

How To Make A Fan

To make a fan, you will need the following materials:

1. Construction paper (8 ½" x 11")
2. Stapler

Instructions:

1. Decorate both sides of a piece of construction paper. Beginning at the short side, fold over and under, making ¾" inch wide strips, down the length of the paper.
2. Hold one end of the folded paper firmly and staple several times and on both sides. Holding the stapled end, flip wrist rapidly so that the fan creates a "wind".
