

Federal Aviation Administration

Memorandum

Date: October 18, 2013

To: Edward L. Bolton Jr., Assistant Administrator for NextGen, ANG-1

From: Michele Merkle, Director, NAS System Engineering Services, ANG-B

Subject: Safety Risk Management Decision Memorandum (SRMDM) for the Cancellation of FAA Order JO 1000.41, Air Traffic Organization NextGen and Operations Planning Safety Management System without Replacement

ACTION:

The NAS System Engineering Services requests approval to cancel FAA Order JO 1000.41, Air Traffic Organization NextGen and Operations Planning Safety Management System dated December 30, 2008 without replacement.

BACKGROUND

Order JO 1000.41 provided the requirements for the Safety Management System (SMS) within the former ATO NextGen and Operations Planning Services (ATO-P). The responsibilities for these requirements transferred to ANG with Notice NG 1100.340, Realignment of the Assistant Administrator for NextGen. Additionally, these requirements are now covered under Order NG 1000.44, the Assistant Administrator for NextGen Safety Management System (ANG) dated May 17, 2012.

SAFETY RISK MANAGEMENT (SRM) ASSESSMENT:

It was an oversight that Order NG 1000.44 did not include the canceling of Order JO 1000.41. This memo will correct this oversight and will have no impact to the National Aerospace System (NAS).

After reviewing the SRM Assessment, I (We), the undersigned, concur that the cancellation of the subject directive without replacement will correct this oversight and will not negatively affect the safety of the NAS.
