

**Technology for today. Innovation for tomorrow. We make IT work.**

## **FAA Information Technology (AIT) Program Management Careers**

### **What inspires you?**

- Do you enjoy working with innovative technology?
- Are you interested in aviation and/or the travel industry?
- Would you like to be part of a team whose mission is focused on safety and saving lives?

### **The FAA's Information Technology (AIT) team offers all of these things and more!**

- Dynamic and exciting projects that you won't find anywhere else
- A variety of career tracks with opportunities for growth
- An extensive array of federal benefits, including work life-balance and a retirement pension

### **AIT Program Managers have a positive impact on critical initiatives at the FAA by:**

- Applying a comprehensive knowledge of advanced IT concepts, principles, methods, standards and practices to manage a myriad of complex and significant IT programs.
- Developing and/or interpreting agency policies, procedures, and strategies which govern the planning and delivery of services. Ensuring the organization's policy and planning formulation process is followed; the appropriate capital investment planning principles and methods are applied; and enterprise IT goals and objectives are met.
- Creating the specific goals and policies that are needed for assigned IT programs. Supporting these through project selection, prioritization, scheduling, monitoring, and evaluation as well providing quality management, risk management and the estimation of resources requirements.
- Offering advanced technical guidance to internal and external stakeholders on critical IT issues. Applying new developments to previously unsolvable problems. Providing data-driven reports, presentations and analysis that facilitate risk-based decision making and continuous improvement. Making recommendations and/or decisions that significantly influence important agency IT programs and policies.
