FEDERAL AVIATION ADMINISTRATION**

Air Traffic Organization Policy

**ORDER
JO 7360.1H**

**Effective Date:
4/20/2023**

SUBJ: Aircraft Type Designators

This directive provides aircraft type designators (standard abbreviations for aircraft) for the aircraft that most commonly use air traffic services. Aircraft type designators are principally used by air traffic controllers, aircraft operators, and automation systems. Additionally, this directive provides information used by air traffic control for wake turbulence and runway separation.

For Michael R. Beckles
Director (A), Policy, AJV-P
Air Traffic Organization

Table of Contents

Chapter 1. General Information	1
1-1. Purpose of This Order	1
1-2. Audience	1

 Appendix A. Aircraft Type Designators	 A-1
 Appendix B. Aircraft Manufacturers	 B-1
 Appendix C. Aircraft Model	 C-1
 Appendix D. Manufacturer Code	 D-1

Chapter 1. General Information

1-1. Purpose of This Order. This order provides standard abbreviations (aircraft type designators) for the most common aircraft that are provided with air traffic services (ATS). This order also provides additional reference information used by ATS.

1-2. Audience. This order applies to all Air Traffic Organization (ATO) personnel and anyone using ATO directives.

1-3. Where to Find This Order. This order is available on the MYFAA employee Website at https://employees.faa.gov/tools_resources/orders_notices/ and http://faa.gov/air_traffic/publications.

1-4. Cancellation. This order cancels FAA Order JO 7360.1G, Aircraft Type Designators on the effective date of this order.

1-5. Summary of Changes. Changes from the previous version of this order:

a. RECAT 1.5 and 2.0 are no longer in use and have been removed.

b. Aircraft types added, deleted, or modified from the previous version of this order are shown in Chapter 3, Notation of Changes.

c. Addition of new paragraph 2-2, Requests for Aircraft Type Designators.

1-6. Distribution. This order is distributed to selected offices in Washington headquarters, service area offices, regional offices, the William J. Hughes Technical Center, the Mike Monroney Aeronautical Center, all air traffic field facilities, international aviation field offices, and those interested in public aviation.

Chapter 2. Contents of This Order

2-1. Aircraft Type Designators. An aircraft type designator is an abbreviated form of an aircraft type. This designator is used in air traffic service automation systems that exchange data. The aircraft type designator is primarily used in flight plans and air traffic service messages, but may be used in other matters when needed. Appendix A of this order contains an alphabetized list of aircraft type designators.

2-2. Requests for Aircraft Type Designators. Submit requests for an aircraft type designator to the International Civil Aviation Organization (ICAO) at:

<http://www.icao.int/publications/DOC8643/Pages/default.aspx>.

2-3. How Designators are Formulated. ICAO has the role of creating standard aircraft type designators for aircraft that commonly request air traffic service. ICAO assigns an aircraft type designator using the following principles:

- a. Only one designator will be assigned per aircraft type.
- b. A designator will be derived from the manufacturer's model number or name, or a common military type.
- c. The designator will not be longer than four characters and will generally begin with a letter.
- d. An assigned designator will not be changed for license-built aircraft, when an aircraft model is sold to or manufactured by another company, when the manufacturer's name changes, or when the aircraft type is derived or converted from another type.
- e. A different designator for an alternate or subtype version of the aircraft will only be allocated when there is a significant difference in performance for ATS or no shared designator can be assigned.
- f. Homebuilt, amateur-built, or kit plane aircraft that exist in operationally significant numbers will be assigned a designator; however, these aircraft will only be listed under the original designer or under the manufacturer that produces or produced the aircraft type in series.
- g. In general, an aircraft type designator will be assigned to all aircraft heavier than micro-/ultra-light. For ICAO Document 8643:
 - (1) Micro-/ultra-light are those aircraft types with a maximum certified take-off weight of 1,000 pounds or less and a stall speed not greater than 35 knots.
 - (2) Micro-/ultra-light helicopters and gyrocopters are those helicopters or gyrocopters with a maximum certified take-off weight of 1,000 pounds or less.
- h. Roman numerals used as part of aircraft model names or numbers will be replaced by Arabic numerals.

REFERENCE –

ICAO DOC 8643, Aircraft Type Designators.

NOTE 1 –

An asterisk () next to an aircraft type designator denotes a single-piloted military turbojet aircraft.*

REFERENCE –

P/CG Term – Single-Piloted Aircraft.

NOTE 2 –

For Class B Service Area separation, the aircraft type designator of aircraft weighing 19,000 pounds or less is underlined. For example, PANT, HAWK, UHIY, etc.

REFERENCE –

FAA Order JO 7110.65, Para 7-9-4, Separation.

2-4. Special Designators. Use these designators for aircraft that don't meet the criteria for a unique type designator:

- a. BALL – Balloon.
- b. GLID – Glider/sailplane.
- c. GYRO – Micro-/ultra-light gyrocopter.
- d. PARA – Powered parachute/Paraplane.
- e. SHIP – Airship.
- f. UHEL – Micro-/ultra-light helicopter.
- g. ULAC – Micro-/ultra-light aircraft.
- h. ZZZZ – Aircraft type not assigned a designator, with a description of the type in Item 18 (Other Information) of the ICAO flight plan or Remarks of a NAS flight plan.

2-5. Aircraft Manufacturers. The manufacturer of an aircraft is shown in capital letters, such as FAIRCHILD. A number in parentheses, for example (2), denotes a manufacturer using the same name as another manufacturer. See Appendix B for an alphabetical list of aircraft by manufacturer. Appendix D of this order contains an alphabetized list of aircraft manufacturers and their countries of origin.

2-6. Aircraft Models. Model names are listed, including military designators. Appendix C of this order contains an alphabetized list of aircraft model names/numbers.

2-7. Aircraft Class. The class is part of the description used to distinguish an aircraft type. The following aircraft classes are used:

- a. Fixed-wing.

NOTE –

Amphibians are denoted as “@Fixed-wing” and seaplanes are denoted as “\$Fixed-wing.”

- b. Gyrocopter.
- c. Helicopter.
- d. Tiltrotor.

2-8. Aircraft Engine Number and Type. The number of engines and engine types are included as part of the aircraft description. The following are abbreviations for engine types:

- a. E – Electric.
- b. P – Piston.
- c. T – Turboprop/Turboshaft.
- d. J – Jet.
- e. R – Rocket.

NOTE –

A “C” is used to indicate a fixed-wing aircraft having two engines coupled to drive a single propeller system.

2-9. Aircraft Weight Class.

- a. J – Super. AIRBUS A-380-800 (A388) and ANTONOV An-225 (A225).
- b. H – Heavy. Aircraft capable of takeoff weights of 300,000 pounds or more whether or not they are operating at this weight during a particular phase of flight.
- c. L – Large. Aircraft of more than 41,000 pounds, maximum certificated takeoff weight, up to but not including 300,000 pounds.
- d. S – Small. Aircraft of 41,000 pounds or less maximum certificated takeoff weight.

NOTE –

A “+” denotes an aircraft weighing between 12,500 pounds and 41,000 pounds. For Class B airspace rules, these aircraft are “large, turbine-engine-powered aircraft.”

REFERENCE –

P/CG Term – Aircraft Classes.

2-10. Wake Turbulence Category (WTC). In an ICAO flight plan, the WTC indicator follows the aircraft type designator in Item 9 (Number and Type of Aircraft and Wake Turbulence Category), for example, A345/H, GAZL/L, E737/M, and is based on the maximum certificated take-off weight, as follows:

- a. SUPER (J) – aircraft types specified as such in ICAO Doc 8643, Aircraft Type Designators;
- b. Heavy (H) – aircraft types of 300,000 pounds or more, with the exception of aircraft types listed in ICAO Doc 8643 in the SUPER (J) category;
- c. Medium (M) – aircraft types less than 300,000 pounds and more than 15,400 pounds;
- d. Light (L) – aircraft types of 15,400 pounds or less.

NOTE –

1. Where variants of an aircraft type fall into different ICAO wake turbulence categories, both categories are listed, such as Light/Medium or Medium/Heavy. In these cases, it is the responsibility of the pilot or operator to enter the appropriate single character WTC indicator in Item 9 of the ICAO flight plan.

2. Special Designators, such as GLID, UHEL, ZZZZ, etc., require a WTC in an ICAO flight plan using the criteria above. In these cases, it is the responsibility of the pilot or operator to enter the appropriate single character WTC indicator in Item 9 of the ICAO flight plan.

REFERENCE –

ICAO Doc 4444 – Procedures Air Navigation Service – Air Traffic Management, Para 4.9, Wake Turbulence Categories.

2-11. Consolidated Wake Turbulence (CWT) Aircraft Wake Categories.

- a. Category A – A388 and A225.
- b. Category B – Pairwise Upper Heavy aircraft.
- c. Category C – Pairwise Lower Heavy aircraft.
- d. Category D – Non-Pairwise Heavy aircraft.
- e. Category E – B757 aircraft.
- f. Category F – Upper Large aircraft excluding B757 aircraft.
- g. Category G – Lower Large aircraft.
- h. Category H – Upper Small aircraft with a maximum takeoff weight of more than 15,400 pounds up to 41,000 pounds.
- i. Category I – Lower Small aircraft with a maximum takeoff weight of 15,400 pounds or less.

NOTE –

Applicable only at facilities authorized to conduct operations in accordance with FAA Order JO 7110.126, Consolidated Wake Turbulence (CWT).

2-12. Same Runway Separation (SRS). Categorization criteria are specified in FAA Order JO 7110.65, Air Traffic Control, paragraph 3–9–6, Same Runway Separation.

2-13. Land and Hold Short Operations (LAHSO) Groups. FAA Order JO 7110.118, Land and Hold Short Operations (LAHSO), includes procedures and conditions for conducting land and hold short operations at designated airports. Aircraft with an assigned LAHSO group are listed in the appendices of this document.

a. TBL 1 is an air traffic control tool for identifying aircraft, by groups, that are able to land and hold short based on the available landing distance. Air traffic managers must utilize TBL 1 for identifying aircraft by groups that are able to land and hold short at their facility in accordance with FAA Order 7110.118, Land and Hold Short Operations.

b. At locations requesting to utilize LAHSO with aircraft requiring greater than 8,000 feet of available landing distance, air traffic managers must coordinate with the appropriate Flight Standards office and Air Traffic Operations to obtain a letter of authorization approving LAHSO.
