Federal Aviation Administration

Memorandum

Date: AUG 23 2017

To: Jeffrey T. Yarnell, Director, Air Traffic Control Facilities and Engineering Services, AJW-2

From: Kathleen Edic, Manager, Environmental and Occupational Safety and Health (EOSH) Services Group, AJW-23

Subject: Cancellation of FAA Orders 6000.54, Airway Facilities Hazard Communication Program and FAA SO AF 3900.26, Hazard Communication HAZCOM Program

Organization AJW-23 requests concurrence for the cancellation of FAA Orders 6000.54, Airway Facilities Hazard Communication Program, dated 2001 and SO AF 3900.26 Hazard Communication HAZCOM Program, dated 1998.

The subject orders prescribe responsibilities and guidance for the Hazard Communication (HAZCOM) Program by Occupational Safety and Health Act (OSHA) requirements which are outdated. Guidance on the new elements of the 2012 Hazard Communication Final Rule (HCS/GHS), mandatory hazard communications training and updated chemical labeling requirements, was sent to the FAA Management Board on October 1, 2015 (attached).

We have determined that there is no risk, no hazard change and no impact on the safety of the National Airspace System with the cancellation of these orders and therefore no formal safety risk analysis will be performed. All documentation associated with these cancellations will be maintained as a permanent case file for future reference.

Please validate on the appropriate line below that you agree or do not agree to the cancellation of FAA Orders 6000.54 and SO AF 3900.26.

If you have any questions please contact Kathleen Edic, Group Manager, EOSH Services Group, AJW-23, at (202)-267-7485.

Cancellation Accepted:

Jeffrey T. Yarnell — 8.25.17 Date

Cancellation Not Accepted:
