FAA Organizational Structure

Office of Environment and Energy (AEE)

Office of Environment and Energy (AEE)

Economic Benefits of Aviation

in U.S. economic activity annually

SOURCE: FAA Air Traffic Organization

Aviation equipment (aircraft, spacecraft, and related equipment) is largest export sector in U.S. economy accounting for over 8% of total exports.

SOURCE: U.S. International Trade Commission

(exports-imports)

Environmental Impacts of Aviation

AEE Mission and Vision

Mission:

To understand, manage, and reduce the environmental impacts of global aviation through research, technological innovation, policy, and outreach to benefit the public

Vision:

Remove environmental constraints on aviation growth by achieving quiet, clean, and efficient air transportation

Environmental Protection that Allows Sustained Aviation Growth

ENVIRONMENT AND ENERGY GOALS

NOISE

Reduce the number of people exposed to significant noise around U.S. airports

AIR QUALITY

Reduce significant air quality impacts attributable to aviation

FUEL

Achieve net fuel burn reduction by 2020 relative to a 2005 baseline and deploy sustainable aviation fuels.

Environmental & Energy Strategy

3. Environment and Energy Website: http://www.faa.gov/go/environment

Environment and Energy (E&E) Research Programs

Continuous Lower Energy, Emissions and Noise (CLEEN)

- Reduce aircraft fuel burn, emissions and noise through technology & advance alternative jet fuels
- Cost share partnership with industry

ASCENT Center of Excellence (COE)

- COE for Alternative Jet Fuel and Environment
- Cost share research with universities

Additional Efforts

- Commercial Aviation Alternative Fuels Initiative (CAAFI)
- Contract mechanisms (e.g., SEMRS, PEARS-II)
- Volpe Transportation Center

Emerging Aircraft Types

Supersonic Aircraft

- Much interest by manufacturers to begin producing aircraft capable of flying Mach 1+
- FAA announced two rulemakings regarding supersonics
 - Clarification of the process to apply for a special flight authorization to fly over Mach 1 in the U.S.
 - Development of landing and take off noise certification process
- Have directed substantial R&D efforts to supersonic aircraft

Unmanned Aircraft Systems (UAS)

- Research has started to understand the potential noise impacts of UAS and to develop appropriate noise certification process for UAS
- Working to leverage the UAS Integration Pilot Program (IPP)

Unmanned Aircraft Systems (UAM)

Looking to build on helicopter R&D efforts with new ASCENT project

Commercial Space

 Focus is on providing information on appropriate methodologies to use for noise modeling for the National Environmental Policy Act (NEPA)

Efforts Relating to Aircraft Noise Understanding Noise

- Improving modeling capabilities
- Examining relationship between noise and annoyance, sleep, cardiovascular health and children's learning
- Evaluating current aircraft, helicopters, commercial supersonic aircraft, unmanned aerial systems, and commercial space vehicles

Outreach

- Enhanced community involvement
- Increase public understanding

Reducing noise at the source

- Aircraft technologies and architecture
- Vehicle operations
- Noise standards

Mitigation

- Noise Compatibility Planning (Part 150)
- Noise-based access restrictions (Part 161)

Efforts Relating to Aircraft Emissions

Understanding Emissions

- Particulate Matter (PM) measurements and modeling
- Improving atmospheric impact modeling capabilities
- Evaluating current aircraft, commercial supersonic aircraft, unmanned aerial systems, and commercial space vehicles

Reducing Emissions at the Source

- Aircraft technologies and architecture
- Modifications to fuel composition
- Vehicle operations
- Engine standard (NOx and PM standards)

Mitigation

- Alternative fuel sources
- Policy measures (CORSIA)

Efforts Relating to Jet Fuel

Testing

- Support Certification/Qualification testing to ensure fuels are safe for use
- Improve Certification/Qualification process to reduce the time and resources required to ensure fuels are safe for use

Analysis

- Environmental sustainability to ensure fuels are properly credited under the ICAO Carbon Offsetting and Reduction Scheme (CORSIA)
- Techno-economic analysis to understand how to reduce costs
- Future scenarios

Coordination

- Interagency
- Public-Private
- State & Regional
- International

Efforts Relating to Aircraft Technology

Continuous Lower Energy, Emissions & Noise (CLEEN)

- FAA led public-private partnership with 100% cost share from industry
- Reducing fuel burn, emissions and noise via aircraft and engine technologies and alternative jet fuels
- Conducting ground and/or flight test demonstrations to accelerate maturation of certifiable aircraft and engine technologies

	Phase I	Phase II	Phase III*		
Time Frame	2010-2015	2016-2020	2021-2025		
FAA Budget	~\$125M	~\$100M	TBD		
Noise Reduction Goal	25 dB cumulative noise reduction cumulative to Stage 5 and/or reduces community noise exposure (new goal for Phase III)				
Fuel Burn Goal	33% reduction	40% reduction	-20% re: CAEP/10 Std.		
NO _x Emissions Reduction Goal	60% landing/take-off NO _x emissions	75% landing/take- (-70% re:	off NO _x emissions CAEP/8)		
Particulate Matter Reduction Goal			Reduction relative to CAEP/11 Std		
Entry into Service	2018	2026	2031		
*The information for the thi	*The information for the third phase of the CLEEN Program is notional as the EAA is in the process of developing the final solicitation				

For more information on CLEEN program: http://www.faa.gov/go/cleen CLEEN III Industry Day: https://faaco.faa.gov/index.cfm/announcement/view/32134

CLEEN III Solicitation: https://faaco.faa.gov/index.cfm/announcement/view/31885

Aviation Environmental Design Tool (AEDT)

- Computes noise, fuel burn and emissions simultaneously
- Can analyze airport, regional, national, and global scales
- Required for all regulatory actions
- Also in use by 428 international users from 36 countries

AEDT Development Plan

- Current version of tool, AEDT2d
- Internally released, AEDT3a, with BADA4 functionality
 - Seeking to improve capabilities at lower noise levels
 - Improving takeoff weight and thrust modeling
 - Improving aircraft performance module
- Developing AEDT3b with public release planned in September, 2019
- Laying ground work for AEDT4 with a planned 2022 release

AEDT Taxi-In Taxi-In Taxi-OT Taxi-O

Modeling to Support Decision-Making

 Aviation environmental policies affect noise and emissions which have varied environmental impacts. Using the aviation environmental tool suite to assess the impacts of noise and emissions for policy assessment.

 Utilize Volpe Center and ASCENT Center of Excellence universities to assist FAA in developing data to inform decision making

Highlights of Ongoing R&D Efforts (E&E Portfolio)

- Much effort on supersonic aircraft
- Considerable emphasis on noise:
 - Research on noise impacts continues
 - Exploring low noise operational procedures (with ATO and APP)
 - Work on helicopter noise is making good progress
 - Thinking how to approach UAS/UAM noise
- Particulate Matter efforts laid foundation for CAEP standard
- Will release AEDT3b executing long term vision for AEDT
- Alternative jet fuels: CORSIA, CAAFI, and ASTM
- Technology maturation in CLEEN continues and we are setting stage for 3rd Phase of CLEEN
- Commercial space noise and emissions on the radar

Outreach Materials

Continuing to maintain/update materials:

- Environment and Energy Tri-Fold
- FAA Environment and Energy Website (faa.gov/go/environment)
- Noise Website (faa.gov/go/aviationnoise)
- CLEEN Website (faa.gov/go/cleen)
- ASCENT Website (ascent.aero)
- CAAFI Website (caafi.org)

Presentation Outline

- E&E Portfolio Background and Overview
- ASCENT COE Update
- Budget Profile for E&E Portfolio
- Summary
- Backup:
 - E&E Portfolio within the new NARP

FY18 Funding Allocation – by Mechanism

- Primarily use three funding mechanisms to conduct R&D
- Contracts
 - CLEEN
 - PEARS-II
 - SEMRS
- Grants
 - ASCENT COE
- Inter Agency Agreement (IAA)
 - Volpe Center
- Have had challenges with contracts, grants, and IAA

ASCENT Center of Excellence (COE)

Timeline:

- In 2004, FAA established PARTNER Center of Excellence
- In 2013, FAA established Center of Excellence for Alternative Jet Fuels and Environment, a.k.a. Aviation Sustainability Center or ASCENT, that continues work of PARTNER with expanded efforts on alternative jet fuels R&D

COE fulfills requirements:

- P.L.112-95 Sec. 911 conduct research to assist the development and qualification of jet fuel from alternative sources
- P.L.108-176 Title III Sec. 326 conduct research to reduce community exposure to civilian aircraft noise and emissions

Budget Direction:

- FY2019 budget: FAA directed to use \$15M in RE&D funds for ASCENT
- FY2018 budget: FAA directed to use \$15M in RE&D funds for ASCENT
- FY2016 budget: FAA directed to use \$10.6M in RE&D funds for ASCENT

ASCENT Center of Excellence (COE)

Lead Universities:

Washington State University (WSU)* Massachusetts Institute of Technology (MIT) **Core Universities:** Boston University (BU) Georgia Institute of Technology (Ga Tech) Missouri University of Science and Technology (MS&T) Oregon State University (OSU)* Pennsylvania State University (PSU)* Purdue University (PU)* Stanford University (SU) University of Dayton (UD) University of Hawaii (UH)* University of Illinois at Urbana-Champaign (UIUC)* University of North Carolina at Chapel Hill (UNC) University of Pennsylvania (UPenn) University of Tennessee (UT)* University of Washington (UW)*

Timeline:

In 2004, FAA established PARTNER Center of Excellence

In 2013, FAA established Center of Excellence for Alternative Jet Fuels and Environment, a.k.a. Aviation Sustainability Center or ASCENT, continues PARTNER with expanded efforts on alt fuels

Advisory Committee - 58 organizations:

- 5 airports
- 4 airlines
- 7 NGO/advocacy
- 9 aviation manufacturers
- 11 feedstock/fuel manufacturers
- 22 R&D, service to aviation sector

For more information: https://ascent.aero/

ASCENT COE Details

ASCENT Leadership

- Mike Wolcott of WSU Director
- John Hansman of MIT Co-Director
- Carol Sim of WSU Assistant Director

Coming ASCENT Meetings

- October 22-23 in Alexandra, VA
- Mar 31-Apr 2 in Savannah, GA

DOT/FAA Centers of Excellence

(ASCENT is one of 6 active COEs within FAA)

DOT/FAA Centers of Excellence Funding Profile

ASCENT typically receives 1/3 of overall COE funding

CENTER OF EXCELLENCE	FY 18	FY 17	FY 16	FY 15
Technical Training and Human Performance	\$ -	\$ 1,538,757	\$ 5,000,000	\$-
Unmanned Aircraft Systems	\$ 6,106,452	\$ 3,883,711	\$ 3,474,932	\$ 4,763,506
Alternative Jet Fuels and Environment	\$ 3,170,047	\$ 9,809,723	\$ 9,393,601	\$ 10,598,441
General Aviation	\$ 315,964	\$ 3,267,686	\$ 3,697,891	\$ 3,092,624
Commercial Space Transportation	\$ 819,879	\$ 1,264,293	\$ 1,191,548	\$ 1,272,864
Joint Center of Excellence for Advanced Materials	\$ 1,456,658	\$ 4,894,469	\$ 5,639,146	\$ 2,429,612
TOTAL	\$11,869,000	\$ 24,658,639	\$ 28,397,118	\$ 22,157,047

Notes:

- The table captures the year of grant execution; it does not capture the amount of the FY appropriation that is being spent in a given year. For example, ASCENT will be awarded roughly \$15.2M of the FY18 FAA RE&D A13.a and A13.b appropriation, but the universities will receive these funds over the a time period that covers FY18 through FY20.
- FY19 currently being processed

ASCENT COE Grant Approval Process

ASCENT COE Project Idea Generation

- Emailed ASCENT and CLEEN R&D Communities seeking new project ideas for innovative solutions to reduce noise, fuel burn, and emissions:
 - Aircraft and engine technologies
 - Both fixed wing and rotorcraft air vehicles at all scales and vehicle speeds
 - Changes in aircraft architecture (e.g., to enable shielding of fan forward engine noise)
 - Vehicle flight management systems and other software systems that are used in air vehicle operations
 - Alternative jet fuels
 - Changes in fuel composition of conventional jet fuels
 - Vehicle flight operations
 - Methods to improve modeling of noise and emissions for air vehicles that could lead to reduction in noise, fuel burn, and emissions
- If idea was not submitted by ASCENT university, it would be submitted to all ASCENT schools through a Notice of Funding Opportunity
- AEE reviewed existing research portfolio to identify potential project extensions

ASCENT COE Projects Ideas

Timeline of Grant Approvals See Separate COE Project Status Document

Action Memo	# of Grants	Total Funds	APL Signature	S-1 Signature
FY2018 #1	9	\$2.8M	6/10/18	9/24/18
FY2019 #1	15	\$3.3M	10/11/18	3/29/18
FY2019 #2	8	\$2.6M	11/28/18	5/31/19
FY2019 #3	1	\$1.7M	3/21/19	6/14/19

Implementing new process (APL approved project ideas on 7/2/19)

Projects selected for FY19/20 Memos (Using FY18/19 Funding) Subsonic Technology Evaluation / Development

Project	University (State)	Work Description	Amount
P2 - Re-Examination of Engine to Engine PM Emissions variability using an ARP Reference Sampling and Measurement System	Missouri University of Science and Technology (MO)	Quantify the effects of ambient atmospheric conditions and fuel composition on particulate matter (a.k.a. soot) from aircraft engines.	\$1,217,221 (FY19 Memo)
P48 - Analysis to Support the Development of an Engine nvPM Emissions Standard	Massachusetts Institute of Technology (MA)	Assess the costs and benefits of implementing an aircraft engine non-volatile particulate matter (nvPM) standard.	\$200,000 (FY19 Memo)
P61: Noise Certification Streamlining	Georgia Institute of Technology (GA)	Examine the process of noise certification and develop a streamlined approach that is flexible enough for current, emerging, and future air vehicles.	\$250,000 (FY20 Memo)
P37 - Continuous Lower Energy Emissions and Noise (CLEEN) II Aircraft Technology Modeling and Assessment	Georgia Institute of Technology (GA)	Assess the reductions in fuel consumption, emissions, and noise that could result from the fleet-wide introduction of CLEEN technologies.	\$170,000 (FY19 Memo) \$ 240,000 (FY20 Memo)
P50 - Over-Wing Engine Placement Evaluation	Georgia Institute of Technology (GA)	Analyze potential reduction in fuel burn and noise from changing the placement of aircraft engines on modern aircraft.	\$ 590,000 (FY20 Memo)
P51 - Combustion concepts for next-generation aircraft engines	Massachusetts Institute of Technology (MA)	Analyze combustion concepts that could be used to reduce particulate matter emissions from future aircraft engines.	\$ 300,000 (FY20 Memo)
P55 - Noise Generation and Propagation from Advanced Combustors	Georgia Institute of Technology (GA)	Conduct experiments and analysis to develop analytical tools that can be used by industry to reduce the noise generated by combustors in modern jet engines.	\$ 1,499,984 (FY20 Memo)
P56 - Turbine Cooling Through Additive Manufacturing	Pennsylvania State University (PA)	Conduct experiments and analysis to getermine how new manufacturing techniques could be used to leral A improve the fuel efficiency of more in exercites. Inist	vi \$ 400,000 (FY202Memo) ation

Projects selected for FY19/20 Memos (Using FY18/19 Funding) Supersonic Technology Evaluation / Development

Project	University (State)	Work Description	Amount
P10 - Aircraft Technology	Georgia Institute of Technology (GA)	Evaluate supersonic aircraft technologies and evolution of the fleet in response to the	\$ 650,000 (FY20 Memo) \$ 1,200,000 (FY20 Memo)
Modeling and Assessment	Purdue University (IN)	introduction of these technologies to support decision making by the FAA in ICAO CAEP.	\$ 114,815 (FY19 Memo) \$ 222,116 (FY20 Memo)
P41 - Identification of Noise Acceptance Onset for Noise Certification Standards of Supersonic Airplane	Pennsylvania State University (PA)	Support development of certification processes for future civilian supersonic aircraft	\$ 390,000 (FY19 Memo)
P42 - Acoustical Model of Mach Cut-off Flight	Pennsylvania State University (PA)	Evaluate the feasibility of Mach Cut-off Flight as a means to enable supersonic flight over land.	\$ 170,000 (FY19 Memo)
P47 - Clean Sheet Supersonic Aircraft Engine Design and Performance	Massachusetts Institute of Technology (MA)	Analyze performance of gas turbine engines specifically designed for use on civil supersonic aircraft.	\$ 250,000 (FY19 Memo) \$ 400,000 (FY20 Memo)
P57 - Support for Supersonic Aircraft Noise Efforts in ICAO CAEP	Pennsylvania State University (PA)	Support development of certification processes for future civilian supersonic aircraft	\$ 200,000 (FY20 Memo)
	University of Illinois (IL)		
P59: Jet Noise Modeling to Support Low Noise Supersonic Aircraft Technology Development	Stanford University (CA)	Use state-of-the-art multi-fidelity modeling	
	Pennsylvania State University (PA)	reduction from civil supersonic jet transports.	φ 000,000 (F τ 20 Weffi0)
	Georgia Institute of Technology (GA)		

Projects selected for FY19/20 Memos (Using FY18/19 Funding) Jet Fuels Analysis and CORSIA Support

Project	University (State)	Work Description	Amount
P1 - Alternative Jet Fuel Supply Chain Analysis	Washington State University (WA) Massachusetts Institute of Technology (MA) Purdue University (IN) University of Tennessee (TN) Pennsylvania State University (PA) University of Hawaii	Provide scientific data and analysis to support the evaluation of fossil and renewable jet fuels for potential inclusion in the ICAO Carbon Offsetting and Reduction Scheme for International Aviation (CORSIA). Evaluate regional alternative jet fuel supply chains in terms of their potential for domestic fuel production and rural economic development.	\$ 510,918 (FY19 Memo) \$ 525,001 (FY20 Memo) \$ 575,000 (FY19 Memo) \$ 400,000 (FY20 Memo) \$ 400,000 (FY19 Memo) \$ 523,000 (FY19 Memo) \$ 260,000 (FY19 Memo) \$ 207,623 (FY19 Memo) \$200,000 (FY19 Memo)
P39 - Naphthalene Removal Assessment	Massachusetts Institute of Technology (MA)	Assess the costs and benefits of reducing the naphthalene content in jet fuel.	\$350,000 (FY19 Memo)
P52 - Comparative assessment of electrification strategies for aviation	Massachusetts Institute of Technology (MA)	Analyze the relative economic and environmental benefits of using electricity to power future aircraft via batteries versus liquid fuels produced from electricity.	\$ 300,000 (FY20 Memo)

Projects selected for FY19/20 Memos (Using FY18/19 Funding) Jet Fuels Testing

Project	University (State)	Work Description	Amount
P25 - Shock Tube and Flow Reactor Studies of the Kinetics of Jet Fuels (National Jet Fuels Combustion Program: Area #1)	Stanford University (CA)	Develop experimental database to test and refine computer models of jet fuel chemistry and its impact on combustion.	\$110,000 (FY19 Memo)
P27 - Advanced Combustion (National Jet Fuels Combustion Program: Area #3)	Georgia Institute of Technology (GA)	Characterize how jet fuel composition affects the likelihood that combustion gas turbine engines would stop.	\$30,000 (FY19 Memo)
P29 - Atomization Tests and Models (National Jet Fuels Combustion Program: Area #5)	Purdue University (IN)	Use experiments to understand how fuel composition affects spray properties within a combustor.	\$120,000 (FY19 Memo)
P31 - Alternative Jet Fuel Test and Evaluation to support the ASTM International Approval Process	University of Dayton (OH)	In collaboration with industry, conduct combustion testing of novel drop-in jet fuels to ensure they are safe for use.	\$199,966 (FY19 Memo) \$ 1,926,434 (FY20 Memo)
P33 - Alternative Fuels Test Database Library	University of Illinois (IL)	Develop a comprehensive database of test results that have been conducted on jet fuels with varied chemical composition.	\$ 130,000 (FY19 Memo) \$ 130,000 (FY20 Memo)
P34 - National Jet Fuels Combustion Program – Overall Program Integration and Analysis	University of Dayton (OH)	Characterize how jet fuel composition affects the likelihood that combustion gas turbine engines would stop.	\$ 582,983 (FY20 Memo)

Projects selected for FY19/20 Memos (Using FY18/19 Funding) Operational Procedures to Reduce Noise

Project	University (State)	Work Description	Amount
P23 - Analytical Approach for Quantifying Noise from Advanced Operational Procedures	Massachusetts Institute of Technology (MA)	Use noise analysis framework to develop advanced operational procedure concepts.	\$ 250,000 (FY19 Memo) \$ 250,000 (FY20 Memo)
P38 - Rotorcraft Noise Abatement Procedures Development	Pennsylvania State University (PA)	Develop rotorcraft noise abatement procedures through computational and analytical modeling.	\$ 150,000 (FY19 Memo) \$ 150,000 (FY20 Memo)
P44 - Aircraft Noise Abatement Procedure Modeling and Validation	Massachusetts Institute of Technology (MA)	Validate noise reductions from advanced operational flight procedure concepts that use modified configurations and reduced speed.	\$350,000 (FY19 Memo)
P49 - Urban Air Mobility Noise Reduction Modeling	Pennsylvania State University (PA)	Extend helicopter noise modeling efforts to urban air mobility vehicles to identify means for noise reduction.	\$ 280,000 (FY20 Memo)

Projects selected for FY19/20 Memos (Using FY18/19 Funding) AEDT Development Support

Project	University (State)	Work Description	Amount
P19 - Development of Aviation Air Quality Tools for Airport Specific Impact Assessment - Air Quality Modeling	University of North Carolina (NC)	Improve modeling tools that are used as a part of mandatory National Environmental Policy Act (NEPA) reviews.	\$ 300,000 (FY19 Memo) \$ 350,064 (FY20 Memo)
P36 - Parametric Uncertainty Assessment for AEDT	Georgia Institute of Technology (GA)	Provide a robust uncertainty evaluation of the AEDT to inform future development of the tool.	\$300,000 (FY19 Memo)
P40 - Quantifying Uncertainties in	Purdue University (IN)	Understand and quantify uncertainties in the prediction of poise from aircraft operations that accounts for real world	\$85,000 (FY19 Memo)
World Situations	Penn. State University (PA)	situations such as actual weather conditions.	\$170,000 (FY19 Memo)
P43 - Noise Power Distance Re- Evaluation	Georgia Institute of Technology (GA)	Develop an improved noise prediction architecture for the AEDT.	\$ 220,000 (FY19 Memo) \$ 200,000 (FY20 Memo)
P45 - Takeoff / Climb Analysis to Support AEDT Aircraft Performance Module Development	Georgia Institute of Technology (GA)	Provide data and methods to improve the aircraft weight and takeoff thrust modeling capabilities within the AEDT	\$175,000 (FY19 Memo)
P46 - Surface Analysis to support AEDT APM Development	Massachusetts Institute of Technology (MA)	Identify and evaluate methods for improving taxi performance modeling in the AEDT to better reflect actual operations.	\$ 75,000 (FY19 Memo) \$ 200,000 (FY20 Memo)
P53 - Validation of low exposure noise modeling by open source data management and visualization systems integrated with AEDT	Stanford University (CA)	Use AEDT to improve noise prediction methods in an open- source overflight analysis tool and leverage noise monitor data and Stanford software expertise to improve AEDT capabilities.	\$ 169,903 (FY20 Memo)
P54 - AEDT Evaluation and Development Support	Georgia Institute of Technology (GA)	Identify and evaluate methods that could be used to improve the performance modeling within AEDT to better reflect actual operations.	\$ 700,000 (FY20 Memo)
P60: Analytical Methods for Expanding the AEDT Aircraft Fleet Database	Georgia Institute of Technology (GA)	Improve the accuracy of AEDT noise and emissions modeling of aircraft not currently in the Aircraft Noise and Performance (ANP) database.	\$150,000 (FY20 Memo)
P62: Noise Model Validation for	Georgia Institute of Technology (GA)	Assess the accuracy of AEDT in cal	\$350,000 (EV20 Momo)
AEDT	Penn .State University (PA)	vicinity of airports as well as furthe	ion

Projects selected for FY19/20 Memos (Using FY18/19 Funding) Environmental Impact Examination

Project	University (State)	Work Description	Amount
P3: Cardiovascular Disease and Aircraft Noise Exposure	Boston University (MA)	Evaluate impacts of civil aircraft noise on health in terms of heart disease.	\$1,729,286 (FY19 Memo)
P18: Community Measurements of Aviation Emissions Contributions to Ambient Air Quality	Boston University (MA)	Examine community air quality measurements to determine the contributions of aircraft to ground based concentrations.	\$1,299,991 (FY20 Memo)
P22: Evaluation of FAA Climate Tools	University of Illinois (IL)	Use state-of-the-art geophysical models of the earth system to evaluate costs and benefits of technologies that could enable supersonic aviation.	\$ 200,000 (FY20 Memo)
P58: Improving Policy Analysis Tools to Evaluate Aircraft Operations in the Stratosphere	Massachusetts Institute of Technology (MA)	Use state-of-the-art science to improve existing analytical tools to enable rapid assessments of the effects of high altitude emissions on the atmosphere.	\$ 500,000 (FY20 Memo)

Other Projects

Project	University (State)	Work Description	Amount
P0 - Program Office for Center of Excellence for Alternative Jet Fuels and Environment	Washington State University (WA)	Provide program office support for the Center of Excellence for Alternative Jet Fuels and Environment.	\$390,911 (FY19 Memo) \$ 399,713 (FY20 Memo)
P8 - Outreach Project	Pennsylvania State University (PA)	Provide educational information on aviation noise to stakeholders through the NoiseQuest website	\$30,000 (FY19 Memo)

Next Steps on ASCENT Grants

- Working to develop and process FY20 action memos
- Working with APL to get decision on 14 remaining project ideas (these ideas are largely focused on fuels and technology development)
- Once we have decision on the 14 remaining projects, will notify all of ASCENT that this round of idea solicitation is closed
- Intend to solicit another round of project ideas
 - Will send after October Advisory Committee meeting
 - Available funding for new project ideas will be less than the previous round of ideas as many of the previously mentioned projects are multi-year efforts, but only received one year of funding

Presentation Outline

- E&E Portfolio Background and Overview
 ASCENT COE Update
- Budget Profile for E&E Portfolio
- Summary
- Backup:
 - E&E Portfolio within the new NARP

Funding Profile - E&E Portfolio (Contract Funding)

Enacted

Budget President's

Not shown on graph:

Airport Technology Research has ~\$1.5M/year for noise/environment projects Airports Cooperative Research Program (ACRP) provides ~\$5M/year for environment projects

E&E R&D Budget Profile – FY15-FY20

FY2020 President Budget for FAA (see pages 357-363 for E&E Portfolio): https://www.transportation.gov/mission/budget/faa-cj-fy-2020-estimates

Environment & Energy R&D Portfolio - FY19

Core RE&D (A13.a) Environment & Energy

- Improve scientific understanding of noise and emissions constraints
- Incorporate scientific knowledge into an integrated analytical tool suite
 - Robust support to the continued development of AEDT
 - Continued support to the development of a fleet forecast tool, FLEET-Builder
 - Continuing effort to develop screening tools to complement AEDT
- Analyze mitigation options for reducing environmental impacts including policy measures and environmental standards
 - ICAO CAEP standards (e.g., LTO noise standard for supersonic aircraft)
 - Low noise operational procedure concepts for aircraft and helicopters
 - Analysis of technology and innovative ideas to reduce noise, fuel burn, and emissions

Environment & Energy R&D Portfolio - FY19

NextGen RE&D (A13.b) Environmental Research

- Accelerate maturation of airframe and engine technologies
 - Technology maturation in partnership with industry via the CLEEN Program complete CLEEN Phase II with additional options
 - Demonstrate and assess benefits of new aircraft technologies via ASCENT COE
- Advance alternative jet fuels and consider changes in fuel composition
 - Advance ASTM Intl approvals via fuel testing and process improvements
 - Conduct supply chain analyses and support fuel evaluations within CORSIA
 - Coordinate activities of the aviation industry via CAAFI

Airport Technology Research (ATR)

ATR Overview:

- Three Research Programs Areas (RPA): Airport Safety, Pavement and Airport Environment
- All three RPAs presented to Airports Subcommittee

Environmental Efforts within ATR:

- Airport noise research started in FY12
- Expanded to cover broader environmental research in FY16

Collaborative effort among Tech Center, Office of Airports, and Office of Environment and Energy

Had deep dive briefing at the Spring Meeting

E&E R&D Portfolio – Efforts under FY20 President Budget

Core RE&D (A13.a) Environment & Energy

- Improve scientific understanding of noise and emissions constraints
- Incorporate scientific knowledge into an integrated analytical tool suite
 - Continued development of AEDT
 - Continued development of screening tools to complement AEDT
- Analyze mitigation options for reducing environmental impacts including policy measures and environmental standards
 - ICAO CAEP standards (e.g., LTO noise standard for supersonic aircraft)
 - Low noise operational procedure concepts for aircraft

NextGen RE&D (A13.b) Environmental Research

 Accelerate maturation of airframe and engine technologies via Phase III of the CLEEN Program

Environment and Energy Funding

Includes: RE&D, F&E, ATR, Operations, and non-FAA funds (e.g., other US Government and Transport Canada)

Presentation Outline

- E&E Portfolio Background and Overview
- ASCENT COE Update
- Budget Profile for E&E Portfolio
- Summary
- Backup:

– E&E Portfolio within the new NARP

Recent Successes

capabilities and solutions that are helping today

- Aviation Environmental Design Tool (AEDT) being upgraded to better capture actual operations and is being used extensively.
- Measurement technique and data provided foundation for ICAO CAEP PM standard.
- Noise research continues. Community noise survey under review. Starting work on national sleep study. Resumed work to understand potential health impacts of noise.
- Analytical framework was used to develop operational procedure concepts for Boston Logan that could provide noise reduction. Work is continuing to evaluate communication tools, develop additional concepts, and evaluate potential for broader use.
- CLEEN aircraft and engine technologies appearing in next generation of aircraft with FMS technologies retrofitted into today's fleet - reduces noise, emissions and fuel use for many years to come.
- Analytical tools provided foundation for ICAO CAEP Independent Expert review of aircraft technologies for the purpose of setting goals for noise, fuel burn, and NOx emissions.
- Certification of five alternative jet fuel pathways certification enabled multiple airlines to buy and use biofuels in LAX and elsewhere.
- Provided critical analytical support to development of Carbon Offsetting and Reduction Scheme for International Aviation (CORSIA).
- Alternative fuels scenarios adopted by ICAO CAEP for future trends assessment and research efforts instrumental for alternative fuel inclusion within CORSIA.

FAA Portion of the Remaining Agenda

Subject	Presenters
Briefing on Emissions R&D Efforts	L. Windhoffer
Briefing on Fuels (including fuels aspects of CORSIA)	N. Brown & D. Williams
Briefing on Supersonic R&D Efforts w/ Discussion	D. Scata, M. Locke, & S. Liu
Briefing on AEE Efforts on Helicopters, UAS and UAM	D. Scata & E. Elmore
Briefing on Ops for Low Noise	C. Dorbian
Analysis & Tools Briefing - Focus on Trajectory Evaluation and Visualization Efforts	F. Grandi & S. Doyle
Briefing on AEDT Plans & Screening Tool Development	J. DiPardo, M. Majeed, & S. Doyle
Briefing on Noise R&D Efforts	D. Scata
Briefing on CLEEN Program	L. Ileri

Questions for Tomorrow:

- Are there R&D areas within the E&E Portfolio that should be lower / higher priority?
- Are there R&D areas that AEE is not examining that should be added to the E&E Portfolio?
- What do you see coming on the horizon regarding E&E that may require future R&D efforts?

Presentation Outline

- E&E Portfolio Background and Overview
- ASCENT COE Update
- Budget Profile for E&E Portfolio
- Summary
- Backup:
 - E&E Portfolio within the NARP

Goal 1: Improve Airport Operations, Air Traffic, and Air Space Management Capabilities

Objective 1e: Noise and Emission

Identify and develop tools, methods, and procedures and/or requirements for the aerospace community to reduce the noise and emissions from aerospace vehicle operations.

Output	Collaborators	Long Term	Fiscal Year						
σαιράτ		R&D	19	20	21	22	23	24	
Advanced operational procedural concepts, documented through report, that could reduce community noise exposure while maintaining safe flight operations and guidance for air space planners on how these concepts could be incorporated.	Industry, NASA		x	х	х	x	x	x	

For discussion purposes with REDAC E&E Subcommittee – subject to change

Goal 2: Accelerate use of new technologies for aerospace vehicles and airport/spaceports

Objective 2b: Alternative Fuels

Identify and evaluate alternative fuels that provide equivalent safety and improved performance relative to conventional fuels.

Output	Colloborators	Long	Fiscal Year						
Output	Collaborators	R&D	19	20	21	22	23	24	
Technical analyses of greenhouse gas emissions values for alternative jet fuels for use by the International Civil Aviation Organization (ICAO) Committee on Aviation Environmental Protection (CAEP).	Industry, USG, int'l stakeholders		х	х	х	x	х	x	
Cost-benefit analysis detailing the environmental impacts, health effects, capital costs and operator costs regarding a change in the composition of conventional jet fuels.	Industry, NASA, DOD, int'l stakeholders		х	х					
Collection of data and research reports for the approval of at least one alternative jet fuel type per year by ASTM International.	Industry, USG, int'l stakeholders	YES	х	х	х	х	х	x	

For discussion purposes with REDAC E&E Subcommittee – subject to change

Goal 2: Accelerate use of new technologies for aerospace vehicles and airport/spaceports

Objective 2d: Applied Innovation

Identify and demonstrate new aerospace vehicle and airport/spaceport technologies that could be adopted by the aerospace community to improve safety, increase efficiency, and reduce environmental impacts.

Ordered	Collaborators	Long	Fiscal Year							
Output	Collaborators	R&D	19	20	21	22	23	24		
Summary of experimental data that was acquired, and analyses that were performed, to inform the development of an engine particulate matter (PM) emissions standard in the International Civil Aviation Organization (ICAO) Committee on Aviation Environmental Protection (CAEP).	Industry, USG, int'l stakeholders		х	х						
Summary of data and analyses that are used to inform the development of new noise and emissions standards in ICAO CAEP.	Industry, USG, int'l stakeholders			х	х	х				
Research on technologies to reduce supersonic aircraft noise, the public reaction to advanced supersonic aircraft noise, and procedures needed to certify aircraft noise to create the body of knowledge to support the development of en-route noise standards for airplanes that exceed Mach 1.	Industry, USG, int'l stakeholders		х	х	х	х	х	x		
Continuous Lower Energy, Emissions and Noise Phase II (CLEEN II) activities to demonstrate certifiable aircraft and engine technologies and to enable industry to expedite introduction of these technologies into current and future aircraft.	Industry, NASA, DOD		х	х						
Continuous Lower Energy, Emissions and Noise Phase III (CLEEN III) activities to demonstrate certifiable aircraft and engine technologies and to enable industry to expedite introduction of these technologies into current and future aircraft.	Industry, NASA, DOD	YES		х	х	х	х	x		

For discussion purposes with REDAC E&E Subcommittee – subject to change

Goal 5: Improve integrated modeling capabilities and system-wide analysis

Objective 5b: System Performance

Identify and develop tools, methods, studies, reports, and assessments for use by the aerospace community that evaluate, in an integrated manner, the system-wide performance, and impacts of new and existing aerospace vehicles, air traffic concepts, and airport/spaceport operations.

Output	Colloborators	Long	Fiscal Year						
Output	Collaborators	R&D	19	20	21	22	23	24	
Improved analytical capabilities of aviation environmental analysis tools by expanding the computational models for aircraft performance, noise and emissions source generation processes, and noise and emissions propagation processes.	Industry, USG, int'l stakeholders		х	х	х	x	х	x	

For discussion purposes with REDAC E&E Subcommittee – subject to change
