all IFP T–NOTAMs.

1. When it is known that the condition requiring a NOTAM will be effective for more than four chart cycles (224 days), a procedure amendment [revised 8260–series form] or permanent NOTAM must be submitted as soon as possible to allow publication of the change within the 224–day timeframe.

2. When the timeframe for temporary conditions requiring NOTAM action is unknown or cannot be determined and the condition is beyond the control of the NOTAM issuing authority; e.g., airport construction, NAVAID restrictions, temporary obstructions, etc., the NOTAM issuing authority will ensure the line of business (LOB) approving the temporary condition is advised (copy to AFS–460) of the procedural impact and the necessity of reconciling the condition as soon as possible so the temporary NOTAM can be canceled within the 224–day timeframe.

3. If the condition cannot be corrected within 224 days, the NOTAM issuing authority must obtain Flight Standards approval from AFS–460 for the NOTAM to remain in effect beyond the 224–day limitation. It is important that NOTAMs not be allowed to remain active for excessive periods of time; therefore, an FDC IFP NOTAM must not be canceled and re–issued without Flight Standards approval.

NOTE–Requests for Flight Standards approval must be coordinated with AFS–460 as soon as the requirement is known. For example, it is known that a temporary crane affecting an IFP(s) will be in place for 10 months as soon as it is erected; therefore, forward the approval request for extension immediately.

c. Permanent conditions. When the condition requiring NOTAM action is known to be permanent or is expected to be effective for more than four charting cycles (224 days), a permanent NOTAM is used to promulgate amended SIAPs and textual ODPs as well as correction information for U.S. Government aeronautical charts.

1. Identify permanent NOTAMs by inserting “PERM,” meaning the condition is permanent, instead of an actual date/time group. Procedural amendments may be charted from the permanent NOTAM information and may also be used as a substitute for the abbreviated amendment process within the limitations specified in Order 8260.19.

2. IFP permanent NOTAMs contain information that is complete for charting purposes and are promulgated in the bi–weekly Transmittal Letter (TL) with a specified procedure amendment date that is coincidental with an international Aeronautical Information Regulation and Control (AIRAC) charting date.
3. Permanent NOTAMs may only be used for SIAPs, textual ODPs, and to correct U.S. Government charting printing and compilation errors. Permanent NOTAMs must not be used for changes to Special IFPs, ATS routes, graphic ODPs, SIDs, and STARs.

4. Permanent NOTAMs may be used to amend procedures without a complete review of the procedure. The amendment will be indicated by an alphanumeric identifier; e.g., Orig–A, Amdt 3B, Amdt 4C, etc.

5. Only one procedure may be addressed per Permanent NOTAM except that a single P NOTAM may be used for ILS CAT I/II/III and SA CAT I/II procedures to the same runway. A single Permanent NOTAM may also address multiple procedures at a single location when correcting a common printing error on U.S. Government charts.

6. A hard/electronic copy of each Permanent NOTAM must be stored with the current amendment and maintained in the procedures file by both the NFDC and AIS for each procedure until the next full amendment is effective.

7. Permanent NOTAMs must not be used for RNAV/database driven procedures when the change(s) will affect waypoint coordinates, course (track), distances, or bearings.

8. The Permanent NOTAM originator must coordinate a procedure amendment date with AIS for inclusion in the Transmittal Letter. This will ensure that all charting agencies publish the amended procedure on the same AIRAC chart cycle and with the same procedure amendment date.

9. Each AIRAC cycle is limited to no more than 150 Permanent NOTAMs, except for Flight Standards directed safety initiatives or national implementation processes. Whenever the 150 P NOTAM limit must be exceeded, AIS is responsible for coordinating with other charting agencies; e.g., Jeppesen, LIDO, etc., to ensure they can accommodate the necessary changes on the required AIRAC date.

10. Permanent NOTAMs must be canceled when the applicable procedural change has been published.

11. When a Permanent NOTAM is originated to permanently amend a SIAP or textual ODP, “PERM” must be inserted as the expiration date in lieu of a 10-digit date–time group. The NOTAM originator is responsible for cancelling the NOTAM upon publication.

12. A NOTAM will auto–expire at the expiration DTG unless “PERM” is used.

d. NOTAM Procedures:

The applicable keyword (ODP, SID, STAR, CHART, DATA, IAP, VFP, ROUTE, or SPECIAL) will be included immediately following the location identifier designator.

1. Standard instrument approach procedure and special instrument flight procedure format:

   (a) For SIDs and STARs serving multiple airports, a separate FDC NOTAM must be prepared for each airport affected by the procedure. Permanent NOTAMs must not be used as a source to effect charting changes for these procedures. Procedural NOTAMS are originated by FAA Flight Operations and FAA Flight Inspection and Procedures personnel and are transmitted to the NS. When these revisions cannot be published in advance of their effective date, the NOTAM is transmitted as an FDC NOTAM.

   (b) Permanent procedural changes to graphic ODPs and SIDs must be made via a new or amended 8260–15 series form [see 8260–17 series forms for STARs] within 224 days of the issuance of the associated NOTAM.

   (c) Form 8260–17.1, Standard Terminal Arrival [and Form 8260–17.2, STAR (Data Record) for RNAV STARs] must be submitted for permanent charting changes. NOTAMs on STARs must not exceed 224 days [see paragraph 2–6–3.a].

e. Instrument Flight Procedure NOTAMs. A complete review and a new amendment are the preferred methodology for permanent procedure changes, particularly when applying new or revised Order 8260.3 criteria. However, it is recognized that this may not always be possible due to time constraints, workload, staffing level,
etc. Abbreviated 8260–series forms and/or Permanent NOTAMs have proven to be an effective means of updating aeronautical charts and amending instrument flight procedures within the following guidelines:

1. Whenever the need for a NOTAM to a procedure arises, AIS, or the non–FAA service provider must review the procedure and ascertain that there is no other safety of flight changes required. If a Permanent NOTAM is required to amend a SIAP or textual ODP for safety reasons, other items may be included in the NOTAM to simultaneously update procedure charts.

2. Procedural minimums must not be lowered by NOTAM except when returning minimums to their previously published level at the end of a temporary condition. Refer to Order 8260.19, Flight Procedures and Airspace, chapter 8, for conditions pertaining to IFP NOTAMs when amending an instrument flight procedure.

3. Exercise caution in initiating or adding a NOTAM to a procedure when there is already a current NOTAM in effect for the procedure. In many cases close follow-up action, including canceling and reissuing NOTAMs, will be necessary to ensure there is no confusion for pilots and chart producers. All FDC NOTAMs must be issued against the currently published procedure.

4. When a NOTAM D is issued closing an airport permanently, an FDC NOTAM need not be issued denying use of an IFP. A routine procedure cancellation should be processed.

5. When a NOTAM D is issued to shut down a facility permanently, only routine cancellations of procedures predicated on that facility are required. FDC NOTAMs may be required for other procedures supported by the affected facility.

6. When a NOTAM D is issued closing a runway, an FDC NOTAM need not be issued denying approach or departure minimums to that runway. If the closing is permanent, routine procedure cancellations, including takeoff/departure procedures, must be processed immediately.

7. When a NOTAM D is issued for a facility shutdown or outage, an FDC NOTAM denying IFP use is not required for those IFPs using only that facility. However, other IFPs in the vicinity must be reviewed to determine if that facility supports courses or fixes; in such cases, those IFPs require an FDC NOTAM. Particular attention must be given to fixes supporting stepdown minimums and missed approach procedures, which are predicated on the out of service facility. It is not necessary to issue NOTAMs for fixes and terminal route segments that are related to unusable airway segments from the subject facility. Do not issue “Radar Required” NOTAMs on unusable or restricted ATS route segments. Also, see Order 8260.19, paragraph 4–3–3, for ILS CAT II/III NOTAM restrictions.

8. When a NOTAM D removes a localizer from service, the ILS approach is unusable. If the glide slope (GS) is out, the precision approach is unusable. If other ILS components are out, the inoperative table applies. In these instances, an FDC NOTAM for the ILS approach is not required.

f. Chart correction NOTAMs. FDC NOTAMs to correct U.S. Government chart printing or compilation errors are issued by AIS. If the NOTAM is used to correct an IFP, specify the location identifier of the airport affected by the procedure, the full procedure title and amendment number (if applicable). If the NOTAM is used to correct a map; e.g., VFR sectional chart, IFR enroute chart, etc., use “FDC” as the location identifier. The first word in the NOTAM text should be “correct.”

g. RNAV substitution. Properly equipped aircraft may substitute RNAV systems for inoperative ground NAVAIDs; however, RNAV systems must not be substituted for NAVAIDs providing final approach course guidance on instrument approach procedures.

1. When the use of an instrument approach procedure, departure procedure (SID or ODP), or STAR is restricted or prohibited by NOTAM because of a NAVAID (VOR, TACAN, NDB, compass locator, or DME) outage, the NOTAM does not apply to aircraft equipped with suitable global positioning system (GPS) RNAV. For clarification, state the reason for the restriction in the text of the procedural FDC NOTAM.

2. In certain circumstances, AFS–400 may determine that the use of RNAV systems that utilize DME/DME/inertial reference unit (IRU) inputs should be allowed [see Order 8260.19, paragraph 4–6–9, for
Transmitting FDC NOTAM Data

7930.2R

additional information/requirements]. In these instances, AFS–400 will advise AIS by e–mail or memorandum to insert the phrase “OR DME/DME/IRU” after “SUITEABLE RNAV SYSTEM WITH GPS.” Include in the NOTAM any required DME facilities, as provided by AFS–400 to support DME/DME/IRU operations.

**h. Air Traffic Service Route NOTAMs.** Under 14 CFR part 71.13, the term “ATS route” refers to a variety of routes, including airways, jet routes, and RNAV routes. When a restriction or a change to an ATS route requires a NOTAM, AIS must prepare and forward an FDC T–NOTAM following the procedures in paragraph 7–1–3. b.

1. ATS Route changes involving a single state and one or more ARTCCs must be issued with the ARTCC identifier followed by the two–letter state code. The two–letter state code must also follow all NAVAID and fix designators.

2. If the ATS Route NOTAM affects one, two, or three ARTCCs and multiple states, issue a separate NOTAM for each affected ARTCC. Do not include two–letter state codes if more than one state is involved.

3. If the NOTAM affects four or more ARTCCs, send one NOTAM using “FDC” as the facility identifier.

4. If the restriction will exceed the 224–day time limit, a procedure amendment (revised 8250–series form or permanent NOTAM) must be submitted as soon as possible to allow publication of the change within the 224–day timeframe.

**i. FDC NOTAMs for Special Instrument Approach Procedures (Specials).** FDC T NOTAMs may also be used to promulgate safety of flight information relating to Specials provided the location has a valid landing area identifier and is serviced by the NS.

1. If the Special is maintained by AIS or a non–FAA service provider and the location is in the NS, then procedures for NOTAM processing will be similar to the procedures used for public, 14 CFR part 97 instrument approach procedures. When preparing the NOTAM for submission, include the keyword “Special” immediately following the three or four character location identifier. (!FDC PAJN SPECIAL…)

2. AIS/non–FAA service providers will notify the RNGB as soon as practicable when a NOTAM has been issued.

**NOTE**
*For AIS maintained procedures, after duty hours, contact the stand–by AIS representative at (405) 954 8260.*

3. If the Special procedure location is not in the NS, whomever is responsible for maintaining the procedure will notify the applicable RNGB of the change/outage. The RNGB must contact the user(s) of the procedure to disseminate appropriate action; (e.g., NA the procedure, raise applicable minimums, etc.)

4. Non–FAA service providers must notify Flight Inspection Services of the change/outage if flight inspection is responsible for conducting flight inspection/validation activities.

**j. NOTAM content.**

1. FDC SIAP and textual departure NOTAMs must identify the procedure being amended and the current amendment number. NOTAMs for graphic ODPs, SIDs, and STARs must reflect the current procedure identification, including number. The NOTAM must be as concise as possible.

2. The issuing authority must prepare the NOTAM using plain language text and those contractions found in Order JO 7340.2 and those contractions and abbreviations used on IFP charts. Specialists must keep in mind that the NOTAM is directed to the pilot, and should be worded so that the intended change will not be misinterpreted. Avoid the use of internal cartographic instructions that have no meaning to pilots. Spell out NAVAID names in clear text followed by the identifier. If it appears that the NOTAM length will exceed 20 lines, call the USNOF at (888)–876–6826 for assistance and guidance [see Order JO 7930.2].

3. For temporary obstructions, include the type, elevation, distance, and direction from the airport or runway threshold, as appropriate, as the last line of the NOTAM text. Do not preface this information with “Chart:”
4. Include a reason for the NOTAM following the NOTAM text. This information will not be transmitted as a part of the NOTAM text, but will inform the NFDC and the USNOF of the basis for the NOTAM. It will also ensure the data is retained in the NOTAM historical files.

7–1–4. HIGH BAROMETRIC PRESSURE WARNING

When requested by a Flight Standards District office, the USNOF will ensure an FDC NOTAM is issued.

REFERENCE

14 CFR Part 91.144 and FAAO 7110.10, Flight Services, Chapter 4

7–1–5. TEMPORARY FLIGHT RESTRICTIONS

a. Through system interface, the NOTAM requestor must forward the NOTAM information directly to the USNOF for FDC NOTAM issuance and to the FSS nearest the incident site for coordination purposes. The NS disseminates FDC NOTAMs, and the FSS must act as “coordination facility” for preflight briefings for the ARTCC. The NOTAM must follow 4-2-1 b 1-2, including

1. ARTCC designator/location (mandatory) followed by the state(s) abbreviation; for example: ZDC VA.
2. Keyword “AIRSPACE.”
3. City/Location(s), State(s) for each area; for example: Detroit, MI Ann Arbor, MI.; Beale AFB, CA.; Libby AAF, AZ.; Hibbing, MN.; Fargo, ND.
4. Description of activity: “TEMPORARY FLIGHT RESTRICTIONS.”
5. Plain language effective date; for example, February 26, 2014 LOCAL (applicable to 14 CFR Sections 91.141 and 99.7 only).
6. The phrase “PURSUANT TO TITLE 14 CFR SECTION 9X.XXX...(the appropriate paragraph and sub-paragraph number) (plain language text, as needed). Include the phrase “PURSUANT TO 49 USC (section)...” as required for 14 CFR Sections 91.141 and 99.7 only.
7. Description of area or areas impacted; each area will contain:
   (a) Stated as “WI AN AREA DEFINED AS...” and if appropriate “…TO POINT OF ORIGIN.” The area is defined as a nautical mile radius of a latitude/longitude, or an area defined by latitude/longitude or fixes. As necessary, include an alternate description as a fix/radial/distance in parentheses, to help clarify the location. For example, X (alt X) TO Y (alt Y) TO Z (alt Z).
   (b) Lower limit then upper limit, or height, (when needed). Limits must be specified, as:
      (1) For SFC, or 1 to 17,999FT with the unit of measurement (AGL or MSL). 1275FT AGL, 10500FT MSL.
      (2) For 18,000FT and above, express in flight levels (FL), FL180, FL250, FL850, or UNL (altitudes greater than 99,900).
      (3) Heights AGL may be added, for example, SFC-450FT AGL.
   (c) Schedule of individual area, if needed. For example, EFFECTIVE 1402271900 UTC (1400 LOCAL 2/27/14) UNTIL 1402280200 UTC (2100 LOCAL 2/27/14). If a daily (or MON WED FRI) time is required, DLY 1900-0200 (1400-2100 LOCAL).

NOTE– Repeat 9 (a)-(c), as necessary, for each defined area.
8. Reason or purpose (when needed).
9. The FAA coordination facility and commercial telephone number.
10. Remarks (when needed). Include other information that is required or considered to be important to the pilot. Do not use the 1–800–WX–BRIEF telephone number for the flight service stations.
   b. Flight restrictions in the proximity of the President or other parties (14 CFR Section 91.141) or Special Security Instructions (14 CFR Section 99.7) will be issued by System Operations Services, System Operations Security, and System Operations Support Center (SOSC). Operational requirements may necessitate a change in format to Presidential and Special Security Instructions TFRs at any time.

   1. Multiple areas may be specified in one NOTAM when the areas are in the same ARTCC airspace.

   2. The requirement for one effective period per NOTAM is waived for NOTAMs advertising flight restrictions in the proximity of the President or other parties. See paragraph 4-1-2.

7–1–6. AIR DEFENSE EMERGENCY

When an air defense emergency is declared and Emergency Security Control of Air Traffic (ESCAT) has been implemented, an FDC NOTAM will be issued in accordance with procedures in FAA Order JO 7610.4, Special Operations, Chapter 6, Emergency Security Control of Air Traffic. NOTAMs advertising an air defense emergency must use accountability FDC, location identifier FDC, and be preceded by keyword “SECURITY.”

REFERENCE—
FAAO JO 7610.4, Chapter 6, Emergency Security Control of Air Traffic (ESCAT), and Appendix 17, Emergency Security Control of Air Traffic (ESCAT).

7–1–7. SPECIAL DATA

When special data NOTAMs must be issued (for example, Department of State information and special air traffic programs for national security, aviation security, and law enforcement, etc.), an FDC NOTAM is issued by the USNOF using the keyword “SECURITY.” Issue the NOTAM with PERM instead of a cancellation date and cancel the NOTAM only at the request of the originating office, System Operations Security.

NOTE—

7–1–8. LASER LIGHT ACTIVITY

The service area office where the laser activity will occur must notify the USNOF via telephone (888) 876–6826 or email (9-AWA-NOTAMS@FAA.GOV) within 7 days of a proposed activity. Additionally, service area offices, when coordinated with their respective ATC facilities, may delegate notification responsibility. The USNOF will transmit the appropriate FDC NOTAM. If the event is canceled prior to the scheduled ending date/time, the service area office or their designee must notify the USNOF to cancel the NOTAM.

Follow 4-2-1 b 1-2, including:

   a. ARTCC designator (mandatory) followed by the state abbreviation.
   b. Keyword “AIRSPACE.”
   c. City/state.
   d. Description of activity; for example, “LASER LIGHT ACTIVITY.”
   e. Description of area impacted; describe the area using radius and latitude/longitude.
   f. Alternate description. In parentheses, specify area impacted in reference to a fix/radial/DME.
   g. Altitudes impacted. Must include lower limit and upper limit.
   h. Follow 4-2-1 b 11-14 to complete the NOTAM.
Section 2. Cancellation/Expiration

7–2–1. FDC NOTAM EXPIRATION/CANCELLATION

a. The FDC NOTAM originator is responsible for canceling FDC NOTAM prior to end of validity; otherwise, the NOTAM cancellation is automatically processed.

b. When a new FDC NOTAM is issued to correct or in any way change a previously issued FDC NOTAM, a new NOTAM will be issued, and a separate cancellation NOTAM will be issued to cancel the old NOTAM.
Chapter 8. International NOTAMs

Section 1. General Procedures

8–1–1. INTERNATIONAL NOTAMs

a. Appendix B, International NOTAM (Q) Codes, contains the NOTAM codes used for international NOTAMs.

b. International NOTAM offices that provide NOTAMs to the U.S. NOTAM office are listed in ICAO DOC 7383.

c. International NOTAMs transmitted and received by the U.S. NOTAM Office are stored in the NS, and while current, may be retrieved by both Aeronautical Fixed Telecommunication Network subscribers and FAA facilities via request/reply. All facilities must use their particular equipment’s keyboard equivalent of the closed parenthesis or the equal symbol as appropriate.

d. The USNOF issues international NOTAMs concerning the GPS systems as well as certain special activity airspace for ARTCCs; that is, ARTCC and CARF altitude reservations (ALTRVs) and warning areas. Warning areas and ALTRVs are filed under the associated ARTCC ICAO location indicator (KZBW, KZHU, KZJX, KZLA, KZMA, KZNY, KZOA, KZSE, PZA, PHZH, or TJSZ). Information concerning permanent, long-term general data and selected foreign advisories are stored under KFDC location indicator. GPS information is stored under KNMH.

e. United States International Security NOTAMs are issued under the accountability/location identifier of “KICZ” by the USNOF, using the keyword “SECURITY” in item E) of the international NOTAM based on need by the requesting office, System Operations Security. Issue the NOTAM with PERM instead of a cancellation date and cancel the NOTAM only at the request of the originating office, System Operations Security.

8–1–2. INTERNATIONAL NOTAM DATA FORMAT

a. The format of international NOTAMs with set fields and information is shown in TBL 8–1–1.

**NOTE**—

NOTAMR (NOTAM replacement) and NOTAMC (NOTAM cancellation) are valid contractions and will be followed by another NOTAM number that is being replaced or canceled.
Section 2. Procedures For Canadian NOTAMs

8–2–1. REQUEST FOR CANADIAN NOTAMs FROM THE CANADIAN NOTAM SYSTEM

a. The NS receives NOTAM data from Canada. The NS cannot confirm that they have all NOTAM data; therefore, you are urged to contact the Canadian Web site for the most current and up-to-date NOTAM data.

http://www.flightplanning.navcanada.ca

NOTE—
Altitude reservations will be input by Canada utilizing FIR ACCOUNTABILITIES.

b. Canadian NOTAMs are available via the NADIN system from the Canadian NOTAM System Computer for automated retrieval.

…AD AP CLSD EXC HI–WING ACFT…
…AD HELIPORT CLSD…
…AD SEAPLANE BASE CLSD…
…AD AP OPN…

NOTE–
OPN is only an acceptable condition when the airport is published as being closed.
…AD AP NOW PUBLIC…

NOTE–
This airport is now open to the public as a public–use airport.
…AD AP NOW PRIVATE…

NOTE–
This airport is now closed to the public and is no longer a public–use airport. The NFDC must contact the USNOF to have the airport deleted from the NOTAM tables after the NOTAM has been canceled.

2. Commissioning

| Movement Area – Surface: | ASPH | asphalt/tar/macadam |

Examples
### EXAMPLES –

...RWY 01L/19R COMMISSIONED 10301FT X 150FT CONC LGTD. DECLARED DIST: RWY 01L TORA 10301FT TODA 10301FT ASDA 10301FT LDA 10301FT. RWY 19R TORA 10301FT TODA 10301FT ASDA 10301FT LDA 10301FT. RWY 18/36 COMMISSIONED 10301FT X 150FT CONC LGTD. DECLARED DIST: RWY 18/36 TORA 10301FT TODA 10301FT ASDA 10301FT LDA 10301FT.

...TWY M8 COMMISSIONED 500FT X 75FT CONC LGTD...

#### 3. Closure of a movement area or portion thereof.

### EXAMPLES –

...APRON ALL CLSD...

...APRON NORTH APN E 50FT CLSD...

...TWY A3, A4, A5, TWY A BTN TWY A2 AND TWY A3 CLSD...

...TWY ALL CLSD...

...TWY B, C, D, TWY P BTN TWY EL AND TWY B, TWY P BTN TWY A AND TWY ER, TWY ER BTN RWY 17C/35C AND TWY Q CLSD...

...TWY PARL TWY ADJ RWY 09/27 CLSD...

...TWY PARL TWY CLSD...

**NOTE**–

One unnamed parallel taxiway exists at this airport.

...RWY 36 CLSD...

...RWY 02 FIRST 1000FT CLSD EXC TAX...

**NOTE**–

The first 1000 feet for runway 02 is closed, except it is available for taxiing aircraft. This is used for single runway only. If both runways were affected, the NOTAM would state ...02/20 N 1000FT...

...RWY 06/24 CLSD EXC 1HR PPR 303–627–3001...

**NOTE**–

Runways 06 and 24 are closed except by 1–hour prior permission from that telephone number during the times stated.

...APRON NORTH APN CLSD RESURFACING...

### EXAMPLES –

...TWY C CLSD 1309041800–PERM

...RWY 17/35 CLSD 1310122330–PERM

...TWY Y BTN TWY Q AND RWY 10/28 NONMOVEMENT AREA...

#### 4. Operational limitations

### EXAMPLE –

...RWY 18/36 CLSD TO JET...

**NOTE**–

Runways 18 and 36 are closed to jet aircraft.

### EXAMPLE –

...RWY 09/27 CLSD EXC ACFT MORE THAN 13500LB...

**NOTE**–

Runways 09 and 27 are closed to all aircraft weighing less than 13,500 pounds. Do not use class of aircraft when closing runways. Always use aircraft weight.

### EXAMPLE –

...RWY 10/28 E 3800FT CLSD TO ACFT LESS THAN 12500LB...

**NOTE**–

Runways 10 and 28 cast 3800 feet are closed to all aircraft weighing less than 12,500 pounds.
EXAMPLE—
…RWY 16/34 CLSD TO ACFT WINGSPAN MORE THAN 70FT AND TAIL HEIGHT MORE THAN 49FT…

NOTE—
Runways 16 and 34 are closed to aircraft with a wingspan more than 70 feet and is also closed to aircraft with tail height more than 49 feet.

EXAMPLES—
…RWY 05 CLSD TO LDG…
…RWY 03 CLSD TO TKOF…
…RWY 08/26 CLSD TO TGL…
…RWY 01/19 CLSD EXC XNG…

5. Changes to usable runway length and declared distances

EXAMPLES—
…RWY 19 THR DISPLACED 300FT MARKING NOT STD. DECLARED DIST: TORA 6827FT TODA 6827FT ASDA 6827FT LDA 6527FT. …
…RWY 01 DECLARED DIST: TORA 6827FT TODA 6827FT ASDA 6527FT LDA 6527FT. …

NOTE—
Runway 19 threshold is displaced 300 feet, therefore the Runway 19 landing LDA is shortened by 300 feet. The LDA and ASDA for Runway 1 are also shortened by 300 feet.

EXAMPLE—
…RWY 05/23 NE 500FT CLSD. DECLARED DIST: RWY 05 TORA 7002FT TODA 7002FT ASDA 7002FT LDA 7002FT. RWY 23 TORA 7002FT TODA 7002FT ASDA 7002FT LDA 7002FT. …

NOTE—
Construction on Runway 05 requires 500 feet to be closed to protect a construction area thus changing declared distances to Runways 05 and 23.

EXAMPLE—
…RWY 08/26 CHANGED TO 10000FT X 150FT. DECLARED DIST: RWY 08 TORA 9000FT TODA 9000FT ADSA 9000FT LDA 9000FT. RWY 26 TORA 9000FT TODA 9000FT ASDA 9400FT LDA 10000FT. 

EXAMPLE—
…RWY 13/31 CHANGED TO RWY 14/32…

NOTE—
Runway 13/31 is permanently changed to this new identify. If the change was temporary, NOW would have been used.

7. Change of traffic pattern.

EXAMPLE—
…RWY 03L RIGHT TFC PATTERN…

EXAMPLES—
…RWY 10 RVRT OUT OF SERVICE …
…AD AP RVR ALL OUT OF SERVICE…

9. Surface Markings and Signage

EXAMPLES—
…AD AP SIGNS ALL OBSC…
…RWY 21 4000FT DIST REMAINING SIGN NOT LGTD…
…TWY U7 HLGD PSN SIGN FOR RWY 01L/19R NOT LGTD…
…TWY ALL SFC PAINTED HLGD PSN SIGNS NOT STD DUE TO REPAINING…
…RWY 01/19 SFC MARKING NOT STD…

10. Other reportable conditions.

EXAMPLES—
…RWY 01/19 3FT SNOWBANKS ADJ…
APRON MAIN RAMP 6FT SN PILES ADJ E SIDE
TWY A 3FT SNOWBANKS NORTH 500FT
AD AP SFC CONDITIONS NOT REPORTED
RWY 31C ENGINEERED MATERIAL ARST SYSTEM NOT STD
RWY 31C ENGINEERED MATERIAL ARST SYSTEM OUT OF SERVICE
AD AP CARIBOU NEAR MOVEMENT AREAS
AD AP BIRD ACT INCREASED NW SIDE
RWY 02R/20L S 2600FT FROST HEAVES
RWY 12/30 NUMEROUS SIN CRACKS
RWY 01/19 SAFETY AREA BTN TWY C AND TWY B IRREGULAR SFC
RWY 01/19 SOFT
NOTE— Runway 01/19 is a turf runway that gets soft during the melting of snow or rainy seasons.
RWY 06/24 W 1000FT IRREGULAR SFC 4IN DPT X 12IN WID X 24FT LEN
NOTE— In this example, the irregular surface affects the west 1000ft and is 4 inches deep, 12 inches wide and 24 feet long—within the surface itself. NOTAM format for temporary field conditions (FICON) caused by weather phenomena are covered in Paragraph 5–1–4, Reporting of Field Conditions.

5–1–4. FIELD CONDITIONS REPORTING

EXAMPLE—!
LGA LGA RWY 13 FICON 1/1/1 100 PRCT WET ICE OBSERVED AT 1701040230. CONDITIONS NOT MNT 1701040300–1701061045. 1701040253–1701061115
NOTE—
1. Runway 13 is the landing runway and is 95% covered by wet ice but the Runway Condition Code(RwyCC) has been upgraded to a 1 for all of the runway thirds. The field conditions are not monitored from January 4, 2017 0300UTC January 6, 2017 1045UTC. The airport operator expects to have a new NOTAM submitted by January 6, 2017 1115UTC.
2. This will be the only example reflecting times. All FICON NOTAMs have “OBSERVED AT” and effective/expiration times but not all have “CONDITIONS NOT MNT”.
3. The percentage of coverage described in the note after each example falls within the ranges found in TBL 5–1–4, Percent Coverage of a Contaminant.
EXAMPLE—
RWY 31 FICON 25 PRCT WET ICE
NOTE—
Runway 31 is the landing runway and has 22% coverage of wet ice. The RwyCC is not displayed because there is ≤25% total surface coverage by the contaminant.
EXAMPLE—
RWY 10 FICON 1/1/1 100 PRCT 1/4IN DRY SN AND ICE
NOTE—
Runway 10 is the landing runway and is completely covered by one–quarter inch of dry snow and ice and the RwyCC was upgraded to one for each third.
EXAMPLE—
TWY C, C1, C6, TWY D BTN RWY 13/31 AND TWY C FICON 1/2IN DRY SN OVER ICE
NOTE—
A number of taxiways have one half inch of dry snow over ice. The depth of the contaminant on an apron/ramp is not required when reporting the conditions of airports that are non–part 39 or not federally obligated.
EXAMPLE—
RWY 16 FICON 1/1/1 75 PRCT ICE
NOTE—
Runway 16 is the landing runway and is 71% covered in ice. The depth of the ice is not reported.
EXAMPLE—
RWY 29 FICON 10 PRCT COMPACTED SN
NOTE—
Runway 29 is the landing runway and is 5% covered by compacted snow. The depth of the compacted snow is not reported. The RwyCC is not displayed because there is ≤25% total surface coverage by the contaminant.

EXAMPLE—
…RWY 08 FICON 5/5/5 100 PRCT 1/8IN WET SN…

NOTE—
Runway 08 is the landing runway and is 97% covered with one eighth inch (3mm) depth or less of wet snow.

EXAMPLE—
…RWY 28 FICON 3/3/3 100 PRCT 2IN DRY SN OVER COMPACTED SN…

NOTE—
Runway 28 is the landing runway and is completely covered by two inches of dry snow over compacted snow. The depth of compacted snow is not reported.

EXAMPLE—
…APRON FEDEX FEEDER RAMP FICON 2IN DRY SN…

NOTE—
The FedEx Feeder ramp is covered by two inches of dry snow. The depth of the contaminant on an apron/ramp is not required when reporting the conditions of airports that are non-part 39 or not federally obligated.

EXAMPLE—
…APRON AIR CARGO APN FICON 1IN WET SN…

NOTE—
The Air Cargo apron has one inch of wet snow.

EXAMPLE—
…RWY 34 FICON 5/5/5 100 PRCT WET PLOWED 50FT WID REMAINDER 4IN WET SN…

NOTE—
Runway 34 is the landing runway and is wider than fifty feet; the center fifty feet has been plowed leaving the plowed surface completely wet and the remaining surface outside of the plowed area is covered by 4 inches of wet snow.

EXAMPLE—
…RWY 01 FICON 4/4/3 25 PRCT COMPACTED SN, 25 PRCT COMPACTED SN, 100 PRCT 8IN DRY SN SWEPT 75FT WID REMAINDER 8IN DRY SN…

NOTE—
Runway 01 is the landing runway and is one hundred feet wide, the center seventy five feet has been swept. The temperature is −15°C or colder. The first two thirds or the runway have 25% coverage of compacted snow. The final third of the runway is completely covered by eight inches of dry snow. The remaining area of the first two thirds of runway 01 is completely covered by eight inches of dry snow.

EXAMPLE—
…TWY ALL FICON DRY PLOWED 50FT WID REMAINDER 6IN DRY SN…

NOTE—
All taxiways are plowed 50 feet wide and are dry. The part that has not been plowed has 6 inches dry snow.

EXAMPLE—
…RWY 16 FICON 4/4/4 100 PRCT COMPACTED SN PLOWED 75FT WID REMAINDER 1/2IN DRY SN OVER COMPACTED SN…

NOTE—
Runway 16 is the landing runway and is wider than seventy five feet; the center 75 feet has been plowed. The temperature is −15°C or colder. The plowed portion is 95% covered by compacted snow. The area that has not been plowed has one half inch dry snow over compacted snow. The depth is not reported for compacted snow.

Snowbanks, Berms

EXAMPLE—
…RWY 16 FICON 3/3/3 100 PRCT COMPACTED SN 12IN SNOWBANKS…

NOTE—
Runway 16 is the landing runway and has been plowed and swept in its entirety; therefore, neither “PLOWED” nor
“SWEPT” is used. The temperature is warmer than $-15^\circ C$. The runway is 100% covered with compacted snow and has 12-inch snowbanks.

**EXAMPLE**—
…RWY 33 FICON 4/4/4 100 PRCT COMPACTED SN PLOWED 100FT WID 24IN BERMS…

**NOTE**—
Runway 33 is the landing runway and has been plowed 100 feet wide leaving 100% coverage of compacted snow on the runway. The temperature is $-15^\circ C$ or colder. The depth of the compacted snow is not reported, however 24-inch berms are also observed along the edges of the plowed area.

**EXAMPLE**—
…TWY ALL FICON WET 4FT SNOWBANKS…

**NOTE**—
All of the taxiways are wet with snowbanks reaching 4 feet in depth off the edge of the paved surface.

**Ice Contaminants**

**EXAMPLE**—
…RWY 01 FICON 1/2/2 100 PRCT ICE, 100 PRCT 1IN SLUSH, 100 PRCT 1IN SLUSH…

**NOTE**—
Runway 01 is the landing runway and the first third is 92% covered with ice. The remaining two thirds are 100% covered in one inch of slush.

**EXAMPLE**—
…APRON FEDEX FEEDER RAMP FICON ICE…

**NOTE**—
The FedEx Feeder Ramp is covered with ice. The depth of ice is not reported.

**EXAMPLE**—
…RWY 25 FICON 5/5/5 75 PRCT WET AND 25 PRCT ICE, 100 PRCT WET, 100 PRCT WET…

**NOTE**—
Runway 25 is the landing runway and the first third of the runway is 71% percent wet and 21% ice covered. The remaining two thirds of the runway are completely covered by visible moisture, described as “WET.”

**Wet**

**EXAMPLE**—
…RWY 10 FICON 5/5/5 100 PRCT WET…

**NOTE**—
Runway 10 is the landing runway and is 100% covered by visible moisture with 1/8 inch (3mm) depth or less of water.

**Frost**

**EXAMPLE**—
…TWY ALL FICON FROST…

**NOTE**—
Frost is observed completely covering all taxiways.

**Slush Contaminants**

**EXAMPLE**—
…TWY ALL EXC TWY G FICON 3IN SLUSH…

**NOTE**—
All of the taxiways except taxiway G, are completely covered by three inches of slush. The depth of the contaminant is not required when reporting the conditions of airports that are non–part 139 or not federally obligated.

**Drift**

**EXAMPLE**—
…RWY 03R FICON 3/3/3 100 PRCT 4IN DRY SN 9IN DRIFTS…

**NOTE**—
Runway 03R is the landing runway and is 95% covered with 4 inches of dry snow and 9inch snow drifts.
Runway 04 is the landing runway and is contaminant free; however, there are five-inch snow drifts on the surface. The term DRIFTS means one or more snow drifts and is not considered a contaminant.

Sanded, as treatment of the surface

Runway 36 is the landing runway and is 100% covered by ice and has been treated full length and width with sand. The depth of ice is not reported.

Runway 11 is wider than eighty feet, is the landing runway and is 98% covered with 1/8 inch (3mm) depth or less of dry snow and also has been treated with sand eighty feet wide.

Deiced, as treatment of the surface

Runway 30 is the landing runway and is 91% wet and has also been treated with a liquid deicing chemical.

Miscellaneous (ash, mud, rubber, sand)

Runway 01R is the landing runway and the first third of the runway is 45% covered with 2 inches of mud. The remaining two thirds of the runway are contaminant free. When mud is listed as a contaminant there will be no RwyCC generated.

Runway 01L is the landing runway and is 100% covered with volcanic ash.

Slippery When Wet

The north 800 feet of runway 01/19 is covered by rubber. Although the rubber is only observed at the approach end of Runway 01, when rubber is on a runway surface, the entire surface is reported as slippery when wet. This is the only contaminant that is reported using both runway designators.

Braking Action

This runway is a non-paved surface.

5–1–5. AERODROME FACILITIES

a. Certified Aircraft Rescue and Fire Fighting (ARFF).
EXAMPLES—
...AD AP ARFF VEHICLE OUT OF SERVICE INDEX UNCHANGED...
...AD AP ARFF NOW INDEX A...

NOTE—
Even though the ARFF index is now A, four or less Index B aircraft may still operate into the airport.

EXAMPLE—
...AD AP ARFF INDEX A NOT AVBL AND AP CLSD TO AIR CARRIER OPS...

b. Fuel services.

EXAMPLES—
...AD AP 100LL FUEL NOT AVBL...
...AD AP MOBILE JET A FUEL NOT AVBL...
...AD AP HYDRANT MOGAS FUEL NOT AVBL...
...AD AP SELF SERVE 100LL FUEL NOT AVBL...
...AD AP FUEL NOT AVBL...

c. Custom Services

EXAMPLE—
...AD AP CUST PROCESSING DLA DUE TO CAPACITY, INTL CARRIERS MAY EXPERIENCE SIGNIFICANT DLA IN CLEARING CUST, CTC AP MANAGEMENT AT XXX–XXX–XXXX...

d. Aerodrome beacon (ABN)

EXAMPLES—
...AD AP ABN OUT OF SERVICE...
...AD AP ABN NOT STD GREEN ONLY...

e. Wind direction equipment.

EXAMPLES—
...AD AP WDI UNREL...
...AD AP WINDCONE LGT OUT OF SERVICE...
...AD AP WINDCONE OBST LGT OUT OF SERVICE...
...AD AP WINDCONE FOR RWY 17L LEFT SIDE OUT OF SERVICE...

5–1–6. WORK IN PROGRESS

EXAMPLES—
...RWY 01L/19R WIP...
...TWY E BTN RWY 05/23 AND TWY B WIP RESURFACING...
...TWY B BTN RWY 14/32 AND TWY A WIP TRENCHING ADJ EAST SIDE...
...APRON FEDEX FEEDER RAMP W 1000FT WIP RESURFACING...
...RWY 03/21 NE 1000FT WIP LGT REPLACEMENT...
...RWY 01L/19R NE 500FT WIP MOWING ADJ...
...RWY 01L/19R SAFETY AREA WIP MAINT VEHICLES E SIDE...
...AD AP ALL SFC WIP SN REMOVAL...
...RWY 01L/19R WIP SN REMOVAL...
...TWY D4, D5, D6, TWY B BTN RWY 13/31 AND TWY D, TWY D WEST OF RWY 05/23 WIP SN REMOVAL...

5–2–1. LIGHTING AIDS

a. Approach light systems (ALS). Only use the runway direction for which the equipment pertains.

1. When commissioning approach light systems, indicate the exact type of system; for example, MALSR, MALSF, etc

EXAMPLE—
...RWY 12 MALSR COMMISSIONED...

2. Once commissioned and published, approach light systems need only be shown as ALS.
EXAMPLES—
…RWY 36 ALS DECOMMISSIONED…
…RWY 18 ALS OUT OF SERVICE…
…RWY 22 CHANGE ALL REF ALSF−1 TO SSALR…

NOTE—
ALSF−1 is the type of approach lighting at that airport.

EXAMPLES—
…RWY 22 ALS OUT OF SERVICE EXC MEDIUM INTST ON CONS…

b. Lead off /lead on lights. NOTAMs issued using keyword RWY

NOTE—
Lead off and lead on light will be the standardized verbiage for lead off/on lights, which are sometimes referred to as turnoff lights.

EXAMPLES—
…RWY 01C LEAD OFF LGT FOR TWY Y4 OUT OF SERVICE…
…RWY 01C LEAD ON LGT FOR TWY Y9 OBSC…

c. Runway status light system.

EXAMPLES—
…RWY 18L RWY STATUS LGT SYSTEM OUT OF SERVICE…
…AD AP RWY STATUS LGT SYSTEM OUT OF SERVICE…
…RWY 18L/36R RWY STATUS LGT SYSTEM OUT OF SERVICE…

1. Runway entrance lights.

EXAMPLES—
…TWY ALL RWY ENTRANCE LGT FOR RWY 09L SOUTH SIDE OUT OF SERVICE…
…TWY K5, K6, T RWY ENTRANCE LGT FOR RWY 09L OUT OF SERVICE…

2. Take−off hold lights.

EXAMPLE—
…RWY 28 TKOF HOLD LGT OUT OF SERVICE…

d. Sequence flashing lights/runway alignment indicator lights.

EXAMPLES—
…RWY 18 SEQUENCED FLG LGT OBSC…
…RWY 18 RAI LGT OUT OF SERVICE…

e. Visual approach lighting.

1. Visual approach slope indicator (VASI).

EXAMPLES—
…RWY 05 VASI OUT OF SERVICE…
…RWY 04 VASI UNUSABLE…
…RWY 13 VASI BEYOND 5DEG LEFT OF RCL UNUSABLE
…RWY 13 VASI BEYOND 5DEG LEFT AND RIGHT OF RCL UNUSABLE…

2. Precision approach path indicator (PAPI).

EXAMPLES—
…RWY 01L PAPI OUT OF SERVICE…
…RWY 01 PAPI UNUSABLE…
…RWY 10 PAPI BEYOND 5DEG LEFT AND RIGHT OF RCL UNUSABLE…
…RWY 28 PAPI COMMISSIONED…
…RWY 30 PAPI COMMISSIONED GPA 3.15DEG…
…RWY 12 PAPI GPA CHANGED TO 3.2DEG…
…RWY 34 PAPI BEYOND 2.8NM OF RWY THR UNUSABLE…

3. Runway end identifier lights.
EXAMPLE—
…RWY 18 RWY END ID LGT OUT OF SERVICE…

4. Threshold lights (RTHL).

EXAMPLE—
…RWY 27 RTHL LGT OUT OF SERVICE…

f. Runway edge lights (REDL).

1. When commissioning runway edge light systems, indicate the exact type of system; for example, LIRL, MIRL, HIRL, etc.

EXAMPLE—
…RWY 13/31 HIRL COMMISSIONED…

2. Once commissioned and published, runway edge lights must only be shown as REDL.

EXAMPLES—
…RWY 13/31 REDL OUT OF SERVICE…
…RWY 01/19 REDL OUT OF SERVICE EXC MEDIUM INTST ON CONS…

3. Runway lights obscured due to snow and ice.

EXAMPLE—
…RWY 15/33 REDL OBSC…

NOTE—
1. All edge lights for runway 15/33 are completely obscured. The reason for the obscuration should not be reported.
2. Lights that are partially obscured should not be reported.

g. Runway centerline light (RCLL).

EXAMPLE—
…RWY 08R/26L RCLL OUT OF SERVICE…

h. Touchdown zone lights (RTZL).

EXAMPLE—
…RWY 08R RTZL OUT OF SERVICE…

i. Runway lead-in lighting system (RLLS).

EXAMPLE—
…RWY 18 RLLS OUT OF SERVICE…

j. Airport lighting total power failure.

EXAMPLE—
…AD AP LGT ALL OUT OF SERVICE…

k. Pilot-controlled lighting (PCL) frequency when it controls approach lights or runway lights.

EXAMPLES—
…SVC PCL ALL OUT OF SERVICE…
…SVC PCL RWY 18/36 REDL OUT OF SERVICE
…SVC PCL RWY 18 ALS OUT OF SERVICE…
…SVC PCL RWY 18/36 MEDIUM/HIGH INTST OUT OF SERVICE…

NOTE—
All the PCL services for runway 18/36 only have low intensity operating.

EXAMPLES—
…SVC PCL RWY 14/32 COMMISSIONED KEY FREQ 122.7 7 TIMES HIGH, 5 TIMES MEDIUM, 3 TIMES LOW INTST…
…SVC PCL FREQ CHANGED TO 122.8…

NOTE—
PCL frequency need not be an ATC frequency.
1. Taxiway lighting.
   1. Taxiway edge lights.
   **EXAMPLES**
   …TWY K, L EDGE LGT OUT OF SERVICE…
   …TWY ALL EDGE LGT WEST OF RWY 16L/34R OUT OF SERVICE…
   …TWY ALL EDGE LGT OUT OF SERVICE…
   **NOTE**
   All means every taxiway at an airport even if there is only a single taxiway. See Paragraph 4–2–1, NOTAM Composition.
   2. Taxiway centerline lights.
   **EXAMPLE**
   …TWY E CL LGT BTN TWY E1 AND RWY 15/33 OUT OF SERVICE…
   3. Runway guard lights. NOTAM issued using keyword TWY.
   **EXAMPLES**
   …TWY ALL RWY GUARD LGT OUT OF SERVICE…
   …TWY A4 RWY GUARD LGT FOR RWY 01L/19R OUT OF SERVICE…
   4. Stop bar lights. NOTAM issued using keyword TWY.
   **EXAMPLE**
   …TWY C STOP BAR LGT FOR RWY 16R/34L OUT OF SERVICE…
   5. Taxiway lights obscured due to snow and ice.
   **EXAMPLES**
   …TWY C EDGE LGT OBSC…
   …TWY ALL LGT ALL OBSC…
   **NOTE**
   1. OBSC can be used to describe the physical state of airport infrastructure, including signs and markings.
   2. All taxiway C edge lights are completely obscured. The reason for the obscuration should not be reported.
   3. Lights that are partially obscured should not be reported.

5–2–2. OBSTACLES

**EXAMPLES**
…OBST CRANE (ASN 2013–ACE–5–NRA) 345140N0804506W (1.44NM SW N52) 580FT (195FT AGL) NOT LGTD…
ICLE ZOB OBST WIND TURBINE FARM WI AN AREA DEFINED AS 4NM RADIUS OF 411931N0822776W (17NM W LPR) 2820FT (410FT AGL) NOT LGTD…
…OBST TOWER LGT (ASR UNKNOWN) 420651.07N0875406.27W (12NM N PWK) 1049FT (330FT AGL) OUT OF SERVICE…
…OBST TOWER LGT (ASR 1234567)345313.12N0815744.34W (3NM SSW SPA) 1528FT (564FT AGL) OUT OF SERVICE…
…OBST MOORED BALLOON WI AN AREA DEFINED AS 1NM RADIUS OF SJT 2430FT (510FT AGL) FLAGGED…
   **NOTE**
   Moored balloons are not certified aircraft, nor operated by a certified pilot.
   **EXAMPLE**
   …OBST KITE WI AN AREA DEFINED AS 1NM RADIUS OF ABQ020002 (10NM WSW ABQ) 5860FT (505FT AGL) FLAGGED…

5–3–6. INSTRUMENT LANDING SYSTEM (ILS) STATUS

**EXAMPLES**
…NAV ILS RWY 08L CAT II NA…
5–3–7. NAVAID CONDITIONS

a. Commissioning, etc.

b. Restriction to NAVAIDS

EXAMPLES–
...NAV VOR 045–060 SFC–2000FT UNUSABLE...
...NAV VOR 010–035 BEYOND 35NM SFC–2000FT UNUSABLE...
...NAV DME 010–035 BEYOND 30NM UNUSABLE...
...NAV DME 010–035 BEYOND 30NM SFC–17000FT UNUSABLE...

c. Instrument Landing System (ILS).

1. Precision.

EXAMPLES–
...NAV ILS RWY 32 110.3 COMMISSIONED...
...NAV ILS RWY 08R SNOOP LOM OUT OF SERVICE...
...NAV ILS RWY 05 DECOMMISSIONED...
...NAV ILS RWY 18 DME OUT OF SERVICE...
...NAV ILS RWY 30 LOC RTS...
...NAV ILS RWY 02 GP MKR OUT OF SERVICE...
...NAV ILS RWY 18 GP UNUSABLE SFC–768FT ...
...NAV ILS RWY 02 GP/OM/MM OUT OF SERVICE...
...NAV ILS RWY 35L OUT OF SERVICE...
...NAV ILS RWY 33 LOC UNUSABLE WI .4NM ...
...NAV ILS RWY 30 GP UNUSABLE BEYOND 3DEG LEFT OF COURSE ...
...NAV ILS RWY 12 LOC UNUSABLE BEYOND 4DEG RIGHT OF COURSE ...
...NAV ILS RWY 12 LOC UNUSABLE BEYOND RWY THR...
...NAV HJT ILS RWY 04L OUT OF SERVICE...

NOTE–
Offset ILS are issued with the 3 letter ID (HJT) to the localizer after the Keyword NAV.

EXAMPLE–
...NAV ILS RWY 30 FACILITY PERFORMANCE CLASSIFICATION CODE CHANGED TO CLASS IIIE...

NOTE–
For runway 30, the ILS facility performance classification code has been changed from the previously published data.

2. Excessive snow and ice accumulation

EXAMPLE–
...NAV ILS RWY 18 GP OUT OF SERVICE...

d. Simplified directional facility.

EXAMPLE–
...NAV SIMPLIFIED DIRECTIONAL FACILITY RWY 23 OUT OF SERVICE...

e. Localizer type directional aid for the airport.

EXAMPLE–
...NAV LOC TYPE DIRECTIONAL AID OUT OF SERVICE...

NOTE–
The LDA at the airport, not a particular runway, is out of service.
EXAMPLE–
…NAV VHW LOC TYPE DIRECTIONAL AID RWY 18 LOC OUT OF SERVICE…

f. VOR/DME

EXAMPLES–
…NAV VOR/DME 113.0/CH 77 COMMISSIONED…
…NAV VOR/DME DECOMMISSIONED…
…NAV VOR OUT OF SERVICE…

NOTE–
The VOR portion of the VOR/DME is out of service. The DME portion is still functioning.

EXAMPLE–
…NAV DME OUT OF SERVICE…

NOTE–
The DME portion of the VOR/DME is out of service. The VOR portion is still functioning.

g. VORTAC

EXAMPLES–
…NAV VORTAC 116.2/CH 109 COMMISSIONED…
…NAV VORTAC DECOMMISSIONED…
…NAV VORTAC OUT OF SERVICE…
…NAV VOR OUT OF SERVICE…
…NAV TACAN OUT OF SERVICE…

NOTE–
When the DME portion of a VORTAC fails or is removed from service for maintenance, the TACAN automatically becomes inoperative.

EXAMPLE–
…NAV TACAN AZM OUT OF SERVICE…

h. VOT (VOR Test Facility).

EXAMPLE–
…NAV VOT OUT OF SERVICE…

i. VOT Receiver Checkpoint.

EXAMPLES–
…NAV VOR AIRBORNE REC CHECKPOINT OUT OF SERVICE…
…NAV VOR GND REC CHECKPOINT OUT OF SERVICE…
…NAV VOR GND REC CHECKPOINT FOR TWY A OUT OF SERVICE…

NOTE–
There are two separate Ground Receiver Checkpoints for this airport.

j. TVOR.

EXAMPLES–
!ILN ILN NAV MXQ VOR OUT OF SERVICE
!DAY XUB NAV VOR OUT OF SERVICE

NOTE–
For clarity, these examples show the accountability and location identifier.

k. NDB

EXAMPLES–
!DCA DCA NAV GTN NDB OUT OF SERVICE
!RKD SUH NAV NDB OUT OF SERVICE

l. LOM

EXAMPLES–
!SBY SBY NAV ILS RWY 32 COLBE LOM OUT OF SERVICE…
!SUS SUS NAV ILS RWY 08R SNOOP LOM OUT OF SERVICE…
**NOTE**—Except in Alaska, collocated LOMs are assigned five–letter names. All other NDBs are assigned three–letter identifiers.

**EXAMPLES**—

!MCI MCI NAV ILS RWY 09 HUGGY LOM OUT OF SERVICE…
FLV FLV NAV HUGGY NDB OUT OF SERVICE…

**NOTE**—In the above examples, Huggy NDB serves as a LOM to runway 9 at Kansas City Intl (MCI). It also serves Fort Leavenworth/Sherman AAF (FLV), Kansas, as an NDB.

m. NAVAID identification change.

**EXAMPLE**—

…NAV VORTAC ID CHANGED TO VHP…

5–3–8. SATELLITE BASED SYSTEMS

**EXAMPLES**—

!GPS GPS NAV PRN 16 OUT OF SERVICE…
!GPS ZAB NAV GPS (NAFC GPS 15–01 E1) (INCLUDING WAAS, GBAS, AND ADS–B) MAY NOT BE AVBL WI AN AREA DEFINED AS A 468NM RADIUS CENTERED AT 330702N1062540W (TCS103044) FL400–UNL DECREASING IN AREA WITH A DECREASE IN ALT DEFINED AS: 425NM RADIUS AT FL250, 360NM RADIUS AT 10000FT, 354NM RADIUS AT 4000FT AGL, 327NM RADIUS AT 50FT AGL DLY 0400–1000 1508060400–1508081000

b. WASS

1. Unscheduled loss of signal or service.

**EXAMPLES**—

!FDC FDC NAV WAAS NOT AVBL…
…NAV WAAS SIGNAL NORTH OF A LINE DEFINED AS XXXXXXXNXXXXXXXW TO XXXXXXXNXXXXXXXW MAY NOT BE AVBL. WAAS USERS SHOULD CONFIRM RAIM AVBL FOR IFR OPS IN THIS AREA. T–ROUTES IN THIS SECTOR NOT AVBL. ANY REQUIRED ALTN AP IN THIS AREA MUST HAVE AN APPROVED IAP OTHER THAN GPS THAT IS ANTICIPATED TO BE OPR AND AVBL AT THE ESTIMATED TIME OF ARR AND WHICH THE ACFT IS EQUIPPED TO FLY…

2. Ionosphere storm conditions.

**EXAMPLES**—

…NAV WAAS VNAV/LPV/LP MINIMA MAY NOT BE AVBL…
…NAV WAAS VNAV/LPV MINIMA NOT AVBL, WAAS LP MINIMA MAY NOT BE AVBL…

3. Scheduled loss of signal or service.

**EXAMPLES**—

…NAV WAAS NOT AVBL…
!FDC ZAN NAV WAAS SIGNAL NORTH OF LINE DEFINED AS XXXXXXXNXXXXXXXW TO XXXXXXXNXXXXXXXW MAY NOT BE AVBL. WAAS USERS SHOULD CONFIRM RAIM AVBL FOR IFR OPS IN THIS AREA. T–ROUTES IN THIS SECTOR NOT AVBL. ANY REQUIRED ALTN AP IN THIS AREA MUST HAVE AN APPROVED IAP OTHER THAN GPS THAT IS ANTICIPATED TO BE OPR AND AVBL AT THE ESTIMATED TIME OF ARR AND WHICH THE ACFT IS EQUIPPED TO FLY

c. Upon receipt of notification of satellite/surveillance system interference issue the following NOTAM

1. GPS interference:

**EXAMPLE**—

!GPS BNA NAV GPS (INCLUDING WAAS, GBAS, AND ADS–B) MAY NOT BE AVBL WI AN AREA DEFINED AS 468NM RADIUS OF 360728N0864041W SFC–UNL
2. **Automatic Dependent Surveillance** and affected components, including Wide Area Multilateration Outage

   (a) **Localized Service Outage for the affected airport**

   **EXAMPLES—**
   
   …AIRSPACE TFC INFO SERVICE BCST MAY NOT BE AVBL WI AN AREA DEFINED AS 100NM RADIUS OF 360728N0864041W SFC−UNL…
   !MTJ MTJ SVC WID AREA MULTILATERATION SFC−8000FT OUT OF SERVICE…

   (b) **Large Service Outages** affecting an Air Route Traffic Control area(s)

   (1) **Single service outage – for large area**

   **EXAMPLES—**
   
   !ISP ZNY AIRSPACE TFC INFO SERVICE BCST SERVICES NOT AVBL…
   !DEN ZDV SVC WID AREA MULTILATERATION OUT OF SERVICE…

   (2) **Multiple service outages**

   **EXAMPLE—**
   !ISP ZNY AIRSPACE TFC AND FLT INFO SERVICE BCST SERVICES NOT AVBL…

   (3) **Large Service Outages** affecting several Air Route Traffic Control Center areas

   **EXAMPLE—**
   
   !FDC y/mmns ZME GA..NC..MS..AL..TN..SC..NC..AR..SPECIAL NOTICE..AUTOMATIC DEPENDENT SURVEILLANCE BCST AUTOMATIC DEPENDENT SURVEILLANCE REBROADCAST AND TRAFFIC INFORMATION SERVICES BCST MAY NOT BE AVBL 1501270400−1501270600

   d. **Ground Based Augmentation System (GBAS).** Originate NOTAMs when the GBAS is out of service for maintenance reasons or predicted to be out of service. GBASs are operated by non–federal service providers, currently IAH and EWR.

      1. Unscheduled loss of signal or service

      **EXAMPLE—**
      …NAV GBAS OUT OF SERVICE…

      2. Predicated loss of signal or service

      **EXAMPLE—**
      …NAV GLS RWY 04R, RWY 04L, RWY 11, RWY 22R, RWY 22L OUT OF SERVICE…

      **NOTE—**
      When one or multiple GLS approaches are predicted to not be available.

5–3–9. **HOURS OF OPERATION (NAVAID)**

   **EXAMPLE—**
   …NAV ILS RWY 32 NOT MNT DLY 0200−0900…

5–4–3. **COMMUNICATION OUTLET CONDITIONS**

   b. **Commissioning, decommissioning, outage, or (un)availability of communications outlets**

   **EXAMPLES—**
   
   …COM ARINC CPDLC NOT AVBL…
   …COM CPDLC NOT AVBL…
   …COM COMMON TFC ADVISORY FREQ 122.8 COMMISSIONED…
   …COM UNICOM FREQ 122.8 OUT OF SERVICE…
   …COM LOCAL CTL 118.9, GND CTL 121.0 COMMISSIONED…
   …COM CLEARANCE DELIVERY 121.7 OUT OF SERVICE…
   …COM GND COM OUTLET 135.075 OUT OF SERVICE…
   …COM LOCAL AP ADVISORY 121.3 OUT OF SERVICE…
NOTE—
Local Airport Advisory frequency out of service.

EXAMPLES—
…COM REMOTE AP ADVISORY 123.65 OUT OF SERVICE…
…COM REMOTE COM OUTLET 122.6 OUT OF SERVICE…

NOTE—
The airport’s other frequency 255.4 is still operating. If both were out of service, the NOTAM would be “…COM REMOTE COM OUTLET OUT OF SERVICE…”

EXAMPLES—
!JBR 1SH COM SOCIAL HILL REMOTE COM OUTLET OUT OF SERVICE…
…COM VOR VOICE OUT OF SERVICE…
…COM REMOTE TRANS/REC 126.25, 131.25 OUT OF SERVICE…
…COM REMOTE COM A/G OUT OF SERVICE…
…COM REMOTE COM OUTLET 122.5 OUT OF SERVICE…
!DCA 2D2 COM FALLS CHURCH REMOTE COM OUTLET 122.6 OUT OF SERVICE…

5–5–2. CHANGES TO PUBLISHED SERVICES

EXAMPLES—
…SVC TWR COMMISSIONED…
…SVC HAZARDOUS INFLIGHT WX ADVISORY SERVICE OUTLET OUT OF SERVICE…
…SVC HAZARDOUS INFLIGHT WX ADVISORY SERVICE OUTLET COMMISSIONED…
…SVC ATIS NOT AVBL…

NOTE—
When ATIS is not available for other than equipment malfunction, use NOT AVBL.

EXAMPLES—
…SVC ATIS 134.025 OUT OF SERVICE…
…SVC ATIS 134.025 NOT AVBL…

NOTE—
ATIS service from 134.025 is not available; however, ATIS service is being provided from another frequency.

EXAMPLES—
…SVC AUTOMATIC FLT INFO SERVICE OUT OF SERVICE…
…SVC AUTOMATIC FLT INFO SERVICE 134.95 OUT OF SERVICE…
…SVC AUNICOM WX BCST NOT AVBL…

NOTE—
The Automated UNICOM weather broadcast is not available.

EXAMPLE—
…SVC AUNICOM OUT OF SERVICE…

NOTE—
The Automated UNICOM is out of service.

5–5–3. HOURS OF OPERATION

a. Changes in hours of operation

EXAMPLES—
…SVC TWR CLSD…
…SVC TWR CLSD MON–FRI 0300–1215, SAT 2300–1430, SUN 0100–1600…
…SVC CLARKSBURG APP CLSD…

NOTE—
Examples reflect service NOTAM publishing changes in hours of operation of an air traffic control facility that does not affect an associated airspace area.

EXAMPLES—
…SVC TWR CLSD CLASS D SERVICE NOT AVBL CTC XXXXXXXX AT XXX.XX…
...SVC TWR CLSD MON–FRI 0300–1215, SAT 2300–1430, SUN 0100–1600 CLASS D SVC NOT AVBL CTC XXXXXXXX AT XXX.XX...
...SVC PENSACOLA APP CLSD CLASS C SERVICE NOT AVBL CTC XXXXXXXX AT XXX.XX...

NOTE—
Examples reflect service NOTAM publishing changes in hours of operation of an air traffic control facility that affect an associated airspace area.

EXAMPLE—
...SVC TEMPO TWR 121.0...

NOTE—
Frequency 121.0 will be used to control aircraft on all movement areas and traffic patterns.

b. Establishment of temporary air traffic control tower

EXAMPLE—
...TEMPO TWR LOCAL CTL 121.0, GND CTL 121.7...

NOTE—
Frequency 121.0 will be used to control arriving and departing aircraft from the designated runway(s), and 121.7 will be used for controlling taxing aircraft.

c. Total failure of a facility

EXAMPLES—
...SVC WASHINGTON ARTCC OUT OF SERVICE...
...SVC POTOMAC APP OUT OF SERVICE. RICHMOND CLASS C SERVICE NOT AVBL. CTC XXXXXXXX ON XXX.XX...
...SVC KENAI FSS OUT OF SERVICE...
...SVC FSS OUT OF SERVICE...

NOTE—
Do not spell out the name of the facility as with large area FSS.

EXAMPLES—
...SVC FORT WORTH FSS OUT OF SERVICE...
...SVC TWR OUT OF SERVICE...
...SVC TWR OUT OF SERVICE CLASS D SERVICE NOT AVBL CTC XXXXXXXX AT XXX.XX...

d. Traffic Management Program Alerts

EXAMPLES—
...SVC TFC MANAGEMENT PROGRAM ALERT SEE NTAP RESERVATION REQUIRED...
...SVC TFC MANAGEMENT PROGRAM ALERT SEE TFC MANAGEMENT MSG RESERVATION REQUIRED...

NOTE—
Details of each traffic management program are published in Part 4 of the NTAP or included in a special traffic management program advisory message.

EXAMPLE—
...SVC TFC MANAGEMENT PROGRAM ALERT SEE ATCSGCC MSG...

5–5–4. WEATHER AND WEATHER REPORTING EQUIPMENT

a.6.c

EXAMPLES—
...SVC AWOS–3 COMMISSIONED 120.3/202–426–8000...
...SVC AWOS DECOMMISSIONED...
...SVC WX REPORTING DECOMMISSIONED...
...SVC AUTOMATED WX BCST SYSTEM ALTIMETER SETTING NOT AVBL...

NOTE—
The AWOS–3 altimeter setting is being reported as “missing” on the weather report.

a.6.b
EXAMPLE—
…SVC WX REPORTING NOT AVBL…

NOTE—
The non-automated weather reporting service provided by the FAA or the NWS is not available as published.

EXAMPLES—
…SVC AUTOMATED WX BCST SYSTEM ALTIMETER SETTING UNREL…
…SVC AUTOMATED WX BCST SYSTEM CEILING UNREL
…SVC AUTOMATED WX BCST SYSTEM WIND UNREL…
…SVC AUTOMATED WX BCST SYSTEM T UNREL…

a.6.c
EXAMPLE—
…SVC AUTOMATED WX BCST SYSTEM CEILING AND VIS UNREL…

NOTE—
An element (for example, ceiling, visibility, wind, temperature, dew point, and altimeter setting) disseminated in the weather report as unreliable and/or inaccurate will be described in the NOTAM as UNREL.

a.6.d
EXAMPLES—
…SVC AUTOMATED WX BCST SYSTEM 120.3 OUT OF SERVICE…
…SVC AUTOMATED WX BCST SYSTEM 119.075 RTS…

NOTE—
The failure of the telephone line and/or circuit used for connection to WMSCR must not be the basis for a NOTAM.

a.6.b
EXAMPLES—
…SVC ASOS COMMISSIONED 134.725/352–799–5881…
…SVC WIND SYSTEM EAGLECREST NOT AVBL…
…SVC WIND SYSTEM RWY 08 NOT AVBL…

a.6.c
EXAMPLE—
…SVC JUNEAU AP WIND SYSTEM NOT AVBL…

5–5–5. MICROBURST/WINDSHEAR DETECTION SYSTEM

EXAMPLES—
…SVC MICROBURST/WS DETECTION SYSTEM NOT AVBL…
…SVC MICROBURST/WS DETECTION SYSTEM FOR RWY 10/28 NOT AVBL…

5–5–6. RADAR SERVICES

EXAMPLES—
…SVC SMR OUT OF SERVICE…
…SVC PRECISION RWY MNT OUT OF SERVICE…

6–1–2. b and c. SPECIAL ACTIVITY AIRSPACE (SAA)

EXAMPLES—
…AIRSPACE CRYPT NORTH MOA ACT 5000FT–16000FT…
…AIRSPACE LGT OUT/NGT VISION GOGGLE TRAINING DESERT AND REVEILLE NORTH/SOUTH MOA ACT SFC–9000FT AVOIDANCE ADVISED…

NOTE—
NOTAMs for LIGHT OUT/NGT VISION GOGGLE operations are scheduled times only, identified 48 hours in advance.

EXAMPLE—
…AIRSPACE DRUM MOA ACT 500FT AGL–4999FT…
6–1–3. AIRSPACE AND ALTITUDE RESERVATIONS

EXAMPLES–
…AIRSPACE STNR ALT RESERVATION WI AN AREA DEFINED AS 100NM RADIUS OF FJC360020
5500FT–FL270…
…AIRSPACE STNR ALT RESERVATION WI AN AREA DEFINED AS XXXXXXXNXXXXXXXW (Plain text) TO
XXXXXXXXXNXXXXXXXW (Plain text) TO XXXXXXXNXXXXXXXW (Plain text) TO XXXXXXXXNXXXXXXXW (Plain text)
TO POINT OF ORIGIN, AND 52NM RADIUS OF XXXXXXXNXXXXXXXW, AND 9NM RADIUS OF
XXXXXXXXXNXXXXXXXW SFC–UNL…

GG KDZZNAXX DDHHMM
KZOARZRX FNNNN/YY NOTAMN
Q) KZOA/QWMLM/IV/NBO/ E/000/999/3411N12456W
A) KZOA
B) EFFECTIVE TIME
C) EXPIRATION TIME
E) AIRSPACE WATER OPERATIONS WI AN AREA DEFINED AS XXXXXXXNXXXXXXXW (Plain text) TO
XXXXXXXXXNXXXXXXXW (Plain text) TO XXXXXXXNXXXXXXXW (Plain text) TO XXXXXXXXNXXXXXXXW TO POINT OF
ORIGIN NONPARTICIPATING PILOTS ARE STRONGLY ADVISED TO AVOID THE ABOVE AREAS. IFR TFC
UNDER ATC JURISDICTION SHOULD ANTICIPATE REROUTING IN VICINITY OF IMPACTS.
F) SFC
G) UNL

6–1–4. SPECIAL AERIAL REFUELING

EXAMPLE–
…AIRSPACE SPECIAL AERIAL REFUELING TRACK/ANCHOR WI AN AREA DEFINED AS 5NM EITHER SIDE
OF A LINE FM MGM087050 TO MGM272065 ACT 7000FT–9000FT…

6–1–5. OTHER AIRSPACE NOTAMS

a. Airspace NOTAMs

EXAMPLES–
…AIRSPACE BALLOON LDG WI AN AREA DEFINED AS 100NM RADIUS OF ICT PAYLOAD FALLING FM
150000FT SFC–UNL…
…AIRSPACE HOT AIR BALLOON WI AN AREA DEFINED AS 2NM RADIUS OF 13M SFC–1500FT…
…AIRSPACE UAS WI AN AREA DEFINED AS 10NM RADIUS OF BGR130020 (6NM E BHB) SFC–10000FT AGL
FREQ XXX.XX…
…AIRSPACE HIGH INTENSITY FOUR–BEAM SEARCH LIGHT WI AREA DEFINED AS 2NM RADIUS OF
DJB320015 SFC–4000FT…
…AIRSPACE UNMANNED ROCKET WI AN AREA DEFINED AS 4NM RADIUS OF ICT SFC–FL250
…AIRSPACE PYROTECHNIC DEMONSTRATION WI AN AREA DEFINED AS 2NM RADIUS OF AML360001
SFC–1500FT…
…AIRSPACE LGT OUT TRAINING WI AN AREA DEFINED AS DMN307017 TO DMN052030.6 TO DMN071029.9
TO DMN212016 TO POINT OF ORIGIN 5000FT–12000FT AVOIDANCE ADVISED…
…AIRSPACE LGT OUT TRAINING WI CLASS D SFC AREA…

NOTE–
Activities that will prohibit the use of airspace will require the issuance of an FDC NOTAM by the USNOF.

NOTE–
NOTAMS specifying or changing the dates and times of a designated part time surface area must coincide with issuance
of a corresponding Hours of Operation Services NOTAM and may be issued by the appropriate facility only after
coordination with the regional/service area office.

EXAMPLES–
…AIRSPACE CLASS D SFC AREA HR CHANGED TO ACT MON–FRI 0615–2100, SAT 0830–1700, SUN 1000–1900
YYMMDDHHMM–PERM
…AIRSPACE CLASS E SFC AREA HR CHANGED TO ACT DLY 0430–0600 YYMM300430–PERM…
b. Unmanned Free Balloon

EXAMPLES—

AIRSPACE UNMANNED FREE BALLOON DVV180030 (32NM S DEN) SFC-10000FT SB...
AIRSPACE UNMANNED FREE BALLOON ABQ180020 SFC-UNL NEB TO 15000FT...

c. Authorizations and/or Air Traffic notifications are required by the proponent for the following activities; ensure the NOTAM Originator is aware of this. The information is not released in the NOTAM.

1. Airshows, Demonstrations, Aerobatic Areas.
   (a) FAA authorization will consist of a waiver to 14 CFR Part 91.
   (b) Obtain the following information from the requestor:
       (1) Name, address, and telephone number of the person giving notice.
       (2) Identification and type of the aircraft to be used.

2. Unmanned Aircraft Operations.
   (a) FAA authorization will consist of a Certificate of Authorization or Waiver, Special Airworthiness, or similar document.
   (b) Obtain the following information from the requestor:
       (1) Name, address, and telephone number of the person giving notice.
       (2) Identification and frequency to be used.

3. Parachute Jumping/Sky Diving
   (a) Obtain the following information from the requestor:
       (1) Name, address, and telephone number of the person requesting authorization or giving notice.
       (2) Identification of the aircraft to be used.

7–1–3. IFR FLIGHT PROCEDURES

f. Chart correction NOTAMs.

EXAMPLES—

!FDC x/xxxx VLL CHART TROY/OAKLAND, TROY, MI.
VOR~A, ORIG...
CORRECT FAF TO READ PERLS INT. VS PERSL INT. 1307091200–PERM

!FDC x/xxxx FDC CHART U.S. GOVERNMENT CHART
NORTH ATLANTIC ROUTE CHART, EFFECTIVE 5 MAY 2011...
CORRECT ROUTE IDENTIFIER A763 BETWEEN GRAND TURK ISLAND (GTK) VORTAC AND AGUADILLA (BQN) VORTAC TO READ R763. 1307091200–PERM

!FDC x/xxxx FDC CHART U.S. GOVERNMENT CHART

S–ILS 27 CAT D/E NA. 1502011200–1502081200EST

7–1–4. HIGH BAROMETRIC PRESSURE WARNING

**EXAMPLE**–

…(ARTCC) AIRSPACE HIGH PRESSURE ALTIMETER SETTING PROC ARE IN EFFECT FOR THE MEMPHIS CENTER AREA. SEE AERONAUTICAL INFO MANUAL FOR PROC….

7–1–5. TEMPORARY FLIGHT RESTRICTIONS

**a.** 14 CFR Section 91.137

**EXAMPLE**–

!FDC y/nnnn (ARTCC id) (state code).AIRSPACE (city/location, state)..TEMPORARY FLIGHT RESTRICTIONS PURSUANT TO TITLE 14 CFR SECTION 91.137(A)(1) WI AN AREA DEFINED AS 10NM RADIUS OF 292000N0902000W (FIX/RADIAL/DISTANCE) SFC–FL180 (schedule, if needed) (reason) ONLY RELIEF ACFT OPS UNDER DIRECTION OF (agency in charge) ARE AUTH IN THE AIRSPACE (Agency name and telephone number) OR (frequency) IS IN CHARGE OF THE OPERATION. (Agency name and telephone number) OR (frequency) IS IN CHARGE OF ON SCENE EMERG RESPONSE ACTIVITIES. (Coordination facility)…

!FDC y/nnnn ZLC MT..AIRSPACE MISSOULA, MT..TEMPORARY FLIGHT RESTRICTIONS PURSUANT TO TITLE 14 CFR SECTION 91.137(A)(2) WI AN AREA DEFINED AS 3NM RADIUS OF 465422N1135521W (MSO076008.6NM) SFC–10000FT MSL EFFECTIVE 1402271900 UTC (1400 LOCAL 2/27/14) UNTIL 1402280200 UTC (2100 LOCAL 2/27/14) FIRE FIGHTING AIRCRAFT OPS. MONTANA DNRC MISSOULA DISPATCH TELEPHONE 406–829–7070 OR FREQ 133.20/WEST RIVERSIDE FIRE IS IN CHARGE OF THE OPERATION. SALT LAKE/ZLC/ARTCC TELEPHONE 801–320–2560 IS THE FAA COORDINATION FACILITY…

**b.** 14 CFR Section 91.141 and Section 99.7

**EXAMPLE**–

7–1–6. AIR DEFENSE EMERGENCY
EXAMPLE-

NOTE-
The example FDC NOTAM is for guidance purposes only. Although the information contained in this example could conceivably cover all facets of an emergency, it does not mean that the information contained covers all emergency actions that might be placed into effect by the military when the provisions of the ESCAT are implemented.

7–1–7. SPECIAL DATA

EXAMPLE–

!FDC FDC ... NOTICE ... PILOTS ARE REMINDED…

7–1–8. LASER LIGHT ACTIVITY

EXAMPLES–

!FDC y/nnnn (ARTCC id) (state code)..AIRSPACE (city/state)..LASER LGT location identifier DEMONSTRATION WI AN AREA DEFINED AS (description of area) (alternate, if needed) SFC–5000FT (schedule, if needed) LASER LGT BEAM MAY BE INJURIOUS TO PILOT’S/PASSENGER’S EYES WI FT VERTICALLY AND FT LATERALLY OF THE LGT SOURCE. FLASH BLINDNESS OR COCKPIT ILLUMINATION MAY OCCUR BEYOND THESE DISTANCES. (Name of facility)/(id)(type of facility) (telephone number) IS THE FAA COORDINATION FACILITY…

!FDC y/nnnn (ARTCC id) (state code)..AIRSPACE (city/state)..LASER RESEARCH WI AN AREA DEFINED AS (description of area) (alternate location identifier, if needed) SFC–8000FT (schedule if needed) AT AN ANGLE OF DEGREES, FROM THE SFC, PROJECTING UP TO FT AVOID AIRBORNE HAZARD BY 5NM. THIS BEAM IS INJURIOUS TO PILOT’S/AIRCREW’S AND PASSENGER’S EYES. (Name of facility)/(id)(type of facility) (telephone number) IS THE FAA COORDINATION FACILITY…

!FDC y/nnnn (ARTCC id) (state code)..AIRSPACE (city/state)..AIRBORNE TO GND LASER ACT WI AN AREA DEFINED AS (latitude/longitude or fix/radial/distance) TO (latitude/longitude or fix/radial/distance) SFC–7000FT AVOID AIRBORNE HAZARD BY 5NM. THIS BEAM IS INJURIOUS TO PILOT’S/AIRCREW’S AND PASSENGER’S EYES. (Name of facility)/(id)(type of facility) (telephone number) IS THE FAA COORDINATION FACILITY (schedule, if needed)…

8–1–1. INTERNATIONAL NOTAMs

EXAMPLE–

GG KSEAYFYY
041749 KDZ7NAAX
) SVC RQ INT LOC=KZSE NT=A0007/16
040105 KZSE (A0007/13) NOTAMN
Q) KZSE/QRRCA//////
A) KZSE
B) XX01042100
C) XX01050100
E) AIRSPACE W460B ACT
F) SFC
G) 2000FT
NOTE–
This is an example of the reply after Seattle FSS requested an international NOTAM from the U.S. NOTAM System computer. The request was for Seattle Air Route Traffic Control Center (ARTCC) International NOTAM A0007/16 and received the data from the computer. The NOTAM was issued on January 4 at 0105 UTC. The affected location was Seattle ARTCC (KZSE) with an effective time of January 4 at 2100UTC (B) and good through January 5 at 0100 UTC (C). The condition was that Warning Area W460B will be active during those times stated and for an altitude of surface (F) to 2000 feet MSL (G). There was only one NOTAM found.
Appendix B. International NOTAM (Q) Codes

This appendix is to be used to interpret the contents of coded international NOTAMs. A NOTAM code group contains five letters.

a. The first letter is always the letter “Q” to indicate a code abbreviation for use in the composition of NOTAMs.

b. The second and third letters identify the subject being reported. (See Second and Third Letter Decode Tables).

c. The fourth and fifth letters identify the status of operation of the subject being reported. (See Fourth and Fifth Letter Decode Tables).

Appendix C. ICAO Difference for the United States

Below is a listing (not all inclusive) of abbreviations that we use frequently in a domestic NOTAM, but are not recognized ICAO contractions.

ARFF – Airport Rescue and Fire Fighting
ARINC – A system name for CPDLC
ARTCC – Air Route Traffic Control Center
ATCSCC – Air Traffic Control System Command Center
AUNITCOM – Automated UNICOM
BC – Back Course
CTAF – Common Traffic Advisory Frequency
DLA – Delay or delayed
FDC – Flight Data Center
FICON – Field Condition
HIRL – High Intensity Runway Light
INFO - Information
LB – Pounds
LIRL – Low Intensity Runway Light
LOM – Compass locator at ILS outer marker
MALSR – Medium-Intensity Approach Lighting System with Runway Alignment Indicator Lights
MIRL – Medium Intensity Runway Lights
MNT - Monitor, monitoring or monitored
MU – Friction value representing runway surface conditions
NA – Not Authorized
NTAP – Notice to Airmen Publication
ORIG – Original
PRCT – Percent
PRN – Pseudo Random Noise
RVRM – Runway Visual Range Midpoint
RVRR – Runway Visual Range Rollout
RVRT – Runway Visual Range Touchdown
SAA – Special Activity Airspace
SITA – A system name for CPDLC
SSALR – Short Approach Lighting System with Runway Alignment Indicator Lights
STAR – Standard Terminal Arrival
TFR – Temporary Flight Restriction
VASI – Visual Approach Slope Indicator
WID – Wide or width
UNICOM – Universal Communication
USPS – United States Postal Service
Appendix D. Miscellaneous Functions

a. Flight Services Functions

2–1–4. NOTICES TO AIRMEN PUBLICATION

b. The Notices to Airmen Publication is divided into four parts:

1. Notices in Part 1 are provided by ATC Products and Publications. This part contains selected FDC NOTAMs that are expected to be in effect on the effective date of the publication. This part is divided into three sections:
   
   (a) Section 1, Airway NOTAMs, reflecting airway changes that fall within an ARTCCs airspace.
   
   (b) Section 2, Procedural NOTAMs.

   (c) Section 3, General NOTAMs, containing NOTAMs that are general in nature and not tied to a specific airport/facility (for example, flight advisories and restrictions, open duration Special Security Instructions and Special Flight Rules Area.

2. Part 2, provided by NFDC, contains Part 95 Revisions, Revisions to Minimum En Route IFR Altitudes and Changeover Points.

3. Part 3, International NOTAMs, is divided into two sections.

   (a) Section 1, International Flight Prohibitions, Potential Hostile Situations, and Foreign Notices.

   (b) Section 2, International Oceanic Airspace Notices.

4. Part 4, Graphic Notices, compiled by ATC Products and Publications from data provided by FAA service area offices and other lines of business, contains special notices and graphics pertaining to almost every aspect of aviation; such as, military training areas, large scale sporting events, air show information, Special Traffic Management Programs (STMPs) and airport-specific information. This part is comprised of 6 sections:

   (a) Section 1, General.

   (b) Section 2, Special Operations.

   (c) Section 3, Airport and Facility Notices.

   (d) Section 4, Major Sporting and Entertainment Events.

   (e) Section 5, Airshows.

   (f) Section 6, Special Notices.

NOTE—

Notices in Parts 3 and 4 of the NTAP are submitted to and processed through ATC Products and Publications, not NFDC. Cutoff dates and requirements for notices in Parts 3 and 4 are in the NTAP.

3–1–1. TIE–IN STATIONS

a. Flight Service Program Office must designate an FSS as tie–in point for NOTAM purposes for all facilities in the NAS. The facilities assigned should normally be within the confines of the FSS’s flight plan area.

b. Letters of agreement between facilities or other agencies and the FSS should be executed to assure proper handling of NOTAMs.

c. The tie–in FSS is responsible for forwarding the NOTAM data to the NFDC for publication in accordance with the procedures in this order.
3–1–3. TIE–IN STATIONS

FSS air traffic managers must ensure that NOTAMs originated by their facility and FDC NOTAMs received must be accounted for as follows:

a. Log all NOTAMs on a locally approved form containing at least the same data for each accountability (NOTAM file) location. Information to include on the form: Month, Facility, NOTAM Number, Condition Description, Transmitted by/DTG, and Canceled by/DTG.

b. Incoming FDC NOTAMs and cancellations must be logged on a locally approved form, containing at least the same data. Information to include on the form: FDC NOTAM Receipt Log, NOTAM Number, Sending Facility, Affected Facility, Number Canceled by, and Remarks. The Remarks section should contain enough information to identify the location and NAS component affected.

c. Electronic NOTAM logs are acceptable and can replace any paper log.

d. When you receive an FDC NOTAM and the previous number(s) have not been received, obtain the NOTAM on request–reply.

REFERENCE–
FAA Order JO 7930.2, Para 7–2–3 Retrieving FDC NOTAMs

3–1–4. FDC PRESIDENTIAL, SPECIAL SECURITY INSTRUCTIONS, OR EMERGENCY AIR TRAFFIC RULES TFRs

b. Upon receipt of these messages, the watch supervisor at each flight service station hub or parent facility must ensure that the NOTAM is received at each of their subordinate facilities. The hub or parent facility must send notification within 15 minutes by receipt message to “KDZZNAXX.” The receipt message must include:

1. R or RGR.
2. The FDC number, including the letters FDC.
3. The initials of the watch supervisor.

NOTE–
Only the hub or parent facility need to acknowledge the NOTAM. For automation processing, the receipt message must adhere to the following format: R FDC 4/1234 XX

c. The USNOF must make a record of all receipt messages received.

d. If no receipt message is received by the USNOF within 90 minutes of issuance of the FDC Presidential, Special Security Instructions, or Emergency Air Traffic Rules NOTAM, the USNOF will follow–up with a phone call to the facility watch supervisor.

e. The watch supervisor of the flight service station must be responsible for:

1. Logging the Presidential, Special Security Instructions, or Emergency Air Traffic Rules FDC NOTAM in the facility log.
2. Notifying the specialists on duty that a Presidential, Special Security Instructions, or Emergency Air Traffic Rules FDC NOTAM has been issued.
3. Putting the Presidential, Special Security Instructions, or Emergency Air Traffic Rules FDC NOTAM in the facility status information area.
4. As part of the FSS supervisor ’s watch checklist, the watch supervisor must check the FDC list that is issued by the USNOF to ensure that every Presidential, Special Security Instructions, or Emergency Air Traffic Rules FDC NOTAM has been received in the facility.

NOTE–
The purpose of this procedure is to ensure that:
1. All flight service specialists know about the Presidential, Special Security Instructions, or Emergency Air Traffic Rules
3–2–3. PASSING NOTAM DATA BY PART–TIME FSS FACILITIES

1. Before closing, part–time facilities must give the following NOTAM data to the FSS responsible for handling their NOTAMs during the period the facility is closed: Any known NOTAMs that will require dissemination during the hours the facility is closed.

2. All current NOTAMs.

b. Immediately upon resuming the daily operation, part–time facilities must obtain all the above data as well as pertinent FDC NOTAMs issued.

4–1–1. ACCEPTING NOTAM DATA

FSS facilities must accept and document all aeronautical information regardless of source, provided the occurrence is no more than 3 days in the future. Information from other–than–authorized authorities must be verified prior to NOTAM issuance.

4–3–1. PREPARATION FOR TRANSMISSION

In order to ensure that NOTAMs are processed and distributed properly, data for transmission must be coded as prescribed in this order.

4–3–2. AUTOMATIC DATA PROCESSING (ADP) CODES

The ADP equipment is programmed to accept and begin processing a NOTAM upon receipt of the ADP code, which is an exclamation point (!).

5–3–8. SATELLITE BASED SYSTEMS

Use standard request/reply procedures to obtain all current GPS NOTAMs.

EXAMPLE–

GG KDZZNAXX
DDHHMM KDCAYFYX
)SVC RQ DOM LOC=GPS
OR
GG KDZZNAXX
DDHHMM KDCAYFYX
)SVC RQ INT LOC=KNMH

7–2–2. FDC NOTAM LIST

The NS transmits a list of FDC NOTAM numbers issued during the previous 24 hours, which is transmitted as a numbered FDC NOTAM between 1715 and 1745 UTC.

b. Military Functions

1. MILITARY FACILITIES

NOTAMs pertaining to U.S. Air Force, Army, and Navy navigational aids that are part of the NAS must receive dissemination in the civil system in addition to dissemination in the military system.

2. SUBMISSION OF MILITARY DATA FOR PUBLICATION

Military aeronautical data affecting FAA publications must be submitted to the FAA through the responsible military authority.
3. MILITARY NOTAMS NOT MEETING CRITERIA
All military NOTAMs that do not meet the criteria outlined in this chapter will be distributed in accordance with local agreements or within the military NOTAM system only.

4. MILITARY NOTAMs
Department of Defense (DOD) NOTAMs are stored in the FAA NOTAM database. Most of these facilities are assigned to a tie–in FSS for NOTAM purposes.

NOTE–
Some Army airfields are not assigned to a tie–in FSS. Army aeronautical data and NOTAMs are not necessarily published in FAA publications. Publication of NOTAM data in the DOD Flight Information Publication (FLIP) is justification for NOTAM cancellation.

5. ALASKAN MILITARY NOTAMs
Select Alaskan military facility NOTAMs may be disseminated in the FAA NOTAM system via the tie–in FSS. The military base operations must transmit NOTAM data into the Defense Internet NOTAM Service and, at a minimum, coordinate with tie–in FSS.

6. MILITARY NOTAM AVAILABILITY
   (a) All military NOTAMs are stored in the NS database. While current, they may be retrieved by both AFTN subscribers and FAA facilities via request/reply.

   (b) Refer to the DOD Flight Information Publication (En Route), IFR, or VFR Supplements to determine whether NOTAM service is provided for a facility.

   (c) Military NOTAMs are entered in the military system using the following NOTAM format:

   EXAMPLE–
   GG KDZNAXX 281131 KVPS
   (M0719/13 NOTAMN
   Q) KZFW/QMXLC/////
   A) KLTS
   B) 201308071256
   C) 201310302359
   E) TWY C BETWEEN TWY G AND TWY B CLSD

   NOTE–
   Refer to ICAO 8126 Amdt 2 for international Q codes. The DOD may supplement ICAO Q codes based on military necessity.
Appendix E. Computer Functions

a. Flight Services Computer Functions

4–3–5. CONFIRMING ACCEPTANCE BY THE NOTAM SYSTEM

a. When a new NOTAM is accepted into the NOTAM file, a copy of the NOTAM with the NOTAM number will be returned back to the originating facility.

b. If the NOTAM is rejected, an NS–generated service message will be relayed back to the facility of origin indicating the reason for rejection as shown in Paragraph 4–5–2, NOTAM Service Messages.

4–3–6. TRANSMISSION BY ANOTHER FACILITY

When unable to transmit a NOTAM directly into the system due to equipment failure or other situation, relay the information to an FSS and request that the data be transmitted into the system.

4–4–2. CANCELLATION OF NOTAMs

c. To cancel a NOTAM, use the same NOTAM/ serial number assigned to the original NOTAM by the NS computer, preceded by the letter “C.” If the serial number of a NOTAM cancellation is invalid (number not in a master file), no action is taken within the NOTAM system. A cancellation must receive the same dissemination as the NOTAM it cancels. Do not carry the NOTAM text in the cancellation.

EXAMPLE–
!ABC C05/005

4–5–1. MONITORING

g. All input transmissions from a facility are monitored by the NS computer for the presence of an ADP code. The validity of the station identifier, format, and times are also checked before the NS computer assigns a number and updates the NOTAM master file.

h. Errors in the station identifier or the format will result in a computer–generated service message being sent to the facility of origin. (See paragraph 4–5–2 for examples). The service message will identify the NOTAM parameter which was in error. A rejection (R) requires corrective action as soon as possible.

4–5–2. NOTAM SERVICE MESSAGES

If data is entered incorrectly, it will be rejected. Each rejection will be preceded with a service message (SVC) explaining the cause for the rejection.

7–2–3. RETRIEVING FDC NOTAMS

a. Upon issuance, all FDC NOTAMs are given all circuit distribution and are stored in the NS. FDC NOTAMs remain in the NS for the duration of their validity. FDC NOTAM cancellations remain in the NS for 72–hours after transmission.

b. FDC NOTAMs may be retrieved via request/reply. To minimize response delays, each FDC NOTAM and FDC NOTAM cancellation to be retrieved should be requested individually.

   1. To retrieve an individual FDC NOTAM by number:

      (a) When the location identifier and number are known:

        EXAMPLE–
        AIS:
2. To request all FDC NOTAMs for a given location:

**EXAMPLE**—

GG KDZZNAXX
DDHHMM KCOUYFYX
)SVC RQ FDC LOC=MCI

**NOTE**—
All facilities must use their particular equipment's keyboard equivalent of the closed parenthesis or equal symbol as appropriate.

### 8–3–2. RETRIEVING MILITARY NOTAMS

Formats for retrieving military NOTAMS via NADIN are as follows:

a. A request for a single NOTAM for a given location:

**EXAMPLE**—

SVC B:
GG KDZZNAXX
DDHHMM KDCAYFYX
)SVC RQ MIL ACC=KADW NT= M0134/00

b. A request for all military NOTAMs for a given location:

**EXAMPLE**—

SVC B:
GG KDZZNAXX
DDHHMM KSJTYFYX
)SVC RQ MIL LOC=KNGP

c. A request for all military NOTAMs for multiple locations (maximum of eight):

**EXAMPLE**—

SVC B:
GG KDZZNAXX
DDHHMM KEKNYFYX
)SVC RQ MIL LOC= KADW,KDAA,KNGP,KNGU,KNUW,KHST,KHIF

**NOTE**—
All facilities must use their particular equipment's keyboard equivalent of the closed parenthesis or equal symbol as appropriate.

d. To review all NOTAMs for a joint-use airport (for example, CHS), both civil (CHS) and military (KCHS) NOTAMs must be retrieved.

e. To request all NOTAMs for a given location from all files (domestic, FDC, international, and military) that meets the military NOTAM criteria:

**EXAMPLE**—

SVC B:
GG KDZZNAXX
DDHHMM KEKNYFYX
)SVC RQ MIL LOC= KADW
8–3–3. SERVICE MESSAGES

a. Receipt of the NS generated service message “NOTAMS FOUND 0” indicates that there are no military NOTAMs on file for the number or location requested.

b. The following is an example of a receipt of the NS cancellation of a military NOTAM.

EXAMPLE–
SVC B:
GG KDZZNAXX
DDHHMM KADW
MYYY/YY NOTAMC M0142/13
B) KADW

b. Formats for retrieving international NOTAMs via NADIN are as follows:

1. A request for a single NOTAM for a given accountability identifier:

EXAMPLE–
SVC B:
GG KDZZNAXX
042100 KDCAYFYX
jSVC RQ INT ACC= MYNYNYX NT=A0211/13
Reply:
GG KDCAYFYX 042105 KDZZNAXX
jSVC RQ INT ACC= MYNNNYX NT=A0211/13
181906 MYNNYNYX
A0211/00 NOTAMN
Q) MYNA/QMRLC/IV/NBO/A/000/999/ 2502N07728W005
A) MYNN
B) 1311181730
C) PERM
E) RWY 05 CLSD TO BOTH LDG AND DEP ACFT BUT MAY BE USED FOR TAX.

NOTE–
The Bahamas International NOTAM office issued a new NOTAM numbered A0211 and it was the 211th NOTAM issued for 2013. This NOTAM affected Nassau International Airport (MYNN) with a start time of November 18, 2013, at 1730 UTC and will be permanent. The condition is that Runway 5 is closed to both landing and departing aircraft but may be used for taxiing.

2. A request for all international NOTAMs for a given location:

EXAMPLE–
SVC B:
GG KDZZNAXX
DDHHMM KDCAYFYX
jSVC RQ INT LOC=CYUL

3. A request for a single international NOTAM issued in the KFDC series:

EXAMPLE–
SVC B:
GG KDZZNAXX
DDHHMM KDCAYFYX
jSVC RQ INT ACC=KFDC NT=A0174/13

4. A request for a single oceanic airspace NOTAM for a given domestic ARTCC:

EXAMPLE–
SVC B:
GG KDZZNAXX
DDHHMM KDCAYFYX
jSVC RQ INT ACC=KZNY NT=A0135/13
5. A request for all oceanic airspace NOTAMs for a given domestic ARTCC:

**EXAMPLE**–
SVC B:
GG KDZNNAXX
DDHHMM KDCAYFYX
>SVC RQ INT LOC=KZNY

6. A request for multiple international locations: AISR: (separated by a comma with no spaces)

**EXAMPLE**–
SVC B:
GG KDZNNAXX
DDHHMM KDCAYFYX
>SVC RQ INT LOC=EGGN,EDDF,LIIA,EGPX,SBRI,MYNN,MKJ

9–1–3. NS–GENERATED SERVICE MESSAGES

a. Receipt of the message “NOTAMS FOUND 0” indicates that there are no international NOTAMs on file for the number or location requested.

b. The following is an example of a receipt of the NS cancellation of an international NOTAM.

**EXAMPLE**–
SVC B:
GG KDZNNAXX
DDHHMM KDEN
FNNNN/YY NOTAMC Annnn/yy
A) KDEN
B) YYMMDDHHMM
C)
F) ILS RWY 34R U/S CANCELLED

9–2–1. REQUEST FOR CANADIAN NOTAMs FROM THE CANADIAN NOTAM SYSTEM

a. The following is the format for the request/reply message to the Canadian system:

**EXAMPLE**–
Request:
GG CYZZQONI
151245 KDCAYFYX NOTAMQ CYXS
Reply:
GG KDCAYFYX 151248 CYHQYNYN
RE NOTAMQ 151245 KDCAYFYX

– SUMMARY CYXS 01151248 –

000019 NOTAMN CYXS PRINCE GEORGE CYXS NDB X 260 U/S TIL 0001151845
000022 NOTAMN CYXS PRINCE GEORGE CYXS ILS U/S 001182100 TIL 0001192100
000023 NOTAMN CYXS PRINCE GEORGE FUEL UNAVAILABLE
– END OF SUMMARY –

**NOTE**–
The maximum number of locations that may be requested is 4; for example, NOTAMQ CYUL CYXE CYYT CYYC.
Appendix F. Radiosonde/Unmanned Free Balloon Flights

B–1. NWS RADIOSONDE/UNMANNED FREE BALLOON FLIGHTS

Use the procedures in this appendix for National Weather Service (NWS) radiosonde balloon releases.

B–2. NWS RADIOSONDE BALLOON RELEASES

a. Issue as Aeronautical Information at least 30 minutes prior to the release of a NWS radiosonde balloon under the following conditions:

   1. Delayed Release. A radiosonde balloon that will be released later than the scheduled times of 1130 or 2330 UTC.

   2. Special Observations. A release that will be made at times other than those specified for the scheduled observations (1130 or 2330 UTC).

b. The Aeronautical Information must contain the following information:

   1. The balloon release time.

   2. The time the balloon is expected to reach 10,000 MSL, using an average rate of climb of 800 feet per minute.

c. The locations of radiosonde balloon release points are listed in the Airport/Facility Directories.
