

Federal Aviation Administration

Memorandum

Date: 04/25/2016

To: Al Spence
ABA-20, Agency Directives Manager

From: David E. Spencer, Director
Operations Support, AJW-1

Prepared by: Heather Vaughn, AJW-172

Subject: Cancellation of Order JO 6180.10, Maintenance of the Weather Message Switching Center Replacement (WMSCR) System

Order JO 6180.10, Maintenance of the Weather Message Switching Center Replacement (WMSCR) System, should be cancelled. After successful migration of the WMSCR application onto the Integrated Enterprise Services Platform (IESP) via System Support Modification (SSM)-WMSCR-106, Linux Migration, the WMSCR HP Tandem Non-Stop server, racks, and equipment are obsolete and are being decommissioned. This migration makes Order JO 6180.10 obsolete.

Configuration Control Decision (CCD) N36026, Cancellation and removal of JO 6180.10D from NAS-MD-001, approves the cancellation of Order JO 6180.10D.

A handwritten signature in black ink, appearing to read "David E. Spencer", written over a horizontal line.

David E. Spencer, Director
Operations Support, AJW-1
