

Adopting SMS helps fulfill our vision and mission and will move AFS from a reactive safety approach to a proactive culture of prevention

AFS Vision

To be recognized and respected as the world leader on system safety through regulation and certification.

AFS Mission

To promote safety of flight of civil aircraft in air commerce by:

- ▶ Setting regulations and standards that consider the air carriers' duty to operate in the public interest at the highest possible degree of safety;
- ▶ Setting regulations and standards for other air commerce, air agencies, and airmen at the appropriate level of safety in the public interest;
- ▶ Accomplishing certification, inspection, surveillance, investigation, and enforcement activities; and
- ▶ Managing the systems for registry of civil aircraft and all official airmen records.

Safety Management System (SMS)

Policy

- Safety Policy
- Management Commitment & Accountability
- Key Safety Personnel
- Emergency Preparedness/Response
- SMS Documentation and Records

Safety Risk Management

- System & Task Analysis
- Hazard Identification
- Analyze Safety Risk
- Assess Safety Risk
- Control Safety Risk

Safety Promotion

- Personnel Expectations (Competencies)
- Training
- Communication
- Awareness

Safety Assurance

- Safety Performance Monitoring & Measurement
- Management of Change
- Continuous Improvement
