From: Christopher J. Hope, Manager, Flight Technologies and Procedure Division

Subject: Waiver to use Alternate Construction Methods for Instrument Departure Procedures (DPs) Evaluation

---

---

This memorandum waives the use of alternate construction methods for turns over facilities and Obstruction Evaluation Area construction for changeover points in TARGETS for DP evaluation.

TARGETS is being released for use on May 25, 2022 and the criteria in Order 8260.3E (CHG 2), United States Standard for Terminal Instrument Procedures, to support the release is delayed in coordination. The appropriate Safety Management System has been completed for the criteria change. This waiver allows service providers the use of the new criteria in TARGETS without processing a waiver through the Procedures Review Board for a short term while the order is in coordination.

This memorandum remains in effect until rescinded. Please direct all inquiries to Thomas J. Nichols, Standards Section Manager, Flight Procedures and Airspace Group, at 405-954-1171 or [thomas.j.nichols@faa.gov](mailto:thomas.j.nichols@faa.gov).
