Aviation & Space Education

Pilots, Wings, and Flying Things!

Agricultural Pilot

Agricultural pilots control pests, increase crop production, and provide water!

Airline Pilot

Airline pilots provide transportation for people and things across the world.

Astronaut

Astronauts are pilots who are trained to travel in spacecraft for research and exploration.

Drone Pilot

Drones can be as large as an aircraft or small enough to fit in your pocket!

Flight Instructor

Flight instructors help teach people how to safely fly aircraft.

Helicopter Pilot

Helicopter pilots help many businesses and industries, including TV reporting, transportation, and emergency services.

Military Pilot

Military pilots help keep our country safe!

Seaplane Pilot

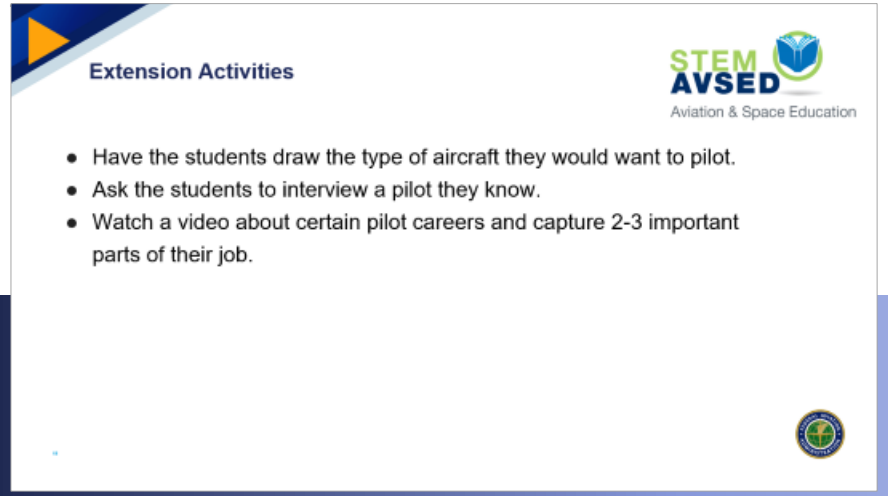

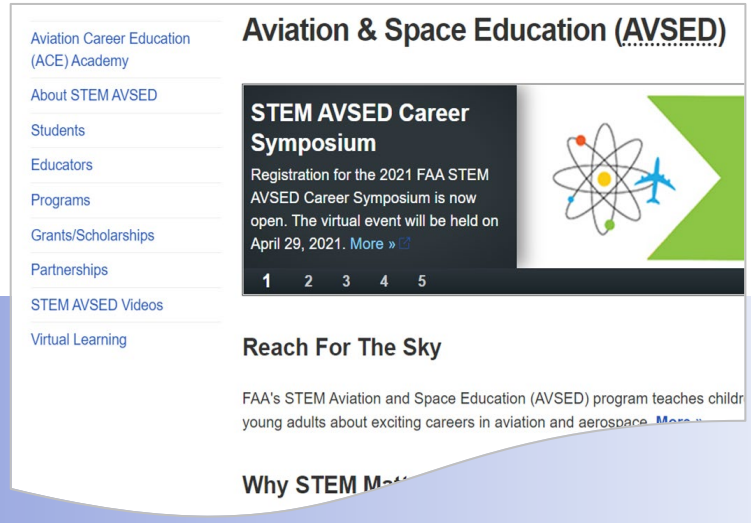

Seaplane pilots often fly in remote areas, like areas with a lot of open water!

Extension Activities

www.faa.gov/education/

Extension Activities

- Have the students draw the type of aircraft they would want to pilot.
- Ask the students to interview a pilot they know.
- Watch a video about certain pilot careers and capture 2-3 important parts of their job.
