

**Technology for today. Innovation for tomorrow. We make IT work.**

## **FAA Information Technology (AIT) Project Management Careers**

### **What inspires you?**

- Do you enjoy working with innovative technology?
- Are you interested in aviation and/or the travel industry?
- Would you like to be part of a team whose mission is focused on safety and saving lives?

### **The FAA's Information Technology (AIT) team offers all of these things and more!**

- Dynamic and exciting projects that you won't find anywhere else
- A variety of career tracks with opportunities for growth
- An extensive array of federal benefits, including work life-balance and a retirement pension

### **AIT Project Managers have a positive impact on critical initiatives at the FAA.**

- Lead complex IT projects/programs such as application development, systems upgrades/installations, technology outsourcing, and/or security initiatives.
- Oversee projects through all phases of the project management lifecycle (PMLC): initiate, plan, execute, monitor/control, and close often utilizing AGILE methodologies and/or JIRA.
- Facilitate cross-organizational teams to successfully resolve problems, achieve a common understanding of issues, and deliver desired results on time and within budget.
- Plan and schedule project deliverables, goals, and milestones. Determine costs. Implement strategies for risk mitigation and contingencies. Communicate impacts to stakeholders.
- Ensure appropriate standard practices and procedures are established and followed, including the development and delivery of product-related training and documentation to system users.
- Design and conduct analytical studies, cost-benefit analyses, and/or other necessary research on systems being procured.
- Develop reports and/or presentations on project status. Analyze data and recommend improvements as needed.
