

# FEDERAL NO DRONE ZONE TOOLKIT

## FIFA WORLD CUP 2026™

### PURPOSE

This U.S. federal government toolkit provides messaging, graphics and other resources to help communicate that FIFA World Cup 2026™ matches will have strict No Drone Zones.

It is important that our state, local and private sector partners use consistent messaging and that the graphics and/or signage have a standard and consistent look for brand recognition.

Unauthorized drone activity threatens public safety at the World Cup. The Federal Aviation Administration (FAA) will issue Temporary Flight Restrictions (TFRs) for each match, creating No Drone Zones around match venues and fan festivals.

This campaign focuses on deterrence, awareness, and enforcement through coordinated federal, state, and local efforts.

### PRIMARY MESSAGES TO SHARE/AMPLIFY

- World Cup venues and fan festivals are No Drone Zones.
- Flying drones near stadiums is illegal and dangerous.
- Violators will be prosecuted and penalties are severe.
- Leave your drone at home.
- Drones near stadiums? That's a red card. If you fly illegally, you will be found and prosecuted.
- There will be severe consequences for reckless, careless, or criminal drone use, including fines upwards of \$100,000, criminal charges, incarceration, and the confiscation of your drone.
- Safety is our goal. Every fan, every match. A massive multi-layered security plan that includes advanced anti-drone technology is in place to protect fans.
- See a drone breaking the rules? Blow the whistle! Report it to 911, on-site law enforcement, or the FBI at 1-800-CALL-FBI.
