

**Twenty Eighth Meeting of the
Informal South Pacific ATS Co-ordinating Group
(ISPACG/28)**

**Papeete, Tahiti
5-7 March 2014**

Agenda Item 5.1 Seamless Airspace

ADS-B IMPLEMENTATION IN FRENCH POLYNESIA

Presented by SEAC PF

SUMMARY

This paper provides information on the ADS-B project in Tahiti FIR.

1. INTRODUCTION

- 1.1. Currently French Polynesia domestic airspace surveillance is provided through a Secondary Radar located on the main Island Tahiti. This radar covers only the part of the controlled area which is most frequently used. The current radar has an expected life of 15 years.
- 1.2. The ADS-B project has been launched to improve safety, surveillance, and efficiency.

2. DISCUSSION

- 2.1. A first project was undertaken in 2002. It has been abandoned in favour of radar which implementation took place in 2009.
- 2.2. Report to ADS-B slideshow on attached documents

3. ACTION BY THE MEETING

The meeting is invited to note the information in this paper
