

Technology for today. Innovation for tomorrow. We make IT work.

FAA Information Technology (AIT) Identity Management Careers

What inspires you?

- Do you enjoy working with innovative technology?
- Are you interested in aviation and/or the travel industry?
- Would you like to be part of a team whose mission is focused on safety and saving lives?

The FAA's Information Technology (AIT) team offers all of these things and more!

- Dynamic and exciting projects that you won't find anywhere else
- A variety of career tracks with opportunities for growth
- An extensive array of federal benefits, including work life-balance and a retirement pension

AIT Identity Managers have a positive impact on critical initiatives at the FAA.

- Collaborate with AIT and FAA Lines of Business (LOBs) to manage on premise and in cloud Microsoft Identity Providers to ensure uninterrupted authentication to all customers.
- Utilize Microsoft Active Directory (AD) administration tools, Windows Servers management and monitoring tools, scripts, and Azure Cloud administration consoles to manage, troubleshoot, and monitor Microsoft Windows Active Directory (AD), Domain Controllers (DC), Windows Member Servers and Cloud Environments.
- Provide subject matter expertise in Microsoft Windows Server (2016 or newer) AD administration, Domain Name System (DNS), Dynamic Host Configuration Protocol (DHCP), Distributed File System (DFS), Group Policy Objects (GPO), Azure Active Directory Connect (AAD), Active Directory Federation Services (ADFS), Web Application Proxy (WAP), Public Key Infrastructure (PKI), Multi Factor Authentication (MFA) and System Center Operations Manager (SCOM) administration.
- Apply knowledge of PowerShell scripting, networking, firewalls, security protocols, server backups, server patching and windows server security scan remediation.
