

Table of Contents

Preface	iii	Resultant Relative Wind.....	2-8
Acknowledgments	v	Induced Flow (Downwash)	2-10
Table of Contents	vii	Rotor Blade Angles	2-10
Chapter 1		Angle of Incidence.....	2-10
Introduction to the Helicopter	1-1	Angle of Attack.....	2-10
Introduction.....	1-1	Powered Flight.....	2-13
Uses.....	1-3	Hovering Flight.....	2-13
Rotor System.....	1-3	Translating Tendency (Drift).....	2-14
Rotor Configurations	1-4	Pendular Action.....	2-14
Tail Rotor	1-5	Coriolis Effect (Law of Conservation of Angular Momentum)	2-15
Controlling Flight.....	1-5	Gyroscopic Precession	2-16
Flight Conditions	1-6	Vertical Flight.....	2-17
Chapter 2		Forward Flight	2-17
Aerodynamics of Flight	2-1	Airflow in Forward Flight	2-17
Introduction.....	2-1	Advancing Blade	2-18
Forces Acting on the Aircraft	2-2	Retreating Blade	2-18
Lift.....	2-2	Dissymmetry of Lift	2-18
Bernoulli's Principle.....	2-3	Translational Lift.....	2-19
Venturi Flow	2-3	Effective Translational Lift (ETL).....	2-20
Newton's Third Law of Motion	2-4	Translational Thrust.....	2-21
Weight.....	2-4	Induced Flow	2-21
Thrust.....	2-5	Transverse Flow Effect	2-22
Drag.....	2-5	Sideward Flight.....	2-22
Profile Drag	2-5	Rearward Flight	2-23
Induced Drag.....	2-6	Turning Flight	2-23
Parasite Drag	2-6	Autorotation	2-24
Total Drag.....	2-6	Hovering Autorotation	2-24
Airfoil	2-6	Autorotation (Forward Flight).....	2-25
Airfoil Terminology and Definitions.....	2-6	Chapter Summary	2-27
Airfoil Types	2-7	Chapter 3	
Symmetrical Airfoil.....	2-7	Helicopter Flight Controls	3-1
Nonsymmetrical Airfoil (Cambered).....	2-7	Introduction.....	3-1
Rotor Blade and Hub Definitions	2-8	Collective Pitch Control.....	3-2
Airflow and Reactions in the Rotor System.....	2-8	Throttle Control	3-2
Relative Wind.....	2-8	Governor/Correlator	3-2
Rotational Relative Wind (Tip-Path Plane).....	2-8	Cyclic Pitch Control.....	3-3
		Antitorque Pedals.....	3-4
		Chapter Summary	3-5

Chapter 4
Helicopter Components, Sections, and Systems.....4-1

Introduction.....4-1
Airframe.....4-1
Fuselage.....4-2
Main Rotor System.....4-2
 Semirigid Rotor System.....4-2
 Rigid Rotor System.....4-3
 Fully Articulated Rotor System.....4-4
 Tandem Rotor.....4-6
Swash Plate Assembly.....4-6
Freewheeling Unit.....4-6
Antitorque System.....4-7
Antitorque Drive Systems.....4-8
Engines.....4-8
 Reciprocating Engines.....4-8
 Turbine Engines.....4-8
 Compressor.....4-8
 Combustion Chamber.....4-9
 Turbine.....4-9
 Accessory Gearbox.....4-10
Transmission System.....4-10
 Main Rotor Transmission.....4-10
 Dual Tachometers.....4-10
 Structural Design.....4-11
 Clutch.....4-11
 Belt Drive Clutch.....4-11
 Centrifugal Clutch.....4-12
Fuel Systems.....4-12
 Fuel Supply System.....4-12
 Engine Fuel Control System.....4-13
Carburetor Ice.....4-13
Electrical Systems.....4-14
Hydraulics.....4-14
Stability Augmentations Systems.....4-16
 Force Trim.....4-16
 Active Augmentation Systems.....4-16
 Autopilot.....4-17
 Environmental Systems.....4-17
Anti-Icing Systems.....4-18
 Engine Anti-Ice.....4-18
 Carburetor Icing.....4-18
 Airframe Anti-Ice.....4-18
 Deicing.....4-18
Chapter Summary.....4-18

Chapter 5
Rotorcraft Flight Manual.....5-1

Introduction.....5-1

Preliminary Pages.....5-2
General Information (Section 1).....5-2
Operating Limitations (Section 2).....5-2
 Instrument Markings.....5-2
 Airspeed Limitations.....5-2
 Altitude Limitations.....5-3
 Rotor Limitations.....5-3
 Powerplant Limitations.....5-3
 Flight Limitations.....5-4
 Placards.....5-4
Emergency Procedures (Section 3).....5-4
Normal Procedures (Section 4).....5-5
Performance (Section 5).....5-5
Weight and Balance (Section 6).....5-5
Aircraft and Systems Description (Section 7).....5-5
Handling, Servicing, and Maintenance (Section 8).....5-5
Supplements (Section 9).....5-6
Safety and Operational Tips (Section 10).....5-6
Chapter Summary.....5-6

Chapter 6
Weight and Balance.....6-1

Introduction.....6-1
Weight.....6-2
 Basic Empty Weight.....6-2
 Maximum Gross Weight.....6-2
 Weight Limitations.....6-2
 Balance.....6-2
 Center of Gravity.....6-2
 CG Forward of Forward Limit.....6-2
 CG Aft of Aft Limit.....6-3
 Lateral Balance.....6-3
Weight and Balance Calculations.....6-3
 Reference Datum.....6-4
 Chapter Summary.....6-5

Chapter 7
Helicopter Performance.....7-1

Introduction.....7-1
Factors Affecting Performance.....7-2
 Moisture (Humidity).....7-2
 Weight.....7-2
 Winds.....7-2
Performance Charts.....7-2
 Autorotational Performance.....7-2
 Hovering Performance.....7-3
 Sample Hover Problem 1.....7-3
 Sample Hover Problem 2.....7-4
 Sample Hover Problem 3.....7-4
 Climb Performance.....7-4

Sample Cruise or Level Flight Problem	7-6	Normal Takeoff From a Hover	9-8
Sample Climb Problem.....	7-6	Technique	9-8
Chapter Summary	7-6	Common Errors	9-9
Chapter 8		Normal Takeoff From the Surface.....	9-9
Ground Procedures and Flight Preparations....	8-1	Technique	9-9
Introduction.....	8-1	Common Errors	9-9
Preflight.....	8-2	Crosswind Considerations During Takeoffs.....	9-10
Minimum Equipment Lists (MELs) and Operations		Straight-and-Level Flight.....	9-10
with Inoperative Equipment.....	8-2	Technique	9-10
Engine Start And Rotor Engagement.....	8-3	Common Errors	9-11
Rotor Safety Considerations.....	8-3	Turns	9-11
Aircraft Servicing.....	8-4	Technique	9-11
Safety In and Around Helicopters.....	8-4	Slips	9-12
Ramp Attendants and Aircraft Servicing Personnel.....	8-4	Skids	9-12
Passengers	8-4	Normal Climb	9-13
Pilot at the Flight Controls	8-6	Technique	9-13
After Landing and Securing	8-6	Common Errors	9-13
Chapter Summary	8-6	Normal Descent	9-13
		Technique	9-13
		Common Errors	9-13
Chapter 9		Ground Reference Maneuvers	9-14
Basic Flight Maneuvers	9-1	Rectangular Course	9-14
Introduction.....	9-1	Technique	9-14
The Four Fundamentals	9-2	Common Errors	9-15
Guidelines	9-2	S-Turns	9-15
Vertical Takeoff to a Hover	9-3	Technique	9-15
Technique	9-3	Common Errors	9-16
Common Errors	9-3	Turns Around a Point.....	9-16
Hovering	9-3	Technique	9-17
Technique	9-3	S-Turn Common Errors	9-17
Common Errors	9-4	Traffic Patterns.....	9-17
Hovering Turn.....	9-4	Approaches	9-19
Technique	9-4	Normal Approach to a Hover	9-19
Common Errors	9-5	Technique	9-19
Hovering—Forward Flight	9-5	Common Errors	9-20
Technique	9-5	Normal Approach to the Surface.....	9-20
Common Errors	9-6	Technique	9-20
Hovering—Sideward Flight.....	9-6	Common Errors	9-20
Technique	9-6	Crosswind During Approaches	9-20
Common Errors	9-6	Go-Around	9-20
Hovering—Rearward Flight	9-6	Chapter Summary	9-20
Technique	9-7		
Common Errors	9-7	Chapter 10	
Taxiing	9-7	Advanced Flight Maneuvers.....	10-1
Hover Taxi.....	9-7	Introduction.....	10-1
Air Taxi	9-7	Reconnaissance Procedures	10-2
Technique	9-7	High Reconnaissance	10-2
Common Errors	9-8	Low Reconnaissance	10-2
Surface Taxi	9-8	Ground Reconnaissance	10-2
Technique	9-8		
Common Errors	9-8		

Maximum Performance Takeoff.....	10-2	Settling With Power (Vortex Ring State)	11-9
Technique	10-3	Common Errors	11-11
Common Errors	10-3	Retreating Blade Stall	11-11
Running/Rolling Takeoff	10-3	Common Errors	11-11
Technique	10-4	Ground Resonance	11-11
Common Errors	10-4	Dynamic Rollover.....	11-12
Rapid Deceleration or Quick Stop	10-4	Critical Conditions	11-12
Technique	10-4	Cyclic Trim.....	11-13
Common Errors	10-5	Normal Takeoffs and Landings.....	11-13
Steep Approach.....	10-5	Slope Takeoffs and Landings	11-13
Technique	10-6	Use of Collective	11-13
Common Errors	10-6	Precautions	11-14
Shallow Approach and Running/Roll-On Landing.....	10-6	Low-G Conditions and Mast Bumping.....	11-14
Technique	10-7	Low Rotor RPM and Blade Stall	11-15
Common Errors	10-7	Recovery From Low Rotor RPM.....	11-15
Slope Operations.....	10-7	System Malfunctions	11-16
Slope Landing	10-7	Antitorque System Failure.....	11-16
Technique	10-7	Landing—Stuck Left Pedal	11-16
Common Errors	10-8	Landing—Stuck Neutral or Right Pedal	11-17
Slope Takeoff	10-8	Loss of Tail Rotor Effectiveness (LTE).....	11-17
Technique	10-9	Main Rotor Disk Interference (285–315°)	11-19
Common Errors	10-9	Weathercock Stability (120–240°)	11-20
Confined Area Operations.....	10-9	LTE at Altitude.....	11-20
Approach	10-10	Reducing the Onset of LTE.....	11-20
Takeoff	10-10	Recovery Technique.....	11-20
Common Errors	10-10	Main Drive Shaft or Clutch Failure.....	11-21
Pinnacle and Ridgeline Operations.....	10-10	Hydraulic Failure.....	11-21
Approach and Landing	10-11	Governor or Fuel Control Failure.....	11-21
Takeoff	10-11	Abnormal Vibration	11-21
Common Errors	10-12	Low-Frequency Vibrations	11-22
Chapter Summary	10-12	Medium- and High-Frequency Vibrations.....	11-22
		Tracking and Balance	11-22
Chapter 11		Multiengine Emergency Operations	11-22
Helicopter Emergencies and Hazards	11-1	Single-Engine Failure	11-22
Introduction.....	11-1	Dual-Engine Failure	11-22
Autorotation	11-2	Lost Procedures.....	11-22
Straight-In Autorotation	11-3	Emergency Equipment and Survival Gear.....	11-23
Technique	11-3	Chapter Summary	11-23
Common Errors	11-4		
Autorotation With Turns	11-5	Chapter 12	
Technique	11-5	Attitude Instrument Flying.....	12-1
Common Errors	11-6	Introduction.....	12-1
Practice Autorotation With a Power Recovery	11-6	Flight Instruments	12-2
Technique	11-6	Instrument Check	12-2
Common Errors	11-7	Airspeed Indicator	12-2
Power Failure in a Hover.....	11-7	Altimeter.....	12-2
Technique	11-7	Turn Indicator	12-2
Common Errors	11-7	Magnetic Compass	12-3
Height/Velocity Diagram.....	11-8	Helicopter Control and Performance	12-3
The Effect of Weight Versus Density Altitude	11-9	Helicopter Control	12-3
Common Errors	11-9	Common Errors of Attitude Instrument Flying	12-4

Fixation.....	12-4
Omission.....	12-4
Emphasis	12-4
Inadvertent Entry into IMC	12-4
Glass Cockpit or Advanced Avionics Aircraft	12-5
Chapter Summary	12-5

Chapter 13

Night Operations	13-1
Introduction.....	13-1
Visual Deficiencies	13-2
Night Myopia	13-2
Hyperopia	13-2
Astigmatism	13-2
Presbyopia	13-2
Vision in Flight	13-2
Visual Acuity.....	13-3
The Eye.....	13-4
Cones	13-4
Rods.....	13-4
Night Vision.....	13-4
Night Scanning.....	13-4
Obstruction Detection.....	13-6
Aircraft Lighting.....	13-6
Visual Illusions.....	13-6
Relative-Motion Illusion	13-6
Confusion With Ground Lights.....	13-6
Reversible Perspective Illusion	13-6
Flicker Vertigo	13-7
Night Flight.....	13-7
Preflight	13-7
Cockpit Lights	13-8
Engine Starting and Rotor Engagement.....	13-8
Taxi Technique.....	13-8
Takeoff	13-8
En Route Procedures	13-8
Collision Avoidance at Night.....	13-9
Approach and Landing	13-9
Illusions Leading to Landing Errors.....	13-9
Featureless Terrain Illusion	13-9
Atmospheric Illusions	13-9
Ground Lighting Illusions.....	13-9
Helicopter Night VFR Operations	13-10
Chapter Summary	13-10

Chapter 14

Effective Aeronautical Decision-Making	14-1
Introduction.....	14-1
Aeronautical Decision-Making (ADM).....	14-2
Scenario	14-2
Trescott Tips.....	14-3
The Decision-Making Process.....	14-4
Defining the Problem.....	14-4
Choosing a Course of Action.....	14-4
Implementing the Decision and Evaluating the Outcome.....	14-4
Decision-Making Models.....	14-5
Pilot Self-Assessment	14-6
Curiosity: Healthy or Harmful?.....	14-6
The PAVE Checklist	14-6
Single-Pilot Resource Management.....	14-7
Risk Management	14-9
Four Risk Elements	14-9
Assessing Risk.....	14-10
Using the 3P Model To Form Good Safety Habits	14-11
Workload or Task Management.....	14-12
Situational Awareness.....	14-13
Obstacles to Maintaining Situational Awareness	14-14
Operational Pitfalls.....	14-15
Controlled Flight Into Terrain (CFIT) Awareness.....	14-15
Automation Management.....	14-18
Chapter Summary	14-18

Glossary	G-1
